## Free PDF Quiz 2026 SAP C-THR92-2505 Accurate New Dumps Sheet

If you are quite nervous about the exam, and by chance, you are going to attend the C-THR92-2505 exam, then choose the product

of our company, because the product of our company will offer you the most real environment for the C-THR92-2505 exam, with this it can relieve your nerves while attending the C-THR92-2505 exam, as well as strengthen your confidence. Besides the product of our company also provide you plenty of practice materials for you to practice with questions and answers, it will help you to master the key knowledge points as quickly as possible. If you choose the product of our company, passing the C-THR92-2505 Exam won't be a dream.

## SAP C-THR92-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Table Reports: This part measures the skills of a Data Analyst and involves creating, managing, and running Table Reports. It focuses on designing tabular data presentations that facilitate straightforward access to detailed workforce analytics information.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Story Reports: This section of the exam measures skills of a Report Creator and covers the creation and management of Story Reports within SAP SuccessFactors. It emphasizes designing queries, configuring pages with widgets, and managing report permissions to generate insightful visualizations.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Canvas Reports and Page Designer: This part measures the capabilities of a Report Administrator and involves creating and customizing reports using Canvas Reports and Page Designer. It covers advanced query construction, formatting, pivot creation, and report distribution to enhance data presentation and usability.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Advanced Reporting Tool with Replicated Data: This section targets a Reporting Specialist and covers leveraging advanced reporting tools that operate on replicated data. It includes knowledge of data replication concepts and using these tools to perform comprehensive reporting that supports detailed analysis.</li> </ul>

## SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q62-Q67):

### NEW QUESTION # 62

You support report consumers. A report consumer asks if it is possible to save the selected items

when viewing the detail of a chart in a story report (see screenshot).

How do you tell the report consumer to save the state? Note: There are 2 correct answers to this question.

- A. View the chart in explorer mode, view the action menu, and choose Export.
- B. View the chart in explorer mode, and choose + New View to create an explorer view.
- C. Select the chart on the canvas, view the action menu, and choose Export.
- D. Select the chart on the canvas, view the bookmark menu, and choose Bookmark Current State.

**Answer: B,D**

Explanation:

\* Saving Chart States in a Story Report  
SAP SuccessFactors Story Reports provide the ability to save states or views for specific visualizations.

\* Explanation of Correct Answers

- \* B. View the chart in explorer mode, and choose + New View: Explorer mode allows creating a custom view of the chart with selected filters or dimensions.
- \* C. Select the chart on the canvas, view the bookmark menu, and choose Bookmark Current State: Bookmarking saves the current state of the chart for easy retrieval later.
- \* Explanation of Incorrect Answers
- \* A. Export: Exporting does not save the state; it simply downloads the chart.
- \* D. Explorer Mode Export: Similar to A, this does not save the state but generates an export file.

- \* SAP SuccessFactors Story Reporting Guide

### NEW QUESTION # 63

You have created a custom MDF object to track company car information. You need to be able to create story reports on the data of the custom MDF object. What must you do to enable a custom MDF object to be listed in the Available Data section of Query Designer?

- A. Update the Report Object Configuration Entity record for the object and set it as a root report object.
- **B. Update the Report Object Configuration Entity record for the object and associate the object with a schema.**
- C. Create a custom schema join using the Report Schema Join Manager tool.
- D. Create a Report Schema Configuration Entity Record.

#### Answer: B

#### Explanation:

- \* Scenario Analysis
- \* Custom MDF (Metadata Framework) objects, such as company car information, must be configured properly to appear in the Available Data section of the Query Designer.
- \* Solution
- \* Updating the Report Object Configuration Entity (ROCE) record to associate the custom MDF object with a schema ensures it is recognized in the reporting layer.
- \* Why Other Options are Incorrect
- \* A: Creating a custom schema join is not necessary to make the object available.
- \* C: Report Schema Configuration Entity is not applicable in this context.
- \* D: Setting it as a root report object is not required for inclusion in Query Designer.

#### References

- \* SAP SuccessFactors Reporting Configuration Guide

### NEW QUESTION # 64

Within a Story, you create a query using the Basic User Information table. After you add the Proxy Information table, you notice that some of the basic information records are NO longer displayed in the preview. How do you adjust the query to return the missing records in the preview?

- A. Remove the related table and select and drag it from the Available Data section.
- B. Change the join type to Inner Join.
- C. Remove the related table and add it using the Show Related Tables command from the Action Menu.
- **D. Change the join type to Left Outer Join.**

#### Answer: D

#### Explanation:

- \* Join Types in Queries:
- \* Inner Join: Only returns rows where there is a match in both tables.
- \* Left Outer Join: Returns all rows from the left table and matching rows from the right table, filling in NULLs where there is no match.
- \* Scenario:
- \* Adding the Proxy Information table creates a situation where some records from the Basic User Information table no longer match with Proxy Information.
- \* Changing the join type to Left Outer Join ensures that all records from the Basic User Information table are included, regardless of matching Proxy Information.
- \* Steps to Adjust Join Type:

- \* Edit the query.
- \* Locate the join between Basic User Information and Proxy Information tables.
- \* Change the join type from Inner Join to Left Outer Join.

