

Latest C_ADBTP Training, Valid C_ADBTP Test Pass4sure

Once you have any questions about our C_ADBTP actual exam, you can contact our staff online or send us an email. We have a dedicated all-day online service to help you solve problems. Before purchasing, you may be confused about what kind of C_ADBTP guide questions you need. You can consult our staff online. After the consultation, your doubts will be solved and you will choose the C_ADBTP Learning Materials that suit you. Our online staff is professionally trained and they have great knowledge on the C_ADBTP exam questions to help you pass the C_ADBTP exam.

Our company is glad to provide customers with authoritative study platform. Our C_ADBTP quiz torrent was designed by a lot of experts and professors in different area in the rapid development world. At the same time, if you have any question, we can be sure that your question will be answered by our professional personal in a short time. In a word, if you choose to buy our C_ADBTP Quiz torrent, you will have the chance to enjoy the authoritative study platform provided by our company.

>> Latest C_ADBTP Training <<

Pass Guaranteed SAP - Latest C_ADBTP - Latest Administrating SAP Business Technology Platform(C_ADBTP_2601) Training

BraindumpsPrep is a website specifically provide the certification exam information sources for SAP professionals. Through many reflects from people who have purchase BraindumpsPrep's products, BraindumpsPrep is proved to be the best website to provide

the source of information about C_ADBTP Certification Exam. The product of C_ADBTP is a very reliable training tool for you. The answers of the exam exercises provided by BraindumpsPrep is very accurate. Our BraindumpsPrep's senior experts are continuing to enhance the quality of our training materials.

SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) Sample Questions (Q10-Q15):

NEW QUESTION # 10

SIMULATION

Task 2: Create Subaccounts in a Directory

In the Partner directory, create the subaccount AM PA Dev Test (Description: Partner Development and Testing) with subdomain btpops#####-am-pa-dev-test in the region Microsoft Azure → US West (WA) cf-us20.

In the Partner directory, create the subaccount AM PA Prod (Description: Partner Production) with subdomain btpops#####-am-pa-prod using AM PA Dev Test as source subaccount. Set the subaccount as used in production.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Task 2 - Create Subaccounts in a Directory

You must create these two subaccounts inside the Partner directory:

AM PA Dev Test

AM PA Prod

Important:

Replace ##### with your global account number

Enter all names and subdomains exactly

Be careful with hyphens and spaces

AM PA Prod must be marked as used in production

Before You Start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both subaccounts in this task must be created inside the Partner directory. If you create them under the global account or another directory, the task will be wrong.

Step 1 - Open the Partner Directory

What to do

In the left menu, click Directories.

In the directory list, select Partner.

Explanation:

The Partner directory is the container where both required subaccounts must be created.

What to verify

You should now be inside the Partner directory page.

Step 2 - Start Creating the First Subaccount

What to do

Inside the Partner directory, go to Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

What to verify

You should now see the form for creating a new subaccount.

Step 3 - Enter Data for AM PA Dev Test

What to do

Enter the following values:

Display Name / Name: AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops#####-am-pa-dev-test

Then choose the region:

Cloud Provider: Microsoft Azure

Region: US West (WA)

Environment / Technical Region: cf-us20

After checking all values, click Create.

Create Subaccount

Display Name * AM PA Dev Test

Description Partner Development and Testing

Region * US West (WA)

Subdomain * bt pops #####-am-pa-dev-test

Parent * Partner

> Advanced

Cockpit supports multi-level directories in your account structure. You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under Parent.

SAP

Create Cancel

Explanation:

This creates the development and testing subaccount for the Partner directory.

The important points are:

the subaccount name must match exactly

the subdomain must include your account number in place of #####

the region must be Microsoft Azure → US West (WA) cf-us20

What to verify

After creation, you should see the new subaccount:

AM PA Dev Test

inside the Partner directory.

Step 4 - Confirm the First Subaccount Exists

What to do

Check the subaccounts list under Partner.

Explanation:

Before creating the production subaccount, confirm that AM PA Dev Test was created successfully, because it will be used as the source subaccount for the next step.

What to verify

You should see:

AM PA Dev Test

If it is not there, do not continue until it is created correctly.

Name	Type	Environment	Region	Changed On
BT Admin Certification #####	Global Account			March 25, 2026, 9:11:2...
Partner	Directory			March 26, 2026, 9:27:5...
AM PA Dev Test	Subaccount	Multi-Environment	Microsoft Azure	March 25, 2026, 9:30:3...

Step 5 - Start Creating the Second Subaccount

What to do

Still inside the Partner directory, click Create → Subaccount again.

