P.S. KaoGuTi在Google Drive上分享了免費的2026 ACAMS CCAS考試題庫：<https://drive.google.com/open?id=177wnN0EOdNkZz-XDiYZH3xJnnTi871>

KaoGuTi應一些考友的需要，在第一時間內及時更新了CCAS這門題目，更新之後的CCAS擬真試題覆蓋率100%。考生可在反復練習這份真題的基礎上，多思考，多總結，通過CCAS考試就沒有問題了。建議的是，一定要瞭解這門考試的最新動態資訊，這樣才能在考試中做到隨機應變。而我們就是一個可以滿足很多參加ACAMS CCAS認證考試的IT人士的需求的網站。

ACAMS CCAS 考試大綱：

主題	簡介
主題 1	• AML Foundations for Cryptoasset and Blockchain: This section of the exam measures skills of Anti-Money Laundering (AML) Officers and Crypto Compliance Specialists. It covers foundational knowledge of AML principles tailored to the cryptoasset and blockchain environment, introducing the regulatory landscape, typologies of financial crime, and the evolving risks associated with cryptoassets.
主題 2	• Cryptoasset and Blockchain: This domain targets Blockchain Analysts and Crypto Risk Managers. It focuses on understanding cryptoasset technologies, blockchain fundamentals, and their operational characteristics. Candidates learn about cryptoasset transaction flows, wallets, exchanges, smart contracts, and the challenges these present to financial crime prevention.

主題 3	• Risk Management Programs for Cryptoasset and Blockchain: This section measures expertise of Compliance Managers and Risk Officers in developing and implementing risk management frameworks specifically for the crypto sector. It includes procedures for assessing crypto-related financial crime risks, designing controls, monitoring compliance, and adapting to emerging threats within the cryptoasset ecosystem.

CCAS真題材料，最新CCAS題庫資訊

現在ACAMS CCAS 認證考試是很多IT人士參加的最想參加的認證考試之一，是IT人才認證的依據之一。通過這個考試是需要豐富的知識和經驗的，而積累豐富的知識和經驗是需要時間的。也許你會選擇一些培訓課程或培訓工具，花一定的錢選擇一個高品質的培訓機構培訓是值得的。KaoGuTi就是一個可以滿足很多參加ACAMS CCAS 認證考試的IT人士的需求的網站。KaoGuTi的產品是對ACAMS CCAS 認證考試提供針對性培訓的，能讓你短時間內補充大量的IT方面的專業知識，讓你為ACAMS CCAS 認證考試做好充分的準備。

最新的 AML Certifications CCAS 免費考試真題 (Q16-Q21):

問題 #16

Which features are used by anonymity-enhanced cryptoassets to reduce transparency of transactions and identities? (Select Two.)

- A. MetaMask wallet
- B. Automatic mixing
- C. Cryptographic enhancements
- D. Secure hashing algorithm 256
- E. Proof-of-stake mining

答案：B,C

解題說明：

Anonymity-enhanced cryptoassets employ specific technical features to obfuscate the details of transactions and the identities of users to reduce traceability and increase privacy. These include:

Automatic mixing (B): This refers to mechanisms such as coin mixers or tumblers that combine multiple transactions from different users into one batch and redistribute them, breaking the direct transaction link and obscuring the audit trail.

Cryptographic enhancements (D): Techniques such as zero-knowledge proofs, ring signatures, stealth addresses, and confidential transactions are cryptographic protocols that conceal sender, receiver, and transaction amount information, making the blockchain ledger less transparent.

Other options explained:

Proof-of-stake mining (A) is a consensus mechanism and not related to anonymity features.

Secure hashing algorithm 256 (C) is a cryptographic hash function standard but does not directly enhance anonymity.

MetaMask wallet (E) is a non-custodial wallet used mainly for Ethereum and tokens but is not an anonymity tool.

Reference from official crypto AML guidance and typology papers:

DFSA AML Module and thematic reviews highlight these anonymity techniques as high-risk indicators requiring enhanced due diligence (EDD).

UAE typology papers and FATF virtual asset guidance emphasize the risk posed by anonymity-enhanced cryptoassets using automatic mixing and cryptographic enhancements to circumvent AML controls 【AML/VER25/05-24: Sections 6.4, 7.3; 31.92._TFS_Typology_Paper_Eng_4.pdf】.

問題 #17

The Financial Action Task Force recommends countries require virtual asset service providers to maintain all records of transactions and customer due diligence measures for a minimum of:

- A. 2 years
- B. 7 years
- C. 6 months
- D. 5 years

答案： D

解題說明：

FATF standards specify that Virtual Asset Service Providers (VASPs) must keep records related to transactions and customer due diligence for at least 5 years after the completion of the transaction or end of the business relationship. This retention period facilitates effective AML investigations and regulatory reviews.

DFSA AML Module aligns with this timeframe, reinforcing that comprehensive record retention supports audit trails and compliance verification.

問題 #18

Which are common red flags that indicate fraudulent activity in a decentralized finance marketplace? (Select Two.)

- A. A crypto entity is launched, has a bustling social media presence, and offers limited free non-fungible token incentives in exchange for new customer trading.
- B. A coin is launched using an untested protocol; only a small number of wallets control the supply.
- C. A non-fungible token is shared privately among a community of supporters via a non-fungible token airdrop; it is not linked to a specific web address to allow for trading.
- D. A token is introduced, is endorsed by high-profile celebrities, and the price of the coin steadily rises; there is no significant activity of selling the coin.
- E. A coin is launched, has a low social media presence, has many wallet addresses controlling its supply, and has an original white paper published.

答案： B,C

解題說明：

Red flags include private sharing of NFTs without public trading (A), indicating potential lack of transparency, and new coins with untested protocols controlled by few wallets (C), signaling possible manipulation or fraud.

Tokens endorsed by celebrities with price increases (D) or active social media presence (E) are less directly indicative of fraud but require monitoring. Low social media presence with wide ownership and original whitepapers (B) is typically less suspicious.

問題 #19

Which business category below is considered to present the highest risk of money laundering?

- A. Pharmaceutical company
- B. Law firm
- C. Registered hedge fund
- D. Art dealer

答案： D

解題說明：

Art dealers present a high money laundering risk due to the subjective valuation of art, ease of transferring assets, and the potential for using art as a vehicle to conceal illicit funds.

Registered hedge funds (A) and law firms (C) have AML obligations but are generally more regulated. Pharmaceutical companies (B) are less associated with high ML risk.

The DFSA AML and FATF typology papers specifically identify art dealing as a sector with heightened ML risk.

問題 #20

In cryptoasset AML programs, "ongoing monitoring" means:

- A. Freezing all suspicious accounts
- B. Checking customer activity only when onboarding
- C. Continuous review of transactions to detect anomalies
- D. Only screening customers for sanctions once

答案： C

解題說明：

Ongoing monitoring is the continuous analysis of customer activity to detect unusual or suspicious patterns over time.

問題 #21
