#### NEW QUESTION # 98

During proofing of the product manual, a problem was discovered requiring 15 days additional time to affect a correction. How can the date of availability be maintained?

- A. Delay Release for Manufacture by 5 days
- B. Delay Manufacture Product by 5 days
- C. Expedite Package Product by 5 days
- D. Expedite Draft Product Manual by 5 days

**Answer: C**

Explanation:

To maintain the product availability date while accommodating a 15-day delay in proofing corrections, the best course of action is to expedite another activity on the critical path. The PSP Study Guide outlines methods for schedule recovery and acceleration (Section 2.3.5, "Acceleration"). Expediting the Draft Product Manual by 5 days helps redistribute the time lost, aligning subsequent tasks to achieve the original completion milestone without delaying the overall schedule.

#### NEW QUESTION # 99

What project cost elements would NOT normally be reflected in the Activity 1000?

- A. Home office expenses
- B. CPM processing and updating
- C. Job site quality control
- D. Materials used in the construction

**Answer: A**

Explanation:

Activity-specific costs in CPM schedules typically include direct expenses like materials (C), field-related overhead (D), and specific schedule management tasks (B).

Home office expenses are classified as indirect costs and are not associated with any specific activity within the project schedule. They are accounted for in broader financial statements rather than in the activity-based budget.

References: PSP Study Guide, Section 1.3.10 - Cost Estimate Development, explains how costs are categorized and assigned in schedules.

#### NEW QUESTION # 100

- C. 10 days.
- D. 15 days.
