最優質的Salesforce Manufacturing-Cloud-Professional: Manufacturing Cloud Accredited Professional Exam熱門考古題 - 有用的VCESoft Manufacturing-Cloud-Professional考古題更新

VCESoft始終致力於為客戶提供高品質的學習資料，來提高考生一次性通過Salesforce Manufacturing-Cloud-Professional考試的概率，這是考生獲取認證最佳捷徑。我們的Manufacturing-Cloud-Professional認證PDF和軟件版本具有最新更新的問題解答，涵蓋了所有考試題目和課題大綱，在線測試引擎測試可以幫助您準備并熟悉實際考試情況。在您決定購買我們產品之前，您可以先免費嘗試Salesforce Manufacturing-Cloud-Professional PDF版本的DEMO，此外，我們還提供全天24/7的在線支持，以便為客戶提供最好的便利服務。

最新的 Accredited Professional Manufacturing-Cloud-Professional 免費考試真題 (Q64-Q69):

問題 #64

Universal Containers has multiple active Sales Agreements for the current quarter of their top tier Customer.

Each agreement contains Product A.

Via manual API upload, a new order containing Product A comes in for the current quarter. Which Sales Agreement will this new order be linked to?

- A. The Sales Agreement that was selected by custom logic will be linked to the order.
- B. The Sales Agreement that was activated last will be linked to the order.
- C. The Sales Agreement that was activated first will be linked to the order.
- D. The Sales Agreement can only be linked manually to the order.

答案： A

解題說明：

Explanation

When multiple active sales agreements exist for the same product and account, the order can be linked to the sales agreement based on custom logic defined by the admin. The custom logic can use any field on the sales agreement or the order to determine the match. For example, the custom logic can use the start and end dates of the sales agreement, the order date, the product category, or any other criteria. This way, the order can be linked to the most relevant sales agreement for the account and product.

問題 #65

An organization wants to provide flexibility to account managers and partner users concerning managing sales agreements. The organization has observed several requests from account managers to remove sales agreements they have inadvertently created and would like the account managers to do this themselves.

What should the organization do to accomplish this?

- A. Give them the Delete Sales Agreements permission
- B. Give them the Delete Sales Agreements profile
- C. Give them the Remove Sales Agreement permission

答案： A

解題說明：

To delete a sales agreement, the user must have the Delete Sales Agreements permission, which is included in the Manufacturing Sales Agreement Manager permission set. This permission allows the user to delete an active, approved, canceled, or expired sales agreement, as long as it does not have any active orders associated with it. Giving the user the Delete Sales Agreements profile or the Remove Sales Agreement permission will not enable them to delete sales agreements, as these are not valid options in Salesforce Manufacturing Cloud. References: Delete a Sales Agreement, Assign the Manufacturing Permission Sets to Users.

問題 #66

An organization does not have Account Forecasting Model set up. Based on the analysis it has done, the organization has agreed to set up Account Forecasting from 1 Jan 2024 for a period of 18 months. The current period is Feb 2024.

Which values will need to be set up for the start period?

- A. 2
- B. 0
- C. 18
- D. 1
- E. 2

答案： D

解題說明：

The start period is the number of periods before or after the current period that the forecast generation starts from.

To generate forecasts from a future period, a positive start period offset is required.

Since the current period is Feb 2024 and the organization wants to start forecasting from Jan 2024, the start period offset is 2 (Jan 2024 is two periods before Feb 2024).

The other options are incorrect because they do not match the desired start period for the organization.

問題 #67

Universal Containers (UC) has been in the manufacturing industry for many years. The industry has become much more volatile over the years. UC is looking to implement Manufacturing Cloud to manage this volatility.

Which specific business challenge does the implementation of Manufacturing Cloud tackle?

- A. Gaining visibility in businesses to improve forecast accuracy and collaborate with stakeholders
- B. Connecting stakeholders and assets for real-time collaboration in the field
- C. Connecting to potential buyers and predicting the likelihood of a sale

答案： A

解題說明：

Manufacturing Cloud is a solution that enables manufacturers to align their sales and operations teams, improve account-based forecasting, and drive business outcomes. One of the main challenges that Manufacturing Cloud addresses is the volatility of the manufacturing industry, which makes it difficult to plan and execute production and distribution efficiently. By gaining visibility into the entire value chain, manufacturers can improve their forecast accuracy, collaborate with their stakeholders, and respond to changing customer needs and market conditions. 問題 #68

When is an appropriate time to generate the detailed technical design document when implementing Manufacturing Cloud?

- A. The detailed technical design document should be ready before engaging the business users to gather requirements.
- B. The detailed technical design document should be completed after an organization goes live with Manufacturing Cloud.
- C. The detailed technical design document is completed after the business requirement document has been generated.

答案： C

解題說明：

Explanation

The detailed technical design document is a document that describes the technical specifications and requirements for implementing Manufacturing Cloud. It is based on the business requirement document, which is a document that captures the business needs and goals of the customer. The detailed technical design document is completed after the business requirement document has been generated, because it requires a clear understanding of the customer's business processes, pain points, and desired outcomes. The detailed technical design document should include the following information:

- * The scope and objectives of the project
 - * The data model and architecture of Manufacturing Cloud
 - * The integration strategy and design with other systems
 - * The customization and configuration of Manufacturing Cloud features and functionality
 - * The security and access control requirements
 - * The testing and deployment plan
 - * The change management and training plan
