GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q20-Q25):

NEW QUESTION # 20

For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Heating
- B. Electrolysis
- C. Lighting
- D. Turning a motor

Answer: B

Explanation:
Explanation

Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.

Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 21

Which one of the following uses sensors such as laser beams or touch sensor?

- A. CCTV

Passing the GAQM CDCS-001 certification exam is necessary for professional development, and employing real CDCS-001 Exam Dumps can assist applicants in reaching their professional goals. These actual CDCS-001 questions assist students in discovering areas in which they need improvement, boost confidence, and lower anxiety. GAQM CDCS-001 Cost Effective Dumps & CDCS-001 Reliable Braindumps Sheet

Our CDCS-001 study materials are full of useful knowledge, which can meet your requirements of improvement. Also, it just takes about twenty to thirty hours for you to do exercises of the CDCS-001 study guide. The learning time is short but efficient. You will

elevate your ability in the shortest time with the help of our CDCS-001 Preparation questions. At the same time, you will be bound to pass the exam and achieve the shining CDCS-001 certification which will help you get a better career.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q21-Q26):

NEW QUESTION # 21

Which of the following processes requires direct current (DC) and cannot function with alternating current (AC)?

- A. Heating
- B. Lighting
- C. Electrolysis
- D. Turning a motor

Answer: C

NEW QUESTION # 22

A _____ generator system is a combination of an electrical generator and a mechanical engine mounted together to form a single piece of equipment.

- A. active
- B. software
- C. passive
- D. standby

Answer: D

Explanation:

Explanation

A Standby Generator System is a combination of an electrical generator and a mechanical engine mounted together to form a single piece of equipment. The generator provides power to essential appliances and equipment in the event of a power outage. Standby Generator Systems are usually powered by gasoline, diesel, natural gas, or propane, and they are designed to be able to be activated quickly in the event of an emergency.

NEW QUESTION # 23

Which one of the following is an advantage of Glycol Cooled System?

- A. No maintenance of glycol
- B. No additional cost is required
- C. Can be used in big data centers
- D. Glycol pipes can run long distances and can service several CRAC units

Answer: D

Explanation:

Glycol cooled systems are advantageous because they are efficient and can service large data centers with multiple racks. Furthermore, glycol pipes can run long distances, allowing a single system to service several CRAC units. This eliminates the need for multiple systems, resulting in cost savings and reduced maintenance.

NEW QUESTION # 24

Which type of Circuit Breaker uses an electromagnetic coil to pull a switch when a circuit carries too much current?

- A. Thermal
- B. Magnetic
- C. Static
- D. Pull

Answer: B

Explanation:

Magnetic circuit breakers use an electromagnetic coil to pull a switch when a circuit carries too much current, thus tripping the circuit and preventing it from exceeding its rated amperage.

NEW QUESTION # 25

_____ security means keeping unauthorized or ill-intentioned people out of places that they do not belong.

- A. Network
- **B. Physical**
- C. Logical
- D. Topological

Answer: B

Explanation:

Explanation

Physical security means keeping unauthorized or ill-intentioned people out of places that they do not belong.

This can involve a variety of measures, such as locks, alarms, access control systems, cameras, and guards.

Physical security is an important part of any security system, as it helps to protect valuable assets and personnel from theft, vandalism, and other malicious activities.
