Our professional experts devote plenty of time and energy to developing the NSE8_812 Study Tool. You can trust us and let us be your honest cooperator in your future development. Here are several advantages about our NSE8_812 exam for your reference.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q94-Q99):

NEW QUESTION # 94
Refer to the exhibits.
The exhibits show a diagram of a requested topology and the base IPsec configuration.
A customer asks you to configure ADVPN via two internet underlays. The requirement is that you use one interface with a single IP address on DC FortiGate.
In this scenario, which feature should be implemented to achieve this requirement?

- A. Use network-overlay id
- B. Change advpn2 to IKEv1
- C. Use peer-id
- D. Use local-id

Answer: A

Explanation:
A is correct because using network-overlay id allows you to configure multiple ADVPN tunnels on a single interface with a single IP address on the DC FortiGate. This is explained in the FortiGate Administration Guide under ADVPN > Configuring ADVPN > Configuring ADVPN on the hub. References: https://docs.fortinet.com/document/fortigate/7.4.0/administration-guide/978793/advpn https://docs.fortinet.com/document/fortigate/7.4.0/administration-guide/978793/advpn/978794/configuring-advpn

NEW QUESTION # 95
Review the following FortiGate-6000 configuration excerpt:
Based on the configuration, which statement is correct regarding SNAT source port partitioning behavior?

- A. It equally distributes SNAT source ports across chassis slots.
- B. It dynamically distributes SNAT source ports to operating FPCs or FPMs.
- C. It statically distributes SNAT source ports to operating FPCs or FPMs
- D. It is the default SNAT configuration and preserves active sessions when an FPC or FPM goes down.

Answer: C

Explanation:
https://docs.fortinet.com/document/fortigate/7.4.1/fortigate-6000-administration-guide/81276/controlling-snat- port-partitioning-behavior
"chassis-slots this option statically allocates SNAT source ports to all FPCs that are enabled when you enter the command. If you disable an FPC from the CLI, the SNAT source ports assigned to that FPC will not be re- allocated to the remaining FPCs. All FPCs that are still operating will maintain the same SNAT source port allocation and active sessions being processed by the still operating FPCs will not be affected."

NEW QUESTION # 96
You are troubleshooting a FortiMail Cloud service integrated with Office 365 where outgoing emails are not reaching the recipients' mail What are two possible reasons for this problem? (Choose two.)

- A. The FortiMail access control rule to relay from Office 365 servers FQDN is missing.
- B. The FortiMail DKIM key was not set using the Auto Generation option.
- C. The FortiMail access control rules to relay from Office 365 servers public IPs are missing.
- D. A Mail Flow connector from the Exchange Admin Center has not been set properly to the FortiMail Cloud FQDN.

Answer: C,D

Explanation:
FortiMail Cloud service is a cloud-based email security solution that integrates with Office 365 to provide protection against spam, malware, phishing, data loss, etc. To use FortiMail Cloud service with Office 365, users need to configure both FortiMail Cloud settings and Office 365 settings properly. One possible reason for outgoing emails not reaching the recipients' mailboxes is that the FortiMail access control rules to relay from Office 365 servers public IPs are missing. This means that FortiMail Cloud service does not recognize the Office 365 servers as authorized senders and rejects the outgoing emails. Users need to add the Office 365 servers public IPs to the FortiMail access control rules to allow relaying. Another possible reason for outgoing emails not reaching the recipients' mailboxes is that a Mail Flow connector from the Exchange Admin Center has not been set properly to the FortiMail Cloud FQDN. This means that Office 365 does not route the outgoing emails to the FortiMail Cloud service for scanning and delivery. Users need to create a Mail Flow connector from the Exchange Admin Center and specify the FortiMail Cloud FQDN as the smart host. Reference: https://docs.fortinet.com/document/fortimail-cloud/6.4.0/administration-guide/19662/integrating-fortimail-cloud-with-office-365

NEW QUESTION # 97
Refer to the exhibit.
A customer needs to create a multi-tier MCLAG set up with the topology as shown in the exhibit.
A1/A2
B1/B2
C1/C2
Which command snippet should be applied to it, to allow active/active links in this topology?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: B

NEW QUESTION # 98

Refer to the exhibit, which shows the high availability configuration for the FortiAuthenticator (FAC1).

Based on this information, which statement is true about the next FortiAuthenticator (FAC2) member that will join an HA cluster with this FortiAuthenticator (FAC1)?

- A. FAC2 can have its HA interface on a different network than FAC1.
- B. FAC2 can only process requests when FAC1 fails.
- C. The FortiToken license will need to be installed on the FAC2.
- D. FSSO sessions from FAC1 will be synchronized to FAC2.

Answer: A

Explanation:
https://docs.fortinet.com/document/fortiauthenticator/6.5.3/administration-guide/122076/high-availability
https://docs.fortinet.com/document/fortiauthenticator/6.5.3/administration-guide/122076/high- availability#Standalo

NEW QUESTION # 99
