NEW QUESTION # 194

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You plan to deploy two apps named App1 and App2 to all Windows devices. App1 must be installed before App2.

From the Intune admin center, you create and deploy two Windows app (Win32) apps.

You need to ensure that App1 is installed before App2 on every device.

What should you configure?

- A. a dynamic device group
- B. a detection rule
- C. the App2 deployment configurations
- D. the App1 deployment configurations

Answer: C

Explanation:

The correct answer is D because you can configure the dependencies for a Win32 app in the deployment configurations1.
