Which objects should you use? To answer, drag the appropriate objects to the correct permissions. Each object may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

### **Answer:**

Explanation:

Explanation:

### **NEW QUESTION # 106**

A company plans to use warehouse management and dock appointment scheduling in Dynamics 365 for Finance and Operations.

You need to configure the system.

Which configuration options should you use? To answer, drag the appropriate configuration options to the correct requirements.

Each configuration option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

### **Answer:**

Explanation:

### **NEW QUESTION # 107**

A company uses Dynamics 365 Supply Chain Management. The company has multiple shrink wrap machines on the shipping dock. An older shrink wrap machine has a unique vibration. The older machine must be inspected frequently and measured against the vibration and performance of other machines.

You need to configure the following requirements for the aging shrink wrap machine:

- \* Inspect the older machine frequently.
- \* Measure results against other machines.

What should you configure for each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

### **Answer:**

Explanation:

Explanation:

### **NEW QUESTION # 108**

You need to configure the products in Dynamics 365 Supply Chain Management for the requirements.

Which system objects should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### **Answer:**

Explanation:

Explanation:

Box 1: Product dimension

There are five product dimensions: color, configuration, size, style, and version.

Box 2: Product variant

Product variants are also referred to as items. An item is a tangible product, which isn't the same as a service.

A product variant can be generated based on the product dimension values.

Example

A company sells denim jeans. The item, Jeans, uses the color and size product dimensions. The jeans are sold in three different colors and six different sizes. The colors are blue, black, and brown. The sizes are XS, S, M, L, XL, and XXL. Not all sizes are available in all three colors. If all combinations were available, there would be 18 different types of jeans. However, in this example, only the following nine product variant combinations are produced.

Table Description automatically generated

Box 3: Tracking dimension

Scenario: If products in the warehouse must be blocked from transactions for a specific reason, such as a health and safety review, warehouse users should be able to block the products quickly from the ERP system