#### NEW QUESTION # 65

When a user builds a query, what is the default People Scope of the query?

- A. All Reports of the logged-in user
- **B. Direct Reports of the logged-in user**
- C. All employees in the department of the logged-in user
- D. The HR reports of the logged-in user

**Answer: B**

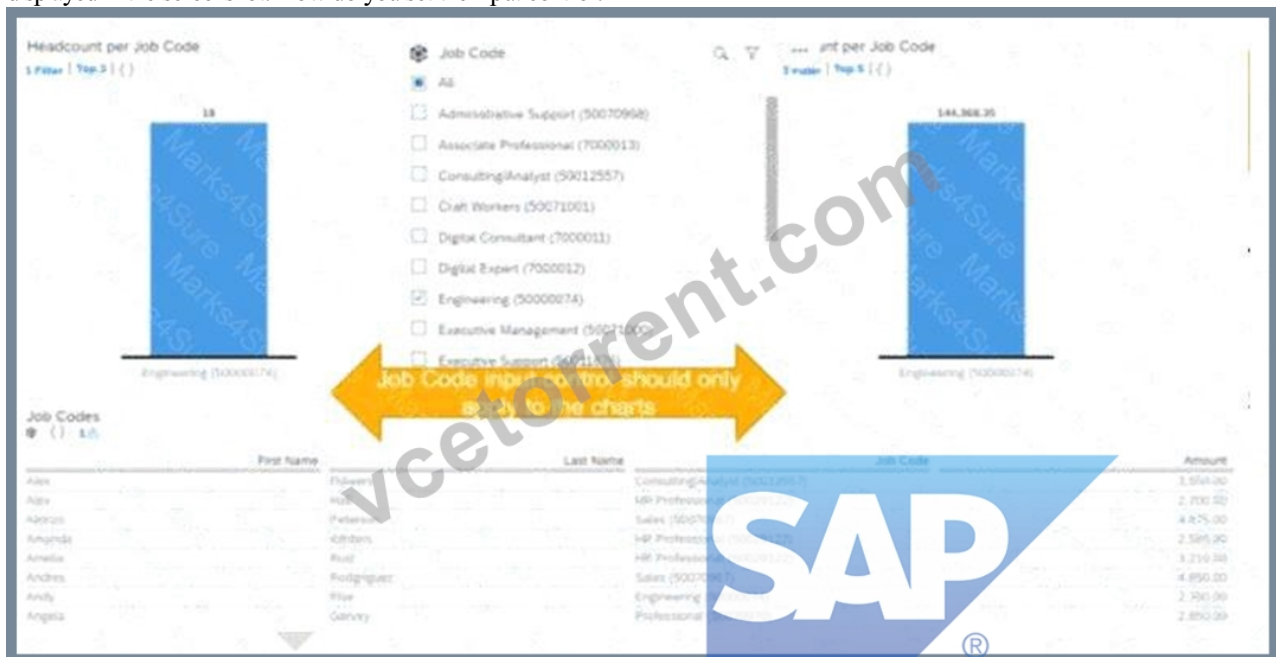

Explanation:

\* Default People Scope:

\* When building a query, the default People Scope is set to the Direct Reports of the logged-in user. This ensures the user only sees data relevant to their scope of responsibility.

#### NEW QUESTION # 66

You are creating a Story report on Job Classifications. You have configured the chart, table, and input control on the canvas, as displayed in the screenshot. How do you set the input control?

- A. Create the corresponding filter on each chart.
- B. Convert it to a Story Filter.
- C. Enable Cascading Effects.
- **D. Configure it for Linked Analysis.**

**Answer: D**

Explanation:

\* Linked Analysis

\* Configuring input controls for Linked Analysis allows interactions between components (charts, tables) on the same canvas, enabling filters to apply only to selected visuals.

\* Why This is Correct

\* In the scenario, the input control must affect only the charts and not the table. Linked Analysis ensures this targeted filtering behavior.

\* Why Other Options are Incorrect

- \* B (Create Filters): Manually adding filters is redundant when Linked Analysis can automate the behavior.
- \* C (Enable Cascading Effects): Cascading effects affect hierarchical filters but are unrelated to input control behavior here.
- \* D (Convert to Story Filter): A Story Filter would apply globally, affecting all elements, which is not desired.