Explanation:

This opens a new subaccount creation form for the production subaccount.

Step 6 - Enter Data for AM PA Prod

What to do

Enter the following values:

Display Name / Name: AM PA Prod

Description: Partner Production

Subdomain: bt pops #####-am-pa-prod

Then set:

Source Subaccount: AM PA Dev Test

Enable the production setting:

Used in Production: Yes

Then click Create.

Explanation:

This creates the production subaccount by using AM PA Dev Test as the source subaccount.

Using a source subaccount means SAP BTP copies base settings from the selected source, which helps keep configuration aligned.

The production indicator is mandatory here because this is the production subaccount.

What to verify

After creation, you should see:

AM PA Prod

inside the Partner directory, and it should be marked as a production subaccount.

Final Expected Result for Task 2

Inside the Partner directory, you must have these two subaccounts:

1. AM PA Dev Test

Description: Partner Development and Testing

Subdomain: btpops#####-am-pa-dev-test

Region: Microsoft Azure → US West (WA) cf-us20

2. AM PA Prod

Description: Partner Production

Subdomain: btpops#####-am-pa-prod

Source Subaccount: AM PA Dev Test

Used in Production: Yes

Name	Type	Environment	Region	Created On	Collaborate On
AM PA Dev Test	Global Account	Microsoft Azure	US West (WA)	March 26, 2020, 9:27:10	
AM PA Prod	Global Account	Microsoft Azure	US West (WA)	March 26, 2020, 9:28:29	

Common Mistakes to Avoid

1. Creating the subaccounts in the wrong place

Both subaccounts must be created in:

Partner directory

Not in:

Global Account

Americas

Eurasia

Human Resources

2. Wrong subdomain format

Use exactly:

btpops#####-am-pa-dev-test

btpops#####-am-pa-prod

Replace only ##### with your global account number.

Do not:

remove hyphens

add spaces

misspell dev-test or pa-prod

3. Wrong region for AM PA Dev Test

It must be:

Microsoft Azure

US West (WA)

cf-us20

4. Forgetting the source subaccount for AM PA Prod

You must select:

AM PA Dev Test

as the source subaccount.

5. Forgetting the production flag

For AM PA Prod, make sure:

Used in Production is enabled

NEW QUESTION # 11

SIMULATION

Create a Service Instance in Cloud Foundry

Enable a service instance of the HTML5 Application Repository Service for Cloud Foundry.

Create a Service Instance in a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, create the service instance html5-eu-hcm-dev for the HTML5 Application Repository Service with the service plan app-host in the Cloud Foundry space activity-recording

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed in EU HCM Dev, and the service instance must be created in the specific Cloud Foundry space activity-recording. SAP Help also confirms that the HTML5 Application Repository is used in the Cloud Foundry environment and that the app-host plan is the host service used to store HTML5 application content.

Step 1 - Open the Cloud Foundry space

In EU HCM Dev, go to:

Cloud Foundry

Spaces

Select the space:

activity-recording

SAP Help describes creating Cloud Foundry service instances by first navigating to the subaccount, opening Cloud Foundry Spaces, selecting the target space, and then using that space's Services > Service Instances area.

Step 2 - Open Service Instances in the space

Inside the activity-recording space, go to:

