

Reliable PRINCE2 Practitioner Study Plan & Latest PRINCE2 Practitioner Exam Bootcamp

STUDY PLAN

Joobin Ordbobody

Your overall educational and career goals, and how studies in Canada will help you to achieve them?

I've studied various topics in different field of business & management. The more I studied, the more I faced the priority of research in strategy & human resources for Iran's micro-economic conditions to change. consequently, several questions started to grow on my mind, urging me to continue education.

In this regard, I've published two papers so far: one about the effect of training on commitment which I later continued for my master's thesis, & the other about perceptions of working in Iran. I'm considering a study on the influences of the latter (work perceptions) on strategy implementation process as an interesting probable topic for my doctoral thesis.

Furthermore, I've planned to continue research after my PhD graduation on similar subjects, as a faculty member in Iranian universities, or as a researcher at Central Insurance of Iran Research Center. University of Tehran often welcomes its former students & with a good academic background, my chances will be very high there. Also with my master's degree in insurance, my previous research experiences on Iranian insurance sector (as case) & my sister's tenure in Central Insurance of Iran, I'm almost certain about my employment chances in this industry that is growing & hence gradually welcoming strategic & human resource management solutions.

Attention: My answer to " ...how studies in Canada will help you to achieve them" is the same as the one provided below for " Why you wish to go to Canada to study at the school...".

Why you wish to go to Canada to study at the school and in the program for which you have been accepted?

After two years of study in one of the best universities in Iran, I believe that management faculty in my hometown do not appreciate principles of scientific method (hence lack creditable research & publication, & cannot respond to scientific demand of students) & sometimes mix religious views with their academic judgment. Therefore, witnessing several talented students misled by ineffective education & suffering from limited research support by universities, I decided not to share the experience.

I focused my PhD applications on US & Canada, for their accepted cultural & ethnic diversity, course offerings at PhD level (which I really need at this transitional period) & outstanding educational systems. Among three places where I was admitted, UVic was (by academic stance) my second choice, with the top choice, Texas A&M, lacking funding options & faculty members sharing my research interests, despite its higher expenses.

On the other hand, UVic which is reported among 1% of educational institutions in the world, hosts Gustavson School of Business as one of the most accredited & innovative business schools in Canada. Also faculty at this school share research interests with me. Finally, accompanied with the experience of observing culture & business in a different country (which I view as vital for a business student), study in a management program with a focus on strategy & culture in an international context exactly matches my learning objectives.

PRINCE2 Practitioner exam consists of two parts: a multiple-choice test and a scenario-based exam. The multiple-choice test consists of 68 questions, and you will have two and a half hours to complete it. The scenario-based exam consists of eight questions, and you will have two and a half hours to complete it. The scenario-based exam is designed to test your ability to apply the PRINCE2 methodology to real-life project scenarios, and you will be required to produce a range of project management documents, such as a project initiation document, project plan, and risk management plan.

From the point of view of all the candidates, our PRINCE2Practitioner training quiz give full consideration to this problem. And we can claim that if you study our PRINCE2Practitioner study materials for 20 to 30 hours, you can pass the exam for sure.

PRINCE2 Practitioner Exam Sample Questions (Q112-Q117):

NEW QUESTION # 112

Which is a correctly defined acceptance criterion for the service level agreement (SLA) with the selected service provider?

- A. Any changes to the SLA must be managed through formal change control.
- B. The selected service provider should be located locally.
- **C. The SLA must extend for the full duration of the service contract.**
- D. External consultants are to assist in the creation of the SLA.

Answer: C

NEW QUESTION # 113

Additional Information

Extract from the Communication Management Strategy.

The project information in the table below is true, but it may not be recorded under the correct heading or be in the correct document.

Using the Project Scenario, select the appropriate response to each of the following 5 questions which have been raised by the Project Board.

The project is now at the end of the initiation stage. Having decided that the Calendar project is a relatively simple project, the Project Manager combined the Starting Up a Project process and the Initiating a Project process. No Project Brief has been produced. Instead the Project Manager used the project mandate to produce a simple Project Initiation Documentation (PID). The PID includes the Business Case, a product checklist and several Product Descriptions, Including the Project Product Description. Short sections are also included for each of the strategies and the controls to be applied. The Project Manager has elected to use the Daily Log to record all risks, issues, lessons and quality results.

After the initiation stage there will be two further stages during which a small number of Work Packages will be authorized. While these are being managed, the Project Manager will hold regular checkpoints, which will support the production of weekly Highlight Reports to the Project Board.

