In the list given below, the left column has some Wanderlust Business/IT objectives and decisions and the right column has some EA principles. Which objectives and decisions correlate best to which principle?

Minimize water loss during Lithium extraction	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only
Reluctant to move Core to Cloud but open to consider cloud for collaboration	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only
Smart Battery, Instant- Charge and Perpetual Warranty initiatives	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only
Substitute bespoke applications	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only
<b>SAP</b> SAP Certified Professional Sample Questions	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only

### Answer:

#### Explanation:

Minimize water loss during Lithium extraction	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only
Reluctant to move Core to Cloud but open to consider cloud for collaboration	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only
Smart Battery, Instant- Charge and Perpetual Warranty initiatives	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only
Substitute bespoke applications	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only
<b>SAP</b> SAP Certified Professional Sample Questions	Ensure legal and regulatory compliance and minimize environmental impact Minimize technology diversity and complexity and subscribe before buy before build Maximize business agility and use innovation Adopt common use applications and balance best practice and with best of breed Protect business data and cloud first but not cloud only

#### NEW QUESTION # 47

As Chief Enterprise Architect of Wanderlust GmbH, you have just finished documenting the business ecosystem around online marketing. The CEO is asking for a suitable artifact to rejuvenate online marketing with a set of employees and partners. What would you do to be ready with the right information in this situation?

- A. Extend the business ecosystem into business capabilities and processes.
- **B. Create a stakeholder map.**
- C. Extend the organization map into a statement of architecture work.
- D. Extend the organizational map by detailing the organization units, partners and stakeholder groups further into business roles and personas.

#### Answer: B

Explanation:

In order to rejuvenate the online marketing efforts with a set of employees and partners, creating a stakeholder map is the appropriate next step. A stakeholder map will help to identify and categorize all the relevant parties involved in the online marketing ecosystem, including internal and external stakeholders, their interests, influence, and the relationships between them. This artifact provides a visual representation of all stakeholders, their expectations, and requirements, which is critical for developing a targeted strategy for rejuvenation.

= Stakeholder mapping is a common practice in enterprise architecture to ensure that all parties affected by a project are identified and their needs are considered in the decision-making process.

#### NEW QUESTION # 48

What are important factors of the SAP BTP. Cloud Foundry environment during runtime that you need to consider?

- A. CPU capacity and memory size of the application
- B. Number of users and API calls
- **C. Programming language and buildpacks**

#### Answer: C

Explanation:

In the SAP BTP Cloud Foundry environment, several factors are critical during runtime to ensure optimal application performance and scalability. The correct answer, A, highlights two fundamental aspects:

Programming language: This determines the specific buildpack to be used, as Cloud Foundry supports multiple programming languages through different buildpacks which provide framework and runtime support for applications.

Buildpacks: These are key components in the Cloud Foundry architecture that provide runtime and framework support necessary to build and deploy applications in various programming languages effectively.

These elements are crucial as they directly impact how applications are built, deployed, and run within the Cloud Foundry environment, influencing performance, compatibility, and scalability.

Reference:

SAP BTP Cloud Foundry documentation.

Buildpacks and programming language support in SAP BTP.

#### NEW QUESTION # 49

Which of the following lists of SAP Enterprise Architecture artifacts support making informed Target Application Architecture decisions that are aligned with the strategic direction of a company?

- **A. Stakeholder Map/Business Strategy Map/Solution Strategy/Architecture Roadmap**
- B. Principles Standards, Guidelines/Solution Context/Baseline Business and Solution Architecture
- C. Solution Context/Solution Concept/Stakeholder Map/Baseline Business and Solution Architecture

#### Answer: A

Explanation:

To make informed decisions about the Target Application Architecture that are aligned with the strategic direction of a company, certain artifacts are necessary to ensure that there is a clear connection between the stakeholder needs, business strategy, and the architectural vision. Option A includes a Stakeholder Map, which identifies the key players and their interests; a Business Strategy

Map, which outlines the strategic objectives; a Solution Strategy, which details the approach to achieve the objectives through solutions; and an Architecture Roadmap, which lays out the plan to move from the current to the future state. These artifacts together provide a comprehensive view that guides the Target Application Architecture towards aligning with the company's strategic direction.

Reference:

Enterprise Architecture frameworks and methodologies that outline the use of strategic artifacts in architecture development. Guidelines on creating architecture roadmaps that align with business strategies.

## NEW QUESTION # 50

Which of the following set of artifacts does SAP provide as part of the SAP Reference Solution Architecture content?

- A. Solution Value Flow Diagram/Solution Process Flow Diagram/Solution Component Diagram/Solution Data Flow Diagram
- B. Solution Value Flow Diagram/Solution Process Flow Diagram/Solution Component Diagram
- **C. Solution Context Diagram/Solution Component Diagram/Solution Application Use-Case Diagram/Solution Value Flow Diagram**

**Answer: C**

Explanation:

SAP provides several artifacts as part of the SAP Reference Solution Architecture content to guide and streamline solution design and implementation. The artifacts provided are aimed at delivering comprehensive architectural documentation to cover various aspects of the solution architecture. Option B includes the Solution Context Diagram, which provides a high-level view of the system's environment and boundaries. The Solution Component Diagram gives an overview of the components and their interactions within the system. The Solution Application Use-Case Diagram describes how different users will interact with the application. The Solution Value Flow Diagram illustrates the value that flows through the system and between stakeholders.

:

SAP documentation on Solution Architecture best practices.

Resources detailing the SAP Reference Architecture framework.

## NEW QUESTION # 51

.....
