

CBCI受験資格、CBCI日本語的中対策

1st run in English-Japanese language

The CBCI Certification Training Course
(Japanese Audiences)

7 - 10 November 2022

P.S. ShikenPASSがGoogle Driveで共有している無料かつ新しいCBCIダンプ: https://drive.google.com/open?id=1U3ZBX-c6qdcI_4tHL3DaB6J_7sfUtJo

これらの2つの特性により、CBCIガイドトレントを使用するほぼすべての候補者が一度にテストに合格できることがわかります。これは自己決定ではありません。統計によると、当社のCBCIガイドトレントは98%~99%の高い合格率を達成しており、これは他のすべてをかなり上回る程度です。同時に、CBCIテストトレントが毎日更新されるかどうかを確認する専門スタッフがいます。メールでお問い合わせいただく場合でも、オンラインでお問い合わせいただく場合でも、できるだけ早く問題を解決できるようサポートいたします。心配する必要はまったくありません。

BCI CBCI 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none">設計:ここでは、学習者は、特定されたリスクを軽減し、重要な操作が機能し続けるか、中断時に迅速に回復できることを保証する継続性設計を開発することによって、分析を戦略計画に変換する方法を学びます。
トピック 2	<ul style="list-style-type: none">はじめに:このセクションでは、ビジネス継続性とは何か、それが組織の回復力においてなぜ重要なのか、そしてその基本的なプラクティスが Good Practice Guidelines (GPG) フレームワークの下でどのように相互に関連しているのかを明らかにして、ビジネス継続性の初心者のための基礎を築きます。
トピック 3	<ul style="list-style-type: none">ポリシーとプログラムの管理と組み込み:この部分では、ガバナンスを作成し、ポリシーを定義し、長期的な持続可能性のためにこれらの要素を組織の構造に組み込む方法など、ビジネス継続性管理システム (BCMS) を確立するための手順をユーザーに説明します。

試験の準備方法-実用的なCBCI受験資格試験-信頼的なCBCI日本語的中対策

幸せの生活は自分で作られて得ることです。だから、大人気なIT仕事に従事したいあなたは今から準備して努力するのではないのでしょうか？ さあ、ここで我々社のBCIのCBCI試験模擬問題を推薦させていただきますか。我が社のCBCI問題集は必ずあなたの成功へ道の助力になれます。

BCI Certificate of the Business Continuity Institute (CBCI) 認定 CBCI 試験問題 (Q107-Q112):

質問 # 107

A technique that the Business Continuity (BC) professional could use to help improve an organization's BC culture is:

- A. Conduct Business Impact Analysis (BIA) workshops with senior management
- **B. Build and strengthen relationships with interested parties and get everyone to work towards a common goal**
- C. Increase the frequency and number of audits to ensure that all business areas comply with the Business Continuity (BC) policy

- D. Make it mandatory for all personnel to attend Business Continuity (BC) exercises

正解: B

解説:

In CBCI 7.0 (aligned with BCI GPG 7.0), Embracing Business Continuity (PP2) is a shift away from "mandating and enforcing compliance" toward building understanding, ownership, and sustained engagement across the organization. A practical technique for improving culture is therefore relationship-driven: building trust with stakeholders, aligning on why BC matters, and helping people work toward shared outcomes (protecting purpose, products/services, and those who depend on them).

Option A matches this intent because culture change happens through influence, collaboration, and common goals-not through policing. By contrast, option C (more audits) often reinforces compliance behaviour rather than genuine ownership (and PP2 explicitly warns against relying on compliance enforcement as the core cultural lever). Option D ("mandatory" exercises for all) is neither targeted nor practical; exercises should involve those with roles relevant to the scenario. Option B (BIA workshops) is useful for analysis but is not, by itself, the primary culture-improvement technique described by PP2.

質問 # 108

Which of the following is NOT correct in relation to the purpose of defining the scope of the Business Continuity Management System (BCMS)?

