The AWS Certified Developer Associate Exam (DVA-C02) certification exam covers a wide range of topics related to AWS development, including AWS core services, database technologies, messaging services, and application deployment. AWS-Developer Exam also includes questions on developing and maintaining AWS-based applications, including best practices for security, performance, and cost optimization. Candidates must be able to demonstrate their ability to use AWS services to design, develop, and deploy applications that meet customer requirements.

Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q72-Q77):

NEW QUESTION # 72

A developer wants to secure sensitive configuration data such as passwords, database strings, and application license codes. Access to this sensitive information must be tracked for future audit purposes.

- A. In the Amazon EC2 Systems Manager Parameter Store; grant the application access with IAM
- B. As an object in an Amazon S3 bucket, grant on Amazon EC2 instance access with an IAM role.
- C. In an encrypted file on the source code bundle; grant the application access with Amazon IAM

- D. On an Amazon EBS encrypted volume attach the volume to an Amazon EC2 instance to access the data

Answer: A

NEW QUESTION # 73

A user has configured ELB with two instances running in separate AZs of the same region? Which of the below mentioned statements is true?

- A. Multi AZ instances will provide HA with ELB
- B. The user can achieve both HA and scalability with ELB
- C. Multi AZ instances are not possible with a single ELB
- D. Multi AZ instances will provide scalability with ELB

Answer: A

Explanation:

If a user is running two instances in separate AZs, it will provide HA with ELB since ELB will automatically stop routing the traffic to unhealthy instances and send it to healthy instances only.

NEW QUESTION # 74

In AWS Elastic Beanstalk, if the application returns any response other than 200 ,OK or there is no response within the configured InactivityTimeout period, _____.

- A. SQS sends a message to the application with the MessageID and pending status
- B. SQS waits for another timeout
- C. SQS once again makes the message visible in the queue and available for another attempt at processing
- D. SQS run DeleteMessagecall and deletes the message from the queue

Answer: C

Explanation:

In AWS Elastic Beanstalk, if the application returns any response other than 200, OK or there is no response within the configured InactivityTimeout period, SQS once again makes the message visible in the queue and available for another attempt at processing.

<http://docs.aws.amazon.com/elasticbeanstalk/latest/dg/using-features-managing-env-tiers.html#worker-environ>

NEW QUESTION # 75

What is required to trace Lambda-based applications with AWS X-Ray?

- A. Use an IAM execution role to give the Lambda function permissions and enabled tracing.
- B. Trigger a Lambda function from the application logs in Amazon CloudWatch to submit tracing data to AWS X-Ray
- C. Send logs from the Lambda application to an S3 bucket trigger a Lambda function from that bucket to send data to AWS X-Ray.
- D. Update and add AWS X-ray daemon code to relevant parts of the Lambda function to set up the trace.

Answer: D

NEW QUESTION # 76

An organization has hosted an application on the EC2 instances. There will be multiple users connecting to the instance for setup and configuration of application. The organization is planning to implement certain security best practices. Which of the below mentioned pointers will not help the organization achieve better security arrangement?

- A. Allow only IAM users to connect with the EC2 instances with their own secret access key.

- B. Disable the password based login for all the users. All the users should use their own keys to connect with the instance securely.
- C. Create a procedure to revoke the access rights of the individual user when they are not required to connect to EC2 instance anymore for the purpose of application configuration.
- D. Apply the latest patch of OS and always keep it updated.

Explanation:

Always keep the OS updated with the latest patch