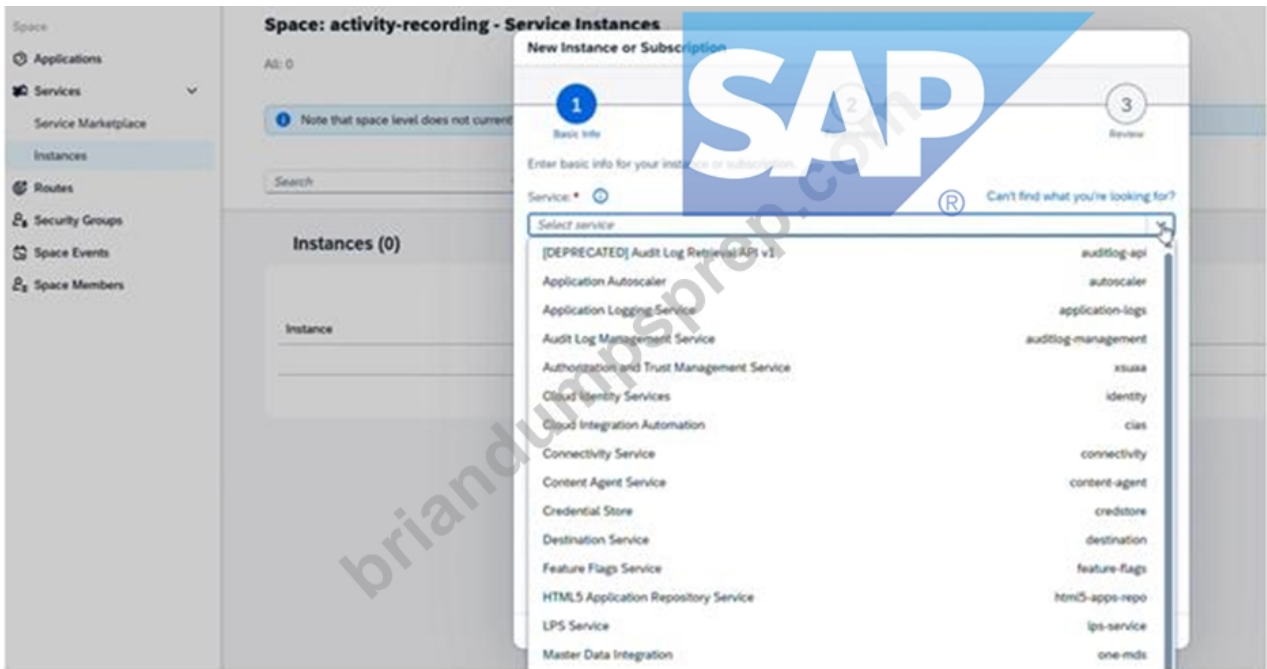

Services

Service Instances

This is the Cloud Foundry-space-level location used for creating service instances in that space.

Step 3 - Start creating the new instance

Click Create.

A wizard opens for the new service instance. SAP Help describes this as the standard cockpit flow for creating service instances in Cloud Foundry spaces.

Step 4 - Choose the required service

In the service selection, choose:

HTML5 Application Repository Service

SAP Help documents the HTML5 Application Repository as the service used for centrally storing HTML5 applications' static content on SAP BTP in the Cloud Foundry environment.

New Instance or Subscription

1 Basic Info 2 Parameters 3 Review

Enter basic info for your instance or subscription.

Service: * Can't find what you're looking for?
HTML5 Application Repository Service

Plan: *
app-host

Instance Name: *
html5-eu-hcm-dev

Next > **Create** Cancel

Step 5 - Choose the required service plan

Select the service plan:

app-host

SAP Help states that the app-host service plan is used to deploy applications to the HTML5 Application Repository.

Step 6 - Enter the instance name

Set the service instance name to:

html5-eu-hcm-dev

Then continue and confirm creation.

SAP Help recommends using a CLI-friendly name for service instances, and the task gives the exact required name.

Space: activity-recording - Service Instances Create | v | ☆

All: 1

Note that space level does not currently support local management, instance sharing, or the display of "created by" and "modified by" information.

Service: HTML5 Application Repository Service Plan: app-host Status: Created

Instance	Service	Plan	Credentials	Status	
html5-eu-hcm-dev	HTML5 Application Repository Service	app-host		Created	⋮ >

Step 7 - Verify the space is correct

Before final confirmation, verify the target Cloud Foundry space is:

activity-recording

This is important because Cloud Foundry service instances are created within a specific space, not only at the subaccount level.

Step 8 - Create and confirm

Click Create or Finish.

Wait for the status to change from in-progress to created.

SAP Help notes that after creation, the instance appears in the service instances table and its status can be checked there.

Final expected result

Inside EU HCM Dev, in Cloud Foundry space activity-recording, you should have a service instance with:

Service: HTML5 Application Repository Service

Plan: app-host

Instance Name: html5-eu-hcm-dev

Common mistakes to avoid

Creating the instance in the wrong subaccount; it must be EU HCM Dev.

Creating it in the wrong Cloud Foundry space; it must be activity-recording.

Choosing the wrong service; use HTML5 Application Repository Service.

Choosing the wrong plan; use app-host. SAP Help specifically links app-host with hosting deployed HTML5 app content.

Typing the wrong instance name; use exactly html5-eu-hcm-dev.

Name	Type	Environment	Provider	Region	Labels	Changed On
BTP Admin Cockpit	Global Account					March 25, 2026, 9:11:2...

