Salesforce Certified B2C Commerce Architect Sample Questions (Q55-Q60):

NEW QUESTION # 55
A merchant uploads an image using the Content Image Upload module of Business Manager.
Which three modules can the merchant or developer use to display the image on the Storefront7 Choose 3 answers

- A. Storefront catalogs
- B. Content slots
- C. Content assets

- D. Payment types
- E. ISML templates

Answer: A,B,C

NEW QUESTION # 56
The Client has requested an Architect's help in documenting the architectural approach to a new home page. The requirements provided by the business are:
* Multiple areas of static image content, some may need text shown at well
* The content page must be Realizable
* A carousel of featured products must be shown below a banner 101191
* Recommended categories will be featured based on the time of year
Which two solutions would fulfil these requirements?
Choose 2 answers

- A. Leverage B2C Commerce ContentManagement Service
- B. Leverage B2C Commerce content slots and assets
- C. Leverage B2C Commerce locales in Business Manager
- D. Leverage B2C Commerce Page Designer with a dynamic layout.

Answer: B,D

Explanation:
To fulfill the requirements of having multiple static image content areas, a carousel of featured products, and dynamic content adjustments based on the time of year:
Option C (Leverage B2C Commerce content slots and assets): This solution allows for dynamic content management where different assets and slots can be used to manage and display static images, text overlays, and other content variations effectively.
Option D (Leverage B2C Commerce Page Designer with a dynamic layout): Using the Page Designer with a dynamic layout enables the easy assembly of complex page designs, including carousels and responsive elements that adjust based on viewing device or other criteria like time of year. This tool provides the flexibility required for real-time customization and resizability of page elements. These solutions provide robust and flexible management of site content that meets the business's needs for a visually engaging and adaptable homepage.

NEW QUESTION # 57
A third party survey provider offers both an API endpoint for individual survey data and an SFTP server endpoint that can accept batch survey data. The initial implementation of the integration includes
1.Marking the order as requiring a survey before order placement
2. On the order confirmation pace, the survey form is displayed for the customer to fill
3. The data is sent to the survey provider API, and the order it marked as not requiring a survey Later it was identified that this solution is not fit for purpose as the following issues and additional requirements were identified:
1. If the API call fails, the corresponding survey data is lost. The Business requires to avoid data loss.
2. Some customers skipped the form. The Business require sending a survey email to such customers.
3. The Order Management System (OMS) uses a non-standard XML parser it did not manage to parse orders with the survey, until the survey attribute was manually removedfrom the xml.
How should the Architect address the issues and requirements described above?

- A. Send the survey data to the API endpoint in real-time until the survey data is successfullycaptured.Instruct the OMS development teamto update their XML parser, use the Order survey attribute to send emails for the cases when the survey was skipped.
- B. Create a custom object to store the survey data. Send to the API endpoint using a job. On success, remove the custom object. On failure, send the survey data with APIfrom the next execution of the same job. Use the custom object to send emails for the cases when the survey was skipped.
- C. Create a custom object when the survey is required Send to the API endpoint in real-time. On success, remove the object. Onfailure, capture the survey data in the custom object and later reprocess with a job. Use the custom object to send emails for the cases when survey was skipped.
- D. Create a custom session attribute when the survey is required. Send to the API endpoint in real-time. On failure, capture the survey data in the session and reprocess, use me session attribute to send emails for the cases when survey was skipped.

Answer: C

Explanation:
This approach addresses all concerns: data retention, reattempt on failure, and follow-up communication. By storing survey data in a custom object, data is preserved even if the API call fails, allowing for reprocessing.
This method also facilitates sending follow-up emails by querying custom objects for surveys that were skipped, ensuring comprehensive coverage and reliability in data handling and customer engagement.

NEW QUESTION # 58
There are three logging categories: category1, category1.eu, and category1.us.
In Business Manager, category1 is enabled for WARN level and no other categories are configured. All custom log targets are enabled.
The code segment below executes.

```
var logger = Logger.getLogger("loggerFile","category1.eu" );
logger.warn("This is a log message");
```

What is the result'

- A. Logs will not be written.
- B. Logs will be written to the log file with a prefix customwarn.
- C. Logs will be written to the log file with a prefix loggerFile.
- D. Logs will be written to the log file with a prefix custom-loggerFile.

Answer: D

NEW QUESTION # 59
There Is an Issue with the site when the domain Is opened from Google search results. After researching the problem. It turns out that the site returns * 404 page error when accessed with a parameter in the URL.
What should the Architect recommend to fix that issue?

- A. Add dynamic redirect if the URL contains parameter to Home Show.
  Add this snippet to the aliases configuration for the domain
- B. Add dynamic catch-all rule to redirect to home page.
- C. Add this snippet to the aliases configuration for the domain:

```
{
    "pipeline":"Home-Show"
    "apply-to-host-only-request-with-params":"true"
}
```

- D. Add this snippet to the aliases configuration for the domain

```
{
    "controller":"Home-Show"
    "apply-to-host-only-request-with-params":"true"
}
```

Answer: C

NEW QUESTION # 60
