This is a simple and portable document of real Fortinet FCP_ZCS-AD-7.4 Exam Questions. It contains actual Fortinet FCP_ZCS-AD-7.4 exam questions and answers and can be helpful for quick revision or for studying on the go. It is also printable so you can easily study on a hard copy of the pdf having a break from staring.

Exam FCP_ZCS-AD-7.4 tests your professional talent and expertise. This is the reason that passing this Fortinet Certified Professional certification exam has been a tough challenge for professionals. But it is made easy now to ace it! The recently developed GuideTorrent's FCP_ZCS-AD-7.4 Exam Questions dumps aim at to deliver you the shortest possible route to obtaining FCP_ZCS-AD-7.4 without any chance of losing the exam.

New FCP_ZCS-AD-7.4 Test Syllabus - New FCP_ZCS-AD-7.4 Test Forum

Learning is sometimes extremely dull and monotonous, so few people have enough interest in learning, so teachers and educators have tried many ways to solve the problem. Research has found that stimulating interest in learning may be the best solution. Therefore, the FCP_ZCS-AD-7.4 prepare guide' focus is to reform the rigid and useless memory mode by changing the way in which the FCP_ZCS-AD-7.4 Exams are prepared. FCP_ZCS-AD-7.4 practice materials combine knowledge with the latest technology to greatly stimulate your learning power. By simulating enjoyable learning scenes and vivid explanations, users will have greater confidence in passing the qualifying exams.

Fortinet FCP - Azure Cloud Security 7.4 Administrator Sample Questions (Q31-Q36):

NEW QUESTION # 31
What is a key distinction between Azure Firewall and FortiGate VM in terms of their primary functions?

- A. Azure Firewall is designed exclusively for application layer filtering, while FortiGate VM is suitable for both on-premises and cloud environments.

- **B. Azure Firewall is a cloud-native network security service, while FortiGate VM is a network virtual appliance (NVA) that provides comprehensive security functions.**
- C. Azure Firewall and FortiGate VM have identical primary functions, and no features differentiation.
- D. Azure Firewall focuses on network traffic inspection, while FortiGate VM is primarily a web application firewall.

Answer: B

Explanation:
Azure Firewall is a cloud-native, fully managed network security service designed to control and log network traffic using Azure policies. In contrast, the FortiGate VM is a network virtual appliance (NVA) that delivers comprehensive security features, including firewalling, IPS, antivirus, VPN, and application control, suitable for both on-premises and cloud deployments.

NEW QUESTION # 32
Your organization is planning to deploy FortiWeb in Azure to provide a web application security solution to its web servers. One of the requirements is to have granular control of the number of vCPUs and memory assigned to this resource.
Which cloud model could meet this requirement?

- **A. Infrastructure-as-a-Service (IaaS)**
- B. Platform-as-a-Service (PaaS)
- C. Software-as-a-Service (SaaS)
- D. Function-as-a-Service (FaaS)

Answer: A

Explanation:
Infrastructure-as-a-Service (IaaS) allows you to deploy FortiWeb as a virtual machine in Azure, giving you granular control over vCPU and memory allocation. This model provides full flexibility over the compute resources and network configuration, which is essential for deploying and scaling security appliances like FortiWeb.

NEW QUESTION # 33
After integrating a FortiGate VM with Azure Route Server, you detect that routes are not propagating successfully.
What initial step could you perform to diagnose the root cause?

- A. Verify that the FortiGate VM is running the latest firmware version
- B. Examine the Azure Microsoft Entra ID permissions associated with the FortiGate VM to ensure that correct authentication is being used for BGP peering
- **C. Verify the BGP peering status on both the FortiGate VM and Azure Route Server**
- D. Monitor the network latency between the FortiGate VM and Azure Route Server to identify potential communication delays affecting route propagation

Answer: C

Explanation:
The first and most direct diagnostic step is to verify the BGP peering status on both the FortiGate VM and Azure Route Server. If BGP peering is not established or is in an idle or down state, route propagation will fail. This check confirms whether the two systems are communicating and exchanging routes as expected.