NEW QUESTION # 12

SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

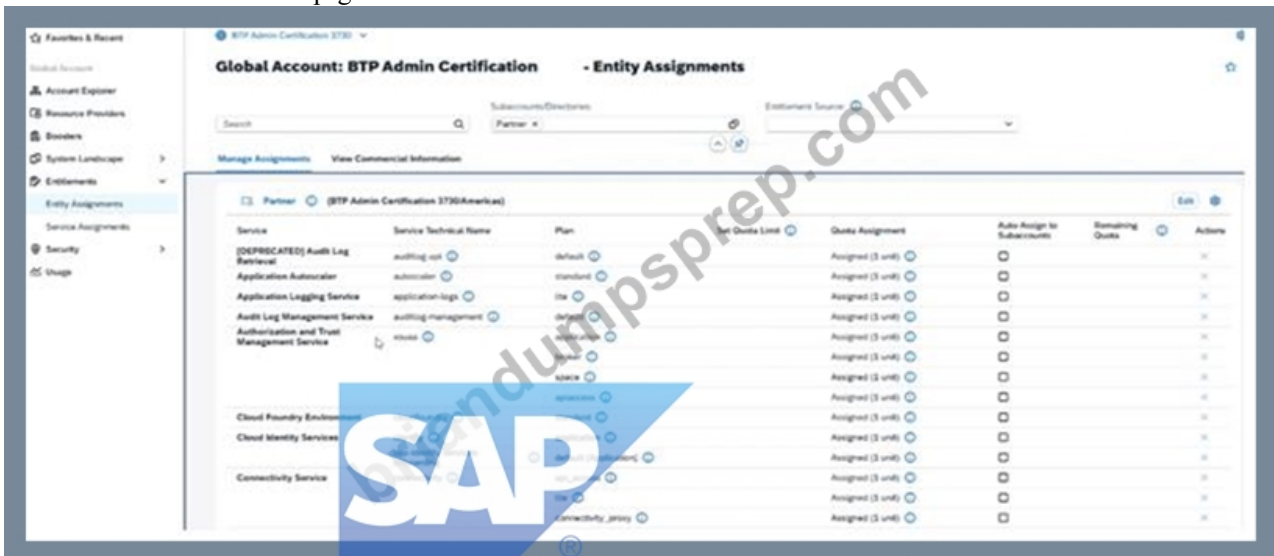

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

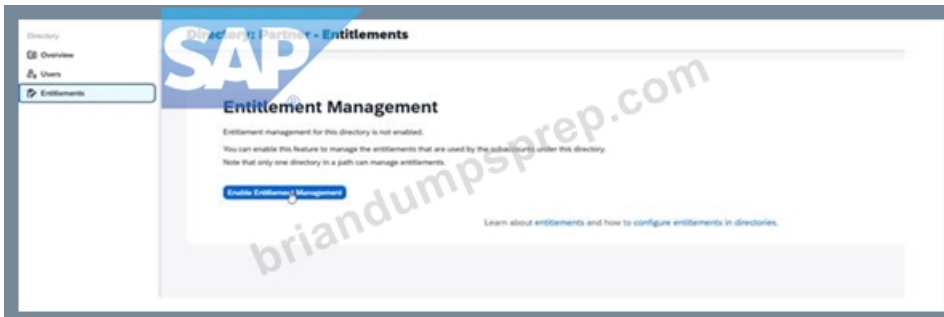

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

Select Subaccounts and Directories

Search All ▼

Show only subaccounts [Select All](#) [Unselect All](#) [Expand All](#) [Collapse All](#)

Partner (BTP Admin Certification) (Americas) [Add Service Plans](#) [Save](#) [Cancel](#)

Service	Service Technical Name	Plan	Set Quota Limit	Quota Assignment	Auto-Assign to Subaccounts	Remaining Quota	Actions
[DEPRECATED] Audit Log Retrieval	auditlog-apr	default	<input type="checkbox"/>	Assigned (1 unit)	<input type="checkbox"/>		X
Application Autoscaler	autoscaler	standard	<input type="checkbox"/>	Assigned (1 unit)	<input type="checkbox"/>		X
Application Logging Service	application-logs	lts	<input type="checkbox"/>	Assigned (1 unit)	<input type="checkbox"/>		X
Audit Log Management Service	auditlog-management	default	<input type="checkbox"/>	Assigned (1 unit)	<input type="checkbox"/>		X
Authorization and Trust Management Service	vtmsa	application	<input type="checkbox"/>	Assigned (1 unit)	<input type="checkbox"/>		X
		broker	<input type="checkbox"/>	Assigned (1 unit)	<input type="checkbox"/>		X

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

The screenshot displays the SAP Service Catalog interface. On the left, a list of services is shown under the heading 'Services available to this directory'. The search bar contains 'sap'. The selected service is 'SAP Build Work Zone, standard edition'. On the right, the 'Service Details' for this service are shown. The 'standard (Application)' plan is selected, and the 'Availability by Region and Data Center' section is expanded to show 'Entitlement Sources'.

Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Log in to the SAP BTP Cockpit.

Make sure you are inside the correct Global Account.

Open the left-side navigation menu.

Why this is important:

All directories in this task must be created inside the correct global account hierarchy. If you create them in the wrong location, the simulation result will be incorrect.

Step 1 - Create Directory Americas

What to do

In the SAP BTP Cockpit, select your Global Account.

In the left navigation menu, click Directories.

Click Create or Create Directory.

Fill the fields as follows:

Name: Americas

Description: Americas Accounts

Parent: your Global Account

Click Create.

Explanation:

This creates a top-level directory directly under the global account.

It will later be used as the parent for the Partner directory.

What to verify

After creation, you should see:

Americas

listed under the directories of the global account.

Step 2 - Create Directory Eurasia

What to do

Stay in Directories.

Click Create Directory again.

Fill the fields:

Name: Eurasia

Description: Eurasia Accounts

Parent: your Global Account

Click Create.

Create Directory

Display Name *
Eurasia

Description
Eurasia Accounts

Parent *
BTP Admin Certification XXXX

> **Advanced**

Cockpit supports multi-level directories in your account structure.
You can add your new directory directly to the root global account or to an existing directory by choosing the location under **Parent**.

[Create](#) [Cancel](#)

Explanation:

This creates another top-level directory, parallel to Americas.

What to verify

You should now see both:

Americas

Eurasia

under the global account.

Step 3 - Create Directory Partner under Americas

What to do

In the Directories area, select Americas.

Click Create Directory.

Enter:

Name: Partner

Description: Partner Accounts

Parent: Americas

Locate the Labels section.

Add a new label:

Key: access

Value: external

Click Create.

Name	Type	Environment	Provider	Created On	Changed On
BTP Admin Certification XXXX	Global Account			March 25, 2026, 5:11:2...	
Americas	Directory			March 26, 2026, 3:27:5...	
Eurasia	Directory			March 26, 2026, 3:28...

Display Name* Description

Parent*

▼ **Advanced**

Enable entitlement management Enable user management

Add labels to this directory. ⓘ

Name: Values:

SAP

Explanation:
 This creates Partner as a child directory under Americas.
 The label is required and must be entered exactly:
 access = external
 This label helps classify the directory.
 What to verify
 Under Americas, you should now see:
 Partner
 and the directory should contain the label:
 access=external
 Step 4 - Create Directory Human Resources under Eurasia

What to do

Go back to the Directories list.

Select Eurasia.

Click Create Directory.

Enter:

Name: Human Resources

Description: Human Resources Accounts

Parent: Eurasia

In the Labels section, add:

Key: access

Value: internal

Click Create.

Explanation:

This creates Human Resources as a child directory under Eurasia.

The required label is:

access = internal

What to verify

Under Eurasia, you should now see:

Human Resources

and the label should be:

access=internal

Final Expected Directory Structure

After completing Task 1, your structure must be exactly like this:

Global Account

Americas

Partner

Label: access=external

Eurasia

Human Resources

Label: access=internal

Name	Type	Entitlement	Provider	Labels	Changed On
Global Account	Global Account				March 23, 2024, 4:39:21
Americas	Directory				March 23, 2024, 4:39:21
Partner	Directory			1 Label	March 23, 2024, 4:39:21
Eurasia	Directory				March 23, 2024, 4:39:21
Human Resources	Directory				March 23, 2024, 4:39:21

Important Checks Before Moving On

Verify all of the following:

Americas exists

Eurasia exists

Partner is under Americas

Human Resources is under Eurasia

Partner has label access=external

Human Resources has label access=internal

All names and descriptions are entered exactly as required

Common Mistakes to Avoid

1. Wrong parent

Partner must be created under Americas

Human Resources must be created under Eurasia

2. Wrong label key or value

Use exactly:

access → external

access → internal

3. Spelling errors

Be careful with:

Americas

Eurasia

Partner

Human Resources

4. Creating all directories directly under the global account

Only Americas and Eurasia are direct children of the global account.

Partner and Human Resources must be child directories.

NEW QUESTION # 14

.....

Now passing SAP certification C_ADBTP exam is not easy, so choosing a good training tool is a guarantee of success. BraindumpsPrep will be the first time to provide you with exam information and exam practice questions and answers to let you be fully prepared to ensure 100% to pass SAP Certification C_ADBTP Exam. BraindumpsPrep can not only allow you for the first time to participate in the SAP certification C_ADBTP exam to pass it successfully, but also help you save a lot of valuable time.
