Reliable FCP_FMG_AD-7.6 Test Preparation - Reliable FCP_FMG_AD-7.6 Test Camp

We provide several sets of FCP_FMG_AD-7.6 test torrent with complicated knowledge simplified and with the study content easy to master, thus limiting your precious time but gaining more important knowledge. Our FCP_FMG_AD-7.6 guide torrent is equipped with time-keeping and simulation test functions, it's of great use to set up a time keeper to help adjust the speed and stay alert to improve efficiency. Our expert team has designed a high efficient training process that you only need 20-30 hours to prepare the FCP_FMG_AD-7.6 Exam with our FCP_FMG_AD-7.6 certification training.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q73-Q78):

NEW QUESTION # 73
You are moving managed FortiGate devices from one ADOM to a new ADOM.
Which statement correctly describes the expected result?

- A. Any unused objects from a previous ADOM are moved to the new ADOM automatically.
- B. Policy packages will be imported into the new ADOM automatically.
- C. The shared device settings will be installed automatically.
- D. The shared policy package will not be moved to the new ADOM automatically.

Answer: D

Explanation:
When you move devices from one ADOM to another ADOM, shared policy packages and objects do not move to the new ADOM. You will need to import policy packages from managed devices.

NEW QUESTION # 74
Which two items does an FGFM keepalive message include? (Choose two.)

- A. FortiGate configuration checksum
- B. FortiGate IPS version
- C. FortiGate uptime
- D. FortiGate license information

Answer: A,B

Explanation:
Keepalive messages, including the configuration checksums, are sent from FortiGate at configured intervals.
The messages also show the intrusion prevention system (IPS) version of the FortiGate device.

NEW QUESTION # 75
An administrator is copying a system template profile between ADOMs by running the following command:
execute fmprofile export-profile ADOM 3547 /tmp/Backup_File
output dump to file: [/tmp/Backup_File]
Where does this command export the system template profile from?

- A. FortiManager /tmp/Backup_File folder
- B. FortiManager configuration backup file
- C. ADOM device database
- D. FortiManager ADOM policy database

Answer: D

Explanation:
The command exports the system template profile from the FortiManager ADOM policy database, which stores the configuration templates for devices within that ADOM.

NEW QUESTION # 76
Which two statements about the integrity of databases on FortiManager are correct? (Choose two.)

- A. The diagnose dvm check-integrity command attempts to fix a corrupted file system.
- B. You should fix all database integrity issues before performing a script.
- C. The diagnose cdb check adom-integrity command can correct issues related to locked devices.
- D. Not following the correct upgrade path may cause inconsistencies in the databases.
- E. Scheduled backups run database integrity commands automatically.

Answer: D,E

Explanation:
When FortiManager performs scheduled backups, it automatically runs database integrity checks to help ensure the consistency and reliability of the database.
Skipping required upgrade steps or using an incorrect upgrade path can lead to database schema mismatches or corruption in FortiManager.

NEW QUESTION # 77
You want to let multiple administrators work in the same ADOM without creating configuration conflicts.
What is the best and the most effective solution to apply?

- A. Assign administrators with JSON API access to the FortiManager.
- B. Configure RADIUS authentication to assign ADOM roles to each user.
- C. Enable workflow mode, which is the only way to prevent concurrent configuration conflicts.
- D. Activate workspace mode in the ADOM settings.

Answer: D

Explanation:
Activating workspace mode in the ADOM settings allows multiple administrators to work concurrently in the same ADOM by isolating their configuration changes in separate workspaces, preventing conflicts and enabling effective collaboration.