NEW QUESTION # 34
In the context of Azure Route Server, what is a primary function of the route server subnet?

- A. Acting as a dedicated subnet to host network virtual appliances (NVAs) with routing propagation capabilities
- **B. Serving as the hub for the exchange of routing information**
- C. Providing DNS resolution for on-premises networks
- D. Hosting virtual machines for routing propagation purposes

Answer: B

Explanation:

Theroute server subnetin Azure is adedicated subnetthat hosts theAzure Route Server, which functions as thehub for dynamic routing information exchangebetween Azure virtual networks and BGP-enabled network virtual appliances (NVAs) or on-premises routers. It enables seamless and centralized route propagation.

NEW QUESTION # 35

Refer to the exhibit.

The exhibit shows some of the properties of a virtual NIC that is used by a FortiGate VM deployed in Azure.

The virtual NIC shown is connected to a subnet (10.0.1.0/26) with several VMs that will be accessing the internet through the FortiGate VM.

Which statement is true for this scenario?

- A. The VMs in the 10.0.1.0/26 subnet can access the internet through FortiGate.
- B. The parameters of the virtual NIC are not configured correctly.
- C. The NIC in the exhibit needs to be assigned a public IP address.
- D. You must change the default gateway on the VMs in the Internal Subnet for this to work.

Answer: D

Explanation:

For VMs in the10.0.1.0/26subnet to access the internetthrough the FortiGate VM, theirdefault gateway must be changedto the internal IP address of the FortiGate's NIC in that subnet (e.g.,LAB1-FGT-A-Nic2).

This ensures traffic is routedthrough FortiGate for inspection and NAT, rather than directly using Azure's default system routes.

NEW QUESTION # 36

......

GuideTorrent provides a high-quality Fortinet FCP_ZCS-AD-7.4 practice exam. The best feature of the Fortinet FCP_ZCS-AD-7.4 exam dumps is that they are available in PDF and a web-based test format. Fortinet offer updated Fortinet FCP_ZCS-AD-7.4 Exam products to our valuable customers. Real Fortinet FCP_ZCS-AD-7.4 exam questions along with answers are being provided in two formats.

New FCP_ZCS-AD-7.4 Test Syllabus: https://www.guidetorrent.com/FCP_ZCS-AD-7.4-pdf-free-download.html

When we get into the job, our FCP_ZCS-AD-7.4 training materials may bring you a bright career prospect, Fortinet FCP_ZCS-AD-7.4 Exam Duration This type of feedback is precious and can continue to guide you in your studies, Many people are taking part in the Fortinet New FCP_ZCS-AD-7.4 Test Syllabus exams for the first time, Fortinet FCP_ZCS-AD-7.4 Exam Duration Firstly, all the contents are seriously compiled by our professional experts.

Removing Unwanted Objects Automatically, You can take a couple of different approaches to determine the length of the project, When we get into the job, our FCP_ZCS-AD-7.4 Training Materials may bring you a bright career prospect.

Newest FCP_ZCS-AD-7.4 – 100% Free Exam Duration | New FCP_ZCS-AD-7.4 Test Syllabus

This type of feedback is precious and can continue to guide you in your studies, FCP_ZCS-AD-7.4 Many people are taking part in the Fortinet exams for the first time, Firstly, all the contents are seriously compiled by our professional experts.

We are confident in our real Fortinet exam questions and test dumps vce pdf.

- Valid FCP_ZCS-AD-7.4 Exam Duration offer you accurate New Test Syllabus | Fortinet FCP - Azure Cloud Security 7.4 Administrator 🠶 Easily obtain 🠶 FCP_ZCS-AD-7.4 🠶 for free download through [www.pdfdumps.com] 🠶Test FCP_ZCS-AD-7.4 Collection
