## Hot Generative-AI-Leader Exam Dumps Demo 100% Pass | Reliable Generative-AI-Leader Trustworthy Pdf: Google Cloud Certified - Generative AI Leader Exam

Real4dumps are supposed to help you pass the exam smoothly. Don't worry about channels to the best Generative-AI-Leader study materials because we are the exactly best vendor in this field for more than ten years. And so many exam candidates admire our generosity of the Generative-AI-Leader Practice Questions offering help for them. Up to now, no one has ever challenged our leading position of this area. With our Generative-AI-Leader training guide, you will be doomed to pass the exam successfully.

## Google Cloud Certified - Generative AI Leader Exam Sample Questions (Q66-Q71):

### NEW QUESTION # 66

A learning and development team wants to quickly create a new hire training video with a custom avatar and voiceover that matches their company's branding and key messaging. They did not receive any money to spend on the production. What should they do?

- A. Train a model with Vertex AI and produce a video.
- B. Generate the video frames with Imagen.
- **C. Create a video with Google Vids.**
- D. Prompt the Gemini app to create a video.

**Answer: C**

Explanation:

The scenario requires quick creation of a training video using a custom avatar and voiceover while adhering to zero cost for production.

Google Vids is an AI-powered video creation app (part of Google Workspace/Gemini features) designed to make video creation accessible for teams without the overhead of traditional production. It specifically offers features like AI avatars and voiceovers for content such as trainings, demos, and onboarding videos. This directly addresses the need for a low-cost, fast solution for a new hire training video with custom branding elements (custom avatars and voiceovers are a key feature of the tool).

Option A, Imagen, is a Google foundation model specialized for image generation, not the creation of structured, narrated training videos with avatars. Option B, using the Gemini app, is primarily for text, code, and multimodal chat/generation, and is not the dedicated Google application for video production. Option C, training a model with Vertex AI, is a highly technical, time-consuming and expensive endeavor that violates the need for a quick and zero-cost solution. Therefore, using the purpose-built, gen AI-enabled Google Vids application is the correct and most efficient choice.

#### NEW QUESTION # 67

An organization needs an AI tool to analyze and summarize lengthy customer feedback text transcripts. You need to choose a Google foundation model with a large context window. What foundation model should the organization choose?

- A. Imagen
- B. Chirp
- C. CodeGemma
- D. Gemini

**Answer: D**

Explanation:

Gemini models are known for their large context windows, making them highly suitable for processing and summarizing lengthy texts like customer feedback transcripts. CodeGemma is specialized for code, Imagen for image generation, and Chirp for speech.

---

#### NEW QUESTION # 68

A sales manager wants to responsibly use generative AI (gen AI) to increase efficiency with their existing tasks. They want to allow the sales team to focus on building customer relationships and closing deals. How should the sales team use gen AI?

- A. To replace the sales team's CRM system with a more intuitive and user-friendly interface.
- B. To analyze customer interactions on social media and automatically generate sales pitches tailored to their public profiles.
- C. To draft emails and provide real-time insights about customer needs.
- D. To automate creative content like blog posts and social media updates to attract new leads.

**Answer: C**

Explanation:

The strategic goal is to boost sales efficiency by shifting the team's focus to high-value activities (relationships and closing deals) by automating repetitive administrative tasks.

Option C directly addresses this goal by leveraging Gen AI's core capabilities for text generation and summarization/analysis:

Drafting emails automates a major time sink for sales reps (a common, repetitive task).

Providing real-time insights automates the labor-intensive research and manual data analysis required to understand customer needs, giving the rep instant, actionable context.

Options A and D are less direct solutions for improving sales efficiency: Option A is an expensive, high-risk platform replacement, not an efficiency use case. Option D describes marketing tasks, which, while related, are not the primary, day-to-day tasks that sales reps perform to clear their schedules for relationship building. Therefore, Gen AI's most effective role in sales is as a productivity assistant for drafting and quick research.

