

# DP-900 Valid Exam Vce Free | DP-900 Interactive Questions

P.S. Free & New DP-900 dumps are available on Google Drive shared by PDF4Test: <https://drive.google.com/open?id=1RITel-AqN5IB6jcXPV6oGKDQ9XnAoSQ>

We offer you DP-900 study guide with questions and answers, and you can practice it by concealing the answers, and when you have finished practicing, you can cancel the concealment, through the way like this, you can know the deficient knowledge for DP-900 exam dumps, so that you can put your attention to the disadvantages. In addition, we also have the free demo for DP-900 Study Guide for you to have a try in our website. These free demos will give you a reference of showing the mode of the complete version. If you want DP-900 exam dumps, just add them into your card.

## Explain Analytics Workloads on Azure: 25-30%

- Explain Analytics Workloads: The applicants should be able to explain transactional workloads, data warehousing workloads, and when data warehouse solutions are needed. This subtopic also covers their skills and knowledge associated with the differences between analytics and a transactional workload as well as the differences between real-time and batch.
- Explain Data Visualization within Microsoft Power BI: You need to have competence in explaining the function of dashboards, interactive reports, and paginated reporting, as well as the workflow within Power BI.
- Explain Modern Data Warehouse Components: The test takers should understand Azure data services for the latest data warehousing, including Azure Synapse Analytics, Azure HDInsight, Azure Data Lake, and Azure Databricks, as well as explain the workload and architecture for modern data warehousing.
- Explain Data Processing & Ingestion on Azure: The learners should be able to explain the fundamental practices for data loading, Azure Data Factory components, and data processing options.

### NEW QUESTION # 230

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Box 1: No

The API determines the type of account to create. Azure Cosmos DB provides five APIs: Core (SQL) and MongoDB for document data, Gremlin for graph data, Azure Table, and Cassandra.

Currently, you must create a separate account for each API.

Box 2: Yes

Azure Cosmos DB uses partitioning to scale individual containers in a database to meet the performance needs of your application. In partitioning, the items in a container are divided into distinct subsets called logical partitions. Logical partitions are formed based on the value of a partition key that is associated with each item in a container.

Box 3: No

Logical partitions are formed based on the value of a partition key that is associated with each item in a container.
