Scrum framework is one of the most popular agile approaches used in software development. It is a flexible and adaptable method that emphasizes team collaboration, adaptive planning, and continuous improvement. One key role in this framework is the Product Owner, who is responsible for defining and prioritizing the product backlog, ensuring the team is working on the right things at the right time. As such, the role of the Product Owner is critical to the success of any Scrum team.

PSPO-I Exam is offered by Scrum.org, an organization that provides comprehensive training and certification programs for Scrum practitioners worldwide.

Scrum Professional Scrum Product Owner I Sample Questions (Q17-Q22):

NEW QUESTION # 17

As the Developers start work during the Sprint, they realize they have selected too much work to finish in the Sprint. What should they do?

(choose the best answer)

- A. Inform the Product Owner at the Sprint Review, but prior to the demonstration.
- B. Find another Scrum Team to give the excess work to.
- C. Reduce the Definition of Done and get all of the Product Backlog items done by the new definition.
- **D. As soon as possible in the Sprint, work with the Product Owner to remove some work or Product Backlog items.**

Answer: D

Explanation:

Explanation

This is the best answer because it respects the Scrum values of openness, commitment, and focus. The Developers should be transparent about their progress and collaborate with the Product Owner to adjust the Sprint scope accordingly. The Product Owner is responsible for maximizing the value of the product and the work of the Developers, so he or she should be involved in any decisions that affect the Sprint Goal and the Product Backlog. References:

Scrum Guide, page 10: "If the work turns out to be different than the Developers expected, they collaborate with the Product Owner to negotiate the scope of Sprint Backlog within the Sprint." Scrum Guide, page 11: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team."

NEW QUESTION # 18

A Scrum Team has been working on a product for 9 Sprints. A new Product Owner who is new to Scrum joins the team and understands she is accountable for the Product Backlog. However, she is unsure about the purpose of the Product Backlog. She has read that the Product Backlog should be a list of all user features for the product. She goes to the Scrum Master asking where to put the other types of requirements that are going to be taken into account. Are all of the following types of requirements acceptable on a Product Backlog?

- * Stability requirements
- * Performance requirements
- * Product Functionality
- * Documentation
- * Fixes

(choose the best answer)

- A. No. Product Backlog is a tool for the Product Owner. The Product Owner represents the users and stakeholders. Other types of requirements should be managed
- **B. Yes, they all belong on the Product Backlog. The Product Backlog is supposed to be the "single source of truth" for all the work for the product.**

Answer: B

Explanation:

separately by the Developers. They are not the Product Owner's concern.

Explanation:

The Product Backlog is an ordered list of everything that is known to be needed in the product. It is the single source of truth for the Scrum Team and the stakeholders. It contains all the requirements, features, functions, enhancements, fixes, and anything else that can deliver value to the customers and users of the product.

All types of requirements are acceptable on a Product Backlog, as long as they are aligned with the product vision and goals, and

they are transparent, clear, and valuable. The Product Backlog can include stability requirements, performance requirements, product functionality, documentation, fixes, or any other aspects that contribute to the quality and usability of the product. The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. The Product Owner is responsible for managing and refining the Product Backlog, collaborating with the stakeholders and the Developers, and ordering the items in a way that best achieves goals and missions. The Product Owner represents the interests of everyone with a stake in the product and ensures that the Scrum Team works on the right things at the right time. The Developers are accountable for creating a "Done" Increment that meets the Definition of Done each Sprint. The Developers are responsible for planning and executing the Sprint Backlog, designing and building the product functionality, testing and improving the product quality, and delivering a potentially releasable Increment. The Developers work closely with the Product Owner to understand and clarify the Product Backlog items, provide feedback and estimates, and suggest improvements and innovations.

NEW QUESTION # 19

The Scrum Team should have all the skills needed to:

(choose the best answer)

- A. Do all of the development work, except for specialized testing that requires additional tools and environments.
- B. Complete the project within the date and cost as calculated by the Product Owner.
- C. Turn Product Backlog items into a valuable, useful Increment.

Answer: C

Explanation:

The Scrum Team should have all the skills needed to turn Product Backlog items into a valuable, useful Increment, as this is the primary goal of each Sprint. The Scrum Guide states that "The Scrum Team consists of one Scrum Master, one Product Owner, and Developers. Within a Scrum Team, there are no sub-teams or hierarchies. It is a cohesive unit of professionals focused on one objective at a time, the Product Goal."¹ The Scrum Team should be cross-functional, which means that the Developers have all the skills necessary to create a product Increment.¹ The Scrum Team should also be self-managing, which means that they decide how best to accomplish their work, rather than being directed by others outside the Scrum Team.¹ References:

* 1: The Scrum Guide², page 6

* 2: The Scrum Guide

NEW QUESTION # 20

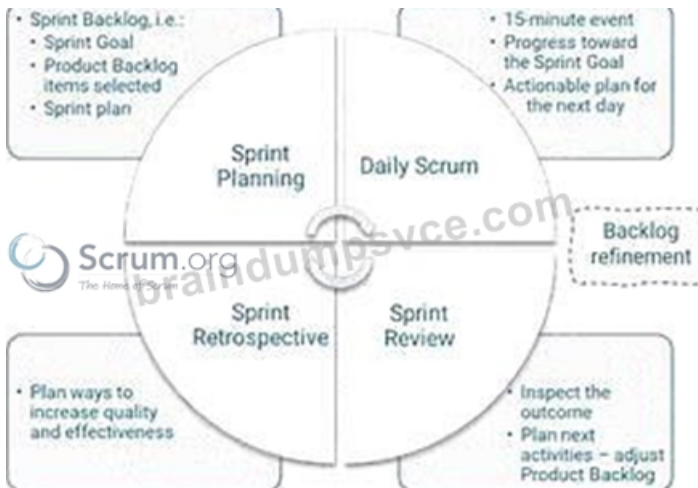

Which are characteristics of the Daily Scrum?

(choose the best two answers)

- A. It is held first thing in the morning.
- B. Its location and time remain constant.
- C. It is facilitated by the team lead.
- D. Its purpose is to inspect progress toward the Sprint Goal and adapt the Sprint Backlog.
- E. It is free form and designed to promote conversation.
- F. It consists of the Scrum Master asking the team for status.

Answer: B,D

Explanation:

Scrum

the Daily Scrum is a 15-minute event for the Developers of the Scrum Team that is held at the same time and place every working day of the Sprint. The purpose of the Daily Scrum is to inspect progress toward the Sprint Goal and adapt the Sprint Backlog as necessary, adjusting the upcoming planned work¹. The other options are not characteristics of the Daily Scrum, as it is not facilitated by the team lead, it does not consist of the Scrum Master asking the team for status, it is not held first thing in the morning, and it is not free form and designed to promote conversation²³⁴.