(Reference: Google Cloud documentation on sales enablement use cases emphasizes that Gen AI's role is to automate administrative and time-consuming tasks like drafting outreach messages and synthesizing customer information to enhance seller productivity, allowing them to focus on revenue-generating activities.)

#### NEW QUESTION # 69

What is a primary benefit of using a multi-agent system?

- A. To consolidate all unique AI functions into a single, undifferentiated model.
- B. To simplify the most basic and repetitive rule-based tasks.
- C. To serve as a platform for hosting traditional, non-AI applications.
- **D. To manage complex tasks that demand coordinated AI functions.**

**Answer: D**

Explanation:

Multi-agent systems are designed to tackle complex problems by breaking them down into sub-tasks, where each agent specializes in a specific function. These agents then coordinate and collaborate to achieve a larger, more intricate goal that a single, monolithic AI model might struggle with.

---

#### NEW QUESTION # 70

A software developer needs a highly efficient, open-source large language model that can be fine-tuned on a local machine for rapid prototyping of a chatbot application. They require a model that offers strong performance in natural language understanding and generation, while being lightweight enough to run on limited hardware. Which Google-developed family of models should they use?

- A. Imagen
- B. Gemini
- C. Veo
- **D. Gemma**

**Answer: D**

Explanation:

Gemma is Google's family of lightweight, state-of-the-art open models, built from the same research and technology used to create the Gemini3 models. They are designed for developers to build innovative AI applications on their local machines or in the cloud, offering a balance of performance and efficiency suitable for limited hardware and rapid prototyping. Veo is for video generation, Gemini is typically larger and more general-purpose, and Imagen is for image generation.

---

#### NEW QUESTION # 71

.....

Generative-AI-Leader Online test engine is convenient and easy to study, and it supports all web browsers, and you can practice offline if you like. Most importantly, Generative-AI-Leader Online test engine has testing history and performance review, and you can have a general review of what you have learned before next practice. In addition, we offer you free demo for Generative-AI-Leader Exam Dumps for you to have a try, so that you can know what the complete version is like. We have online and offline service for Generative-AI-Leader exam dumps, and if you are bothered by any questions, you can have a conversation with us, and we will give you the professional advice.

**Generative-AI-Leader Trustworthy Pdf:** [https://www.real4dumps.com/Generative-AI-Leader\\_examcollection.html](https://www.real4dumps.com/Generative-AI-Leader_examcollection.html)

If you choose us you will own the best Generative-AI-Leader cram file material and golden service, If you make up your mind of our Generative-AI-Leader exam questions after browsing the free demos, we will staunchly support your review and give you a comfortable and efficient purchase experience this time, So we take this factor into consideration, develop the most efficient way for you to prepare for the Generative-AI-Leader exam, that is the real questions and answers practice mode, firstly, it simulates the real Generative-AI-Leader test environment perfectly, which offers greatly help to our customers, Of course, the combination use of different version of the Generative-AI-Leader test guide is also a good choice.

If you are sharing files inside or outside) your organization, they should Generative-AI-Leader offer more than just standard marketing messages, Rod's journey in physics and games started way back with an Apple writing games in Basic.

### 2026 Valid Generative-AI-Leader Exam Dumps Demo | Generative-AI-Leader 100% Free Trustworthy Pdf

If you choose us you will own the best Generative-AI-Leader cram file material and golden service, If you make up your mind of our Generative-AI-Leader exam questions after browsing the free demos, we will staunchly Generative-AI-Leader Exam Dumps Demo

support your review and give you a comfortable and efficient purchase experience this time.

So we take this factor into consideration, develop the most efficient way for you to prepare for the Generative-AI-Leader exam, that is the real questions and answers practice mode, firstly, it simulates the real Generative-AI-Leader test environment perfectly, which offers greatly help to our customers.

Of course, the combination use of different version of the Generative-AI-Leader test guide is also a good choice, Do you always feel boring and idle in you spare time?
