## SC-100 New Dumps Sheet & New SC-100 Exam Name

With the efforts of our IT professional experts, VCE4Plus SC-100 new practice questions pdf can guarantee you 99.9% first time pass rate. The SC-100 questions & answers are verified and checked by our experienced IT experts. With the SC-100 Latest Exam Simulator, you can attend your exam with relax and pleasure mood. Thus, the SC-100 valid and latest dumps together with positive attitude will contribute to your Microsoft SC-100 actual test.

## Microsoft Cybersecurity Architect Sample Questions (Q30-Q35):

### NEW QUESTION # 30

Your company plans to move all on-premises virtual machines to Azure. A network engineer proposes the Azure virtual network design shown in the following table.

You need to recommend an Azure Bastion deployment to provide secure remote access to all the virtual machines. Based on the virtual network design, how many Azure Bastion subnets are required?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

**Answer: A**

Explanation:

<https://docs.microsoft.com/en-us/azure/bastion/vnet-peering>

<https://docs.microsoft.com/en-us/learn/modules/connect-vm-with-azure-bastion/2-what-is-azure-bastion>

### NEW QUESTION # 31

Hotspot Question

You have an Azure subscription that contains a Microsoft Sentinel workspace named MSW1.

MSW1 includes 50 scheduled analytics rules.

You need to design a security orchestration automated response (SOAR) solution by using Microsoft Sentinel playbooks. The solution must meet the following requirements:

- Ensure that expiration dates can be configured when a playbook runs.
- Minimize the administrative effort required to configure individual analytics rules.

What should you use to invoke the playbooks, and which type of Microsoft Sentinel trigger should you use? To answer, select the options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Automation rules

You can respond to threats by using playbooks with automation rules in Microsoft Sentinel Box 2: Incident Use triggers and actions in Microsoft Sentinel playbooks For most use cases, incident-triggered automation is the preferable approach. In Microsoft Sentinel, an incident is a "case file" ?an aggregation of all the relevant evidence for a specific investigation. It's a container for alerts, entities, comments, collaboration, and other artifacts.

Unlike alerts which are single pieces of evidence, incidents are modifiable, have the most updated status, and can be enriched with comments, tags, and bookmarks. The incident allows you to track the attack story which keeps evolving with the addition of new alerts.

For these reasons, it makes more sense to build your automation around incidents. So the most appropriate way to create playbooks is to base them on the Microsoft Sentinel incident trigger in Azure Logic Apps.

### NEW QUESTION # 32

You need to recommend a solution to evaluate regulatory compliance across the entire managed environment. The solution must meet the regulatory compliance requirements and the business requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□

### NEW QUESTION # 33

Your company has the virtual machine infrastructure shown in the following table.

□

The company plans to use Microsoft Azure Backup Server (MABS) to back up the virtual machines to Azure.

You need to provide recommendations to increase the resiliency of the backup strategy to mitigate attacks such as ransomware.

What should you include in the recommendation?

- A. Implement Azure Site Recovery replication.
- **B. Require PINs to disable backups.**
- C. Use customer-managed keys (CMKs) for encryption.
- D. Use geo-redundant storage (GRS).

**Answer: B**

Explanation:

<https://docs.microsoft.com/en-us/azure/security/fundamentals/backup-plan-to-protect-against-ransomware#azure>

### NEW QUESTION # 34

You have an Azure subscription that contains a Microsoft Sentinel workspace named WS1.

You need to configure WS1 to meet the following requirements:

- \* Create custom dashboards to visualize the workload of security analysts that use Microsoft Sentinel.
- \* Enable automated responses for the security alerts generated by Microsoft Sentinel analytics rules.

What should you use for each requirement? To answer, select the options in the answer area.

NOTE: Each correct answer is worth one point.

□

**Answer:**

Explanation:

□

### NEW QUESTION # 35

.....

The latest technologies have been applied to our SC-100 actual exam as well since we are at the most leading position in this field. You can get a complete new and pleasant study experience with our SC-100 study materials. Besides, you have varied choices for there are three versions of our SC-100 practice materials. At the same time, you are bound to pass the exam and get your desired certification for the validity and accuracy of our SC-100 training guide.
