

# DP-420 Latest Exam Review - DP-420 Test Answers

Microsoft DP-420 (Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB (beta))

Question 2 of 10

**HOTSPOT**

You have an Azure Cosmos DB Core (SQL) account that has a single write region in West Europe. You run the following Azure CLI script.

```
az cosmosdb update -n [accountName] -g [resourceGroupName] --locations regionName="West Europe" failoverPriority=0 isZoneRedundant=False
az cosmosdb failover-priority-change -n [accountName] -g [resourceGroupName] --failover-policies "North Europe=0", "West Europe=1"
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Hot Area:**

**Answer Area**

**Statements**

After running the script, there will be an instance of Azure Cosmos DB in North Europe that is writable  Yes  No

After running the script, the Azure Cosmos DB instance in West Europe will be writable  Yes  No

The cost of the Azure Cosmos DB account is unaffected by running the script  Yes  No

Q No. Answer Marked

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30

With passing rate up to 98 to 100 percent, the quality and accuracy of our DP-420 training materials are unquestionable. You may wonder their price must be equally steep. While it is not truth. On the contrary everyone can afford them easily. By researching on the frequent-tested points in the real exam, our experts have made both clear outlines and comprehensive questions into our DP-420 Exam Prep. So our DP-420 practice engine is easy for you to understand.

Microsoft DP-420 exam is an important certification for professionals who are involved in designing and implementing cloud-native applications using Azure Cosmos DB. DP-420 exam validates the candidate's skills and knowledge in designing, developing, and implementing cloud-native applications using Azure Cosmos DB, and demonstrates their expertise in this field. Candidates who Pass DP-420 Exam will be able to demonstrate their ability to design and implement cloud-native applications using Azure Cosmos DB, and will be well-prepared to take on new challenges in this rapidly evolving field.

## 2026 Accurate DP-420: Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Latest Exam Review

Different from other similar education platforms, the DP-420 quiz guide will allocate materials for multi-plate distribution, rather than random accumulation without classification. The DP-420 prepare torrent is absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the DP-420 test material more suitable for users of various cultural levels. And the DP-420 test material provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

## Microsoft Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB Sample Questions (Q108-Q113):

### NEW QUESTION # 108

You plan to create an Azure Cosmos DB account that will use the NoSQL API.

You need to create a grouping strategy for items that will be stored in the account. The solution must ensure that write and read operations on the items can be performed within the same transact!

What should you use to group the items?

- A. databases
- B. physical partitions
- C. logical partitions
- D. containers

**Answer: C**

**NEW QUESTION # 109**

You have a container named container1 in an Azure Cosmos DB Core (SQL) API account. The container1 container has 120 GB of data.

The following is a sample of a document in container1.

The orderId property is used as the partition key.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Box 1: Yes

Records with different OrderIDs will match.

Box 2: Yes

Records with different OrderIDs will match.

Box 3: No

Only records with one specific OrderId will match

**NEW QUESTION # 110**

You configure Azure Cognitive Search to index a container in an Azure Cosmos DB Core (SQL) API account as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

Box 1: country

The country field is filterable.

Note: filterable: Indicates whether to enable the field to be referenced in \$filter queries. Filterable differs from searchable in how strings are handled. Fields of type Edm.String or Collection(Edm.String) that are filterable do not undergo lexical analysis, so comparisons are for exact matches only.

Box 2: name

The name field is not Retrievable.

Retrievable: Indicates whether the field can be returned in a search result. Set this attribute to false if you want to use a field (for example, margin) as a filter, sorting, or scoring mechanism but do not want the field to be visible to the end user.

Note: searchable: Indicates whether the field is full-text searchable and can be referenced in search queries.

Reference: <https://docs.microsoft.com/en-us/rest/api/searchservice/create-index>

**NEW QUESTION # 111**

You have an Azure Cosmos DB Core (SQL) API account that uses a custom conflict resolution policy. The account has a registered merge procedure that throws a runtime exception.

The runtime exception prevents conflicts from being resolved.

You need to use an Azure function to resolve the conflicts.

What should you use?

- A. a function that pulls items from the conflicts feed and is triggered by a timer trigger
- B. a function that pulls items from the change feed and is triggered by a timer trigger
- C. a function that receives items pushed from the change feed and is triggered by an Azure Cosmos DB trigger
- D. a function that receives items pushed from the conflicts feed and is triggered by an Azure Cosmos DB trigger

## Answer: D

Explanation:

Explanation

The Azure Cosmos DB Trigger uses the Azure Cosmos DB Change Feed to listen for inserts and updates across partitions. The change feed publishes inserts and updates, not deletions.

## NEW QUESTION # 112

You have an Azure Cosmos DB Core (SQL) API account named storage1 that uses provisioned throughput capacity mode. The storage1 account contains the databases shown in the following table.

The databases contain the containers shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

## Answer:

Explanation:

## NEW QUESTION # 113

.....

Compared with other training materials, why Pass4Test's Microsoft DP-420 exam training materials is more welcomed by the majority of candidates? First, this is the problem of resonance. We truly understand the needs of the candidates, and comprehensively than any other site. Second, focus. In order to do the things we decided to complete, we have to give up all the unimportant opportunities. Third, the quality of the product. People always determine a good or bad thing based on the surface. We may have the best products of the highest quality, but if we shows it with a shoddy manner, it naturally will be as shoddy product. However, if we show it with both creative and professional manner, then we will get the best result. The Pass4Test's Microsoft DP-420 Exam Training materials is so successful training materials. It is most suitable for you, quickly select it please.
