The experts in our company are always keeping a close eye on even the slightest change in the field. Therefore, we can assure that you will miss nothing needed for the JN0-481 exam. What's more, the latest version of our JN0-481 study materials will be a good way for you to broaden your horizons as well as improve your skills. So with our JN0-481 Exam Questions, not only you can pass the exam with ease with 100% pass guarantee, but also you can learn the most professional and specialized knowledge in this field!

We have always taken care to provide our customers with the very best. So we provide numerous benefits along with our Data Center, Specialist (JNCIS-DC) exam study material. We provide our customers with the demo version of the Juniper JN0-481 Exam Questions to eradicate any doubts that may be in your mind regarding the validity and accuracy. You can test the product before you buy it.

## Start Your Juniper JN0-481 Exam Preparation with JN0-481 Actual Exam Questions

Most experts agree that the best time to ask for more dough is after you feel your JN0-481 performance has really stood out. To become a well-rounded person with the help of our JN0-481 study questions, reducing your academic work to a concrete plan made up of concrete actions allows you to streamline and gain efficiency, while avoiding pseudo work and guilt. Our JN0-481 Guide materials provide such a learning system where you can improve your study efficiency to a great extent.

## Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q29-Q34):

### NEW QUESTION # 29

What are two formats that the cabling map can be exported as? (Choose two.)

- A. CSV
- B. HTML
- C. XML
- D. JSON

Answer: A,D

### NEW QUESTION # 30

Which two statements about VXLAN VNIs are correct? (Choose two.)

- A. VNIs identify a broadcast domain
- B. VNIs can have over 16 million unique values.
- C. VNIs are alphanumeric values.
- D. VNIs identify a collision domain.

**Answer: A,B**

Explanation:

VXLAN VNIs are virtual network identifiers that are used to identify and isolate Layer 2 segments in the overlay network. VXLAN VNIs have the following characteristics:

VNIs can have over 16 million unique values. This is because VXLAN VNIs are 24-bit fields that can range from 4096 to 16777214, according to the VXLAN standard. This allows VXLAN to support a large number of Layer 2 segments and tenants in the network. VNIs identify a broadcast domain. This is because VXLAN VNIs are used to group the end hosts that belong to the same Layer 2 segment and can communicate with each other using VXLAN tunnels. The VXLAN tunnels are established using the VTEP information that is distributed by EVPN. The VTEPs are VXLAN tunnel endpoints that perform the VXLAN encapsulation and decapsulation.

The VXLAN tunnels preserve the Layer 2 semantics and support the broadcast, unknown unicast, and multicast traffic within the same VNI.

### NEW QUESTION # 31

You have recently committed a change after creating a new blueprint in Juniper Apstra. In the main dashboard, you see a number of anomalies related to BGP. What is a likely cause of these anomalies?

- A. You have misconfigured ASNs.
- B. A generic system has not been configured.
- C. Spine-leaf links are incorrectly set.
- D. The fabric has not converged yet.

**Answer: D**

Explanation:

In Juniper Apstra, a blueprint is a logical representation of the network design and configuration.

When you create a new blueprint, you need to commit the changes to apply them to the network devices. However, committing the changes does not mean that the network is immediately updated and operational. It may take some time for the network to converge and reflect the new state of the blueprint. During this time, you may see some anomalies related to BGP in the main dashboard, which indicate that the BGP sessions are not established or stable between the devices. These anomalies are usually temporary and will disappear once the network converges and the BGP sessions are up and running.

### NEW QUESTION # 32

IBA probes analyze telemetry data from specified devices within a blueprint. Which component identifies devices that supply data for a specific probe?

- A. search engine
- B. graph query
- C. processor
- D. data selector

**Answer: B**

Explanation:

A graph query is a component that identifies devices that supply data for a specific probe. A graph query is an expression that matches nodes in the Apstra graph database based on their attributes, such as device name, role, type, or tag. A graph query can be used to select the source devices for the input processors of a probe, as well as to filter the data by device attributes in the subsequent processors of a probe.

### NEW QUESTION # 33

In the Juniper Apstra UI, which two resource types would be created in the Resources menu?  
(Choose two.)

- A. DHCP pools
- B. IP pools
- C. bridge domain identifier (BDI)
- D. ASN pools

**Answer: B,D**

Explanation:

The Resources menu in the Juniper Apstra UI allows you to create and manage various types of resources that are assigned to different elements of the network.

Resources include the following types:

- IPv4 (including Host IPv4)
- IPv6 (including Host IPv6)
- ASN (autonomous system number)
- VNI (virtual network identifier)
- VLAN (virtual local area network)

Integer (used for pool type VLAN in local pools in Freeform blueprints) Therefore, the correct answer is C and D. ASN pools and IP pools are two types of resources that can be created in the Resources menu. Bridge domain identifier (BDI) and DHCP pools are not applicable in this scenario, because they are not part of the resources types supported by Juniper Apstra.

### NEW QUESTION # 34

.....

The customizable mock tests make an image of a real-based Data Center, Specialist (JNCIS-DC) (JN0-481) exam which is helpful for you to overcome the pressure of taking the final examination. Customers of SurePassExams can take multiple Juniper JN0-481 practice tests and improve their preparation to achieve the JN0-481 Certification. You can even access your previously given tests from the history, which allows you to be careful while giving the mock test next time and prepare for Juniper JN0-481 certification in a better way.