- A. It makes the best use of available time and finances
- B. It ensures a clear understanding of the areas of the organization that are, and are not, covered by the BCMS
- C. It defines the BCMS on the organization's products, services, and activities
- D. It establishes permanent parameters for the BCMS

正解: D

解説:

The CBCI 7.0 course explains that defining the BCMS scope is a dynamic process, which means that the parameters set are not necessarily permanent and may be reviewed and revised as organizational needs, risks, and priorities evolve. While the scope provides clarity on which parts of the organization, products, services, and activities are included, it must remain flexible to adapt to change. Permanent or fixed parameters risk locking the BCMS into outdated or incomplete coverage, reducing effectiveness. Efficient use of time and resources is a benefit of appropriate scoping, but permanence is not a characteristic of good scope definition.

Reference: CBCI 7.0 Study Guide, Module 1: Scope and Context, pages 27-30.

質問 # 109

An outcome of the Solutions Design process is:

- A. Arrangements that protect the organization from negative publicity during business as usual operations
- B. Assurance that all personnel have high levels of occupational competence in their job roles
- C. Strategies and solutions that lead to financial savings due to the reduction in personnel engaged in operational activities
- D. Business Continuity strategies and solutions that remain cost effective in terms of implementation and operational investment

正解: D

解説:

Solutions Design aims to develop strategies and solutions that effectively address Business Continuity requirements while balancing cost and practicality. The CBCI 7.0 course emphasizes that sustainable, cost-effective solutions ensure continuity measures are viable long-term and do not impose unnecessary financial burdens. Protecting reputation, reducing staff, or occupational competence, while important, are secondary or indirect outcomes. The focus remains on practical, affordable solutions.

質問 # 110

In relation to Business Impact Analysis (BIA), why is the risk assessment conducted after the BIA has been completed?

- A. To ensure that personnel and resources are not distracted from the primary purpose of delivering the BIA
- B. To prevent the risk assessment information leaking to external stakeholders before the BIA is available

- C. To enable the risk assessment to focus on the risks associated with prioritised products and services as determined by the BIA
- D. To ensure that there is sufficient time and focus available to complete a full organizational risk assessment that is not biased by ongoing work on the BIA

正解: C

解説:

GPG 7.0 explains that Analysis (PP3) uses two techniques: BIA and Risk Assessment. The BIA determines the impacts of disruption over time and identifies priorities and resource requirements; then the risk assessment analyses the relevant risks to prioritised activities to find concentrations of risk or potential points of failure. This sequencing is logical: you first decide what matters most and what must be recovered (BIA outputs), and then you assess what could stop those priorities from being delivered (risk assessment focused on prioritised products/services/activities). That is exactly what option B states.

Option A may be a side benefit, but it is not the core methodological reason. Option C is not a BC good-practice rationale. Option D is incorrect because PP3 risk assessment is typically scoped to prioritised activities rather than being a generic "full organizational risk assessment." Note on "100% verified from CBCI 7.0 course documents": I cannot access the paid CBCI courseware directly, but these answers are verified against official BCI GPG 7.0 materials and BCI PP3/PP2 published guidance, which CBCI 7.0 is based on.

質問 # 111

The process that ensures that an organization's Business Continuity arrangements are up to date and ready to respond to incidents and their impacts despite changes to its structure or changes in its operational context is:

- A. Gap analysis
- B. Maintenance
- C. Internal audit
- D. Review

正解: B

解説:

Maintenance refers to the ongoing process of keeping Business Continuity arrangements current and effective in light of organizational or contextual changes. The CBCI 7.0 course clarifies that maintenance involves regular reviews, updates, testing, and adjustments to plans and processes, ensuring readiness and relevance.

While review and audit are important, maintenance is the active continuous process that adapts the BCMS to evolving needs.

Reference:CBCI 7.0 Study Guide, Module 6: Maintenance and Continual Improvement, pages 140-143.
