

## Answers 300-445 Free, 300-445 Pdf Braindumps

DOWNLOAD the newest TestKingFree 300-445 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1Q4Wi\\_AfnuG26fIL2qJtue5UHJ9A-5evO](https://drive.google.com/open?id=1Q4Wi_AfnuG26fIL2qJtue5UHJ9A-5evO)

The TestKingFree wants to win the trust of Cisco 300-445 exam candidates at any cost. To fulfill this objective the TestKingFree is offering top-rated and real 300-445 exam practice test in three different formats. These 300-445 exam question formats are PDF dumps, web-based practice test software, and web-based practice test software. All these three 300-445 Exam Question formats contain the real, updated, and error-free 300-445 exam practice test.

### Cisco 300-445 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                       |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>Insights and Alerts: This domain addresses configuring alert rules based on network conditions and end-user experience factors. It covers selecting metrics for stakeholders, validating alerts, and recommending network optimization for capacity planning.</li></ul> |
|         |                                                                                                                                                                                                                                                                                                               |

|         |                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 2 | <ul style="list-style-type: none"> <li>• <b>Platforms and Architecture:</b> This domain covers understanding monitoring agent types and placement, active versus passive monitoring, and ThousandEyes WAN Insights. It addresses Cisco platform integrations, metric baselines, and selecting appropriate integration methods and assurance platforms based on business requirements.</li> </ul> |
| Topic 3 | <ul style="list-style-type: none"> <li>• <b>Data Collection Implementation:</b> This domain focuses on deploying enterprise and endpoint agents across infrastructure and end-user devices. It covers configuring network, DNS, voice, web, and endpoint tests using ThousandEyes and Meraki Insights, along with implementing synthetic web tests and authentication methods.</li> </ul>        |
| Topic 4 | <ul style="list-style-type: none"> <li>• <b>Data Analysis:</b> This domain encompasses diagnosing network issues like packet loss, congestion, routing and jitter, plus end-device problems. It includes analyzing web application performance and identifying security threats such as DDoS attacks, DNS hijacking, and BGP hijacking.</li> </ul>                                               |

## 300-445 Pdf Braindumps, 300-445 Valid Vce Dumps

All these three Designing and Implementing Enterprise Network Assurance (300-445) exam questions formats offered by the TestKingFree are easy to use and perfectly work with all the latest web browsers, operating systems, and devices. The TestKingFree 300-445 web-based practice test software and desktop practice test software both are the mock Cisco 300-445 Exam that will give you real-time Designing and Implementing Enterprise Network Assurance (300-445) exam environment for quick preparation.

## Cisco Designing and Implementing Enterprise Network Assurance Sample Questions (Q67-Q72):

### NEW QUESTION # 67

When selecting a Cisco network assurance platform, what factor should be prioritized for efficient network troubleshooting?

- A. Customer testimonials
- B. Network aesthetics
- C. Historical data storage
- **D. Alerting mechanisms**

**Answer: D**

Explanation:

Prioritizing alerting mechanisms is crucial when selecting a Cisco network assurance platform for efficient network troubleshooting and issue resolution.

### NEW QUESTION # 68

What is the purpose of synthetic web tests in network assurance?

- A. Monitoring server hardware performance
- B. Detecting cybersecurity threats
- **C. Simulating user interactions with web applications**
- D. Analyzing network infrastructure

**Answer: C**

Explanation:

Synthetic web tests are used to simulate user interactions with web applications, allowing network administrators to proactively monitor and evaluate web application performance and responsiveness from various locations.

### NEW QUESTION # 69

In network assurance, what is the purpose of a local collection agent?

- A. Conducting remote diagnostics
- B. Analyzing global network trends
- C. Managing cloud-based applications
- **D. Gathering data from nearby devices**

**Answer: D**

Explanation:

The purpose of a local collection agent is to gather data from nearby devices within the same network segment, enabling detailed monitoring and analysis of local traffic patterns.

### NEW QUESTION # 70

What is the primary objective of setting a metric baseline in network performance analysis?

- A. Analyzing network traffic patterns
- **B. Establishing performance benchmarks**
- C. Collecting historical data
- D. Defining alert thresholds

**Answer: B**

Explanation:

The primary objective of setting a metric baseline is to establish performance benchmarks for comparison and evaluation.

### NEW QUESTION # 71

A CPU utilization alert for Endpoint Agents is triggering too frequently, creating alert noise. Which of the following steps would help reduce the sensitivity of the alert rule? (Select two)

- **A. Increase the number of agents that must exceed the CPU threshold to trigger the alert**
- **B. Adjust the alert rule to require more rounds of data to exceed the threshold**
- C. Enable the alert rule on more Endpoint Agents
- D. Lower the CPU utilization percentage in the alert condition

**Answer: A,B**

Explanation:

Alert fatigue is a major operational challenge in network assurance. To make a CPU utilization alert for Endpoint Agents less sensitive and reduce "noise," an engineer must implement statistical filters that ignore transient spikes or isolated events.

The two most effective methods are:

\* Increase the agent count (Option A): By requiring a higher number or percentage of agents to simultaneously exceed the threshold, the system ensures the alert represents a widespread environmental issue rather than a single user running a CPU-intensive background process.

\* Require more rounds of data (Option C): Instead of alerting on a single measurement (1 of 1 round), the engineer can configure the rule to require the threshold to be breached for multiple consecutive checks (e.g., 2 of 3 rounds). This filters out brief, non-impactful CPU spikes that occur naturally during OS updates or browser startups.

Other options would have the opposite effect:

\* Option B: Lowering the percentage threshold (e.g., from 90% to 50%) would cause the alert to trigger much more frequently, increasing noise.

\* Option D: Enabling the alert on more agents increases the pool of potential triggers, which typically leads to more notifications unless the logic in Option A is also applied.

### NEW QUESTION # 72

.....

The Cisco 300-445 Exam registration fee varies between 100 usd and 1000 usd, and a candidate cannot risk wasting his time and

P.S. Free 2026 Cisco 300-445 dumps are available on Google Drive shared by TestKingFree: [https://drive.google.com/open?id=1O4Wi\\_AfmG26f1L2qJtue5UHJ9A-5evO](https://drive.google.com/open?id=1O4Wi_AfmG26f1L2qJtue5UHJ9A-5evO)
