NEW QUESTION # 82

Within Cortex XSIAM, how does the integration of Attack Surface Management (ASM) provide a unified approach to security event management that traditional SIEMs typically lack?

- A. By offering dashboards on ASM data within the management console
- B. By manually correlating of ASM data with security events
- C. By providing a queryable dataset of ASM data for threat hunting
- **D. By enriching incidents with ASM data for all internet-facing assets**

Answer: D

Explanation:

The integration of Attack Surface Management (ASM) in Cortex XSIAM enriches incidents with ASM data for all internet-facing assets, providing a unified approach to security event management. This integration helps identify and address vulnerabilities related to external assets, offering more context and enhancing the overall security incident response. Traditional SIEMs typically lack this level of integration with external asset visibility.