This question provides a number of changes which may or may not be required to the Extract from the Communication Management Strategy provided in the additional information.

Which statement applies to the Information needs for each interested party section?

- A. Delete entry 13 because the activity to provide the weekly updates should be scheduled in the relevant Stage Plan.
- **B. Delete entry 14 because this relates to the development of a particular product and should be recorded under Development interfaces within the relevant Work Package.**
- C. Move entry 13 to Tools and techniques because it describes the method to be used to communicate to the individual producing the staff newsletter.

Answer: B

NEW QUESTION # 114

Which of the following statements is true of the business interest on the project?

- A. Ensures the requirements for the project are defined
- **B. Ensures the project provides value for money**
- C. Represents the users of the product
- D. Ensures the products produced meet the desired quality

Answer: B

NEW QUESTION # 115

Scenario

A central government department, the Ministry of Food Hygiene (MFH), faces increasing pressure to cut costs, better manage suppliers' performance and reduce the confusion caused by inadequate internal controls, outdated standards and outdated technology. External consultants were employed to conduct a feasibility study to identify options to address the problems, and the likely costs and benefits. The following options were considered:

Do nothing.

Re-engineer selected business functions.

Outsource selected business functions.

The feasibility study concluded that there was a case for outsourcing the MFH Information Technology Division and the Facilities Division (maintenance of buildings and grounds). The recommendations were:

One service provider should be contracted to provide the services currently provided by the Information Technology Division and the Facilities Division.

A 10-year service contract should be agreed with the selected service provider.

The feasibility study developed high-level designs of the current organization, processes, systems and operating models, plus an outline Business Case for the required project. The external consultants also made the following recommendations for the management of the project:

Use PRINCE2.

Set up the project with 4 management stages:

Stage 1. Standard PRINCE2 initiation activities.

Stage 2. Create detailed designs (future organization, processes, systems and operating models) and the service level agreement between MFH and the future service provider.

Stage 3. Request and evaluate proposals, select service provider and agree contract.

Stage 4. Transfer equipment and staff, transfer responsibility for service provision and run trial period.

Initial estimates indicated that the project would cost £2.5m and take two years to complete.

MFH senior management agreed that there was a case for outsourcing, and accepted the recommendations as a basis for the project. There is an expected saving of £20m over 10 years.

The Outsourcing project has completed the Starting up a Project process and is now in the initiation stage.

Because of the strategic importance of the project, the MFH Chief Executive Officer has taken the role of Executive. A PRINCE2-experienced Project Manager has been appointed from within MFH. Staff within the business functions being outsourced will work with the external consultants who conducted the feasibility study to define the detailed designs.

Which 2 statements should be recorded under the Timescale heading?

- A. The contract with the selected service provider will be agreed during stage 3.
- B. If more MFH divisions are added to the scope of the services to be outsourced, the project timescale will be extended and the realization of benefits will be delayed.
- C. The expected benefits should start to be realized as soon as the outsourced services become operational at the end of stage 4.
- D. The transfer of equipment and staff is estimated to take six weeks.
- E. The expected benefits will be calculated over 10 years from completion of the project.

Answer: A,E

NEW QUESTION # 116

Additional Information

A photographer from Portraits Ltd, a professional photographic company, has taken on the role of Team Manager after taking some time to understand the requirements of the project. A contract for their services has been set up and is being monitored by the Purchasing Manager and a Work Package has been agreed. This contract specifies that the photographer must arrange a meeting with the Engineering Manager to establish a schedule for the photo sessions to minimize the impact on the Engineering staff. This meeting should have occurred by now.

The Engineering Manager was made aware of this requirement but when asked he reported that he has received no communication from the photographer. The Project Manager has tried to call the photographer and has had no response. The Project Manager believes there is a risk that Portraits Ltd are overbooking work and prioritizing other clients' work. If Portraits Ltd do not deliver on schedule the project will be delayed and the expected benefits will be reduced.

The contract is to be reviewed and Portraits Ltd reminded of their agreement.

The project is now in stage 2. The Project Manager has heard about the possibility of a competitor also producing a calendar to be delivered earlier than the target date for this project. There is a threat that the early release of a competitor's calendar may weaken the impact of the MNO Manufacturing Company calendar, thereby reducing the anticipated benefits of the Calendar project.

Column 1 contains a number of risk responses identified by the Project Manager following an assessment of this risk. Column 2 contains a list of threat response types. For each risk response in Column 1, select from Column 2 the type of response it represents. Each option from Column 2 can be used once, more than once or not at all.

Drop down the right answer.
