## Qlik Sense System Administrator Certification Exam - 2022 Sample Questions (Q138-Q143):

### NEW QUESTION # 138

Which steps are involved in planning the infrastructure for a multi-node Qlik Sense deployment?  
(Select two)

- A. Set up load balancing between nodes.
- B. Assign a separate domain controller for each node.
- C. Configure a dedicated firewall for each node.
- D. Use shared persistence for all nodes.

Answer: A,D

### NEW QUESTION # 139

In a Qlik Sense environment a poor performance has been reported. Users are losing connectivity and are able to access only after many attempts. When accessing, there is an excessive delay when navigating and performing filters.

In conjunction with the IT area, they gather the following information:

the network is stable, Qlik Sense is installed on a virtual machine with high end CPUs, the number of users has not increased, the data model has not changed. The number and size of applications have increased over time.

What tools can be used to diagnose the problem?

- A. Process Explorer from Sysinternals. Windows Task Manager, Windows Event Viewer, and the Operations Monitor app
- **B. Wireshark, Disk Usage from Sysinternals, Windows Task Manager, and the Operations Monitor app**
- C. Windows Task Manager. Windows Event Viewer. Windows Explorer, and Process Monitor from Sysinternals
- D. Governance Dashboard, ipconfig, tracert. Wireshark, and the System Monitor app

**Answer: B**

### NEW QUESTION # 140

The system administrator creates a connection to PostgreSQL through windows 64-bit ODBC as System DSN. When you set up the ODBC connection on Qlik Sense Server, you notice that it does not appear. What's causing the problem?

- A. The 64-bit option on the connection was not selected
- **B. The appropriate ODBC driver has not been installed**
- C. The user and password of the ODBC connection has not been entered
- D. OLE DB connection not created required

**Answer: B**

### NEW QUESTION # 141

A company has Qlik Sense streams based on departments. Users must NOT be able to access apps from streams of other departments. A user has recently moved from Sales to Marketing. The domain administrator correctly updates the user's group membership in Active Directory.

How should the system administrator confirm that the user can NO longer access the apps in the Sales stream?

- A. In the QMC, from the Start menu, select Users Highlight the user's name, click Edit, and then select User Access and view the audit
- B. In the QMC, from the Start menu, select Streams Highlight Marketing, click Edit, and then select User Access and view the audit
- C. In the QMC, from the Start menu, select Users Highlight the user's name, click Edit, and then select Owned items and view the audit
- **D. In the QMC, from the Start menu, select Streams Highlight Sales, click Edit, and then select User Access and view the audit**

**Answer: D**

### NEW QUESTION # 142

A user who can typically create new apps in personal work can no longer create new applications. The user's work stream is no longer displayed. How can this problem be fixed?

Response:

- A. In the QMC, in the License Management tab, check if there is a Professional license asweled for this user
- B. In the QMC, in the License Management tab, check if there is an Analyzer license asweled for this user
- C. In QMC, in the users tab, make sure it has the ContentAdmin rule
- **D. In the QMC, in the Audit tab, check for any rules that are preventing this user**

**Answer: D**

### NEW QUESTION # 143
