

# Free PDF Oracle - Useful 1z0-1075-25 - Latest Oracle Manufacturing Cloud 2025 Implementation Professional Test Report

## Oracle 1Z0-1075-25 Oracle Manufacturing Cloud 2025 Implementation Professional QUESTION & ANSWERS

Visit Now: <https://www.dumps-certify.com>

BONUS!!! Download part of Torrent Valid 1z0-1075-25 dumps for free: <https://drive.google.com/open?id=1eaJPoaN0MZ1R8O6Xh9vqq3vBWTm6HAv3>

Our 1z0-1075-25 free dumps demo will provide you some basic information for the accuracy of our exam materials. All questions and answers in our 1z0-1075-25 real dumps are tested by our certified trainers with rich experience and one or two days is enough for you practicing Valid 1z0-1075-25 Exam Pdf. Our 1z0-1075-25 dumps torrent contains everything you want to solve the challenge of real exam.

You will notice the above features in the Oracle 1z0-1075-25 Web-based format too. But the difference is that it is suitable for all operating systems. There is no need to go through time-taking installations or agitating plugins to use this format. It will lead to your convenience while preparing for the Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) certification test. Above all, it operates on all browsers.

>> Latest 1z0-1075-25 Test Report <<

### Valid Exam 1z0-1075-25 Braindumps - 1z0-1075-25 Reliable Test Prep

It is quite clear that let the facts speak for themselves is more convincing than any word, therefore, we have prepared free demo in this website for our customers to have a taste of the 1z0-1075-25 test torrent compiled by our company. You will understand the

reason why we are so confident to say that the 1z0-1075-25 exam torrent compiled by our company is the top-notch 1z0-1075-25 Exam Torrent for you to prepare for the exam. Just like the old saying goes: "Facts are stronger than arguments." You can choose to download our free demo at any time as you like, you are always welcome to have a try, and we trust that our 1z0-1075-25 exam materials will never let you down.

## Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q19-Q24):

### NEW QUESTION # 19

In the work execution area, which three infolets are provided to users for instant access?

- A. Scrap
- B. Operation Efficiency
- C. Operation Exception
- D. Work Order Performance
- E. work order Exception

**Answer: C,D,E**

Explanation:

In the Work Execution area of Oracle Manufacturing Cloud, several infolets provide users with quick access to critical data. The following infolets are available for immediate access:

- \* Work Order Performance : Provides an overview of the performance of work orders against the planned schedule, showing progress and efficiency.
- \* Operation Exception : Highlights any exceptions or issues encountered during operations, enabling quick identification of problems.
- \* Work Order Exception : Displays any issues or exceptions related to work orders, such as delays or material shortages.

Incorrect options:

\* Scrap and Operation Efficiency are important metrics, but they are not available as standard infolets in the Work Execution area. Oracle Manufacturing Cloud 's Work Execution interface documentation details the standard infolets available for tracking production performance and exceptions.

### NEW QUESTION # 20

You are defining a standard operation for visual inspection. You want the completion of this standard operation to be reported in all work orders that reference it.

Which setup task must you perform to achieve this?

- A. Deselect the Count Point check box while defining the standard operation.
- B. Select the Automatically Transact check box while defining the standard operation.
- C. Select the Count Point check box while defining the standard operation.
- D. Ensure that the Charge Type of the resource is Automatic.

**Answer: C**

Explanation:

In Oracle Manufacturing Cloud, when defining a standard operation such as visual inspection, marking it as a Count Point ensures that its completion will be tracked and reported for all work orders referencing it. A Count Point operation is one where progress must be explicitly recorded, allowing visibility into work order completion.

\* Selecting the Count Point check box ensures that this operation becomes a mandatory checkpoint where users must report completion in all related work orders. This is essential for operations like visual inspection, where reporting completion is critical to production quality.

Oracle Manufacturing Cloud documentation on defining standard operations explains the significance of using the Count Point functionality to enforce operation completion reporting.

### NEW QUESTION # 21

The pick release of a project work order creates movement requests with the project and the task from the work order.

Which statement is NOT true about this?

- A. The expenditure type for the item is derived based on the Default Expenditure Type attribute in Inventory Management.

The picks for the work order are grouped by project costing, project, and task using pick slip grouping rules.

- B. The expenditure type, expenditure date, and expenditure organization are derived when the work-in-process material issue or work-in-process material pick transactions are interfaced to Costing.
- **C. The expenditure type and the expenditure organization from the work order are not referenced onto the shop floor movement requests.**
- D. The expenditure type and the expenditure organization from the work order are referenced onto the shop floor movement requests.

**Answer: C**

Explanation:

When pick release creates movement requests for project-based work orders, there are several key points regarding expenditure information:

\* Statement D : The expenditure type and the expenditure organization from the work order are not referenced onto the shop floor movement requests - This statement is correct because the expenditure type and organization are not typically included in the shop floor movement requests. These requests focus more on the material movement aspects, while expenditure details are managed elsewhere in the system.

Oracle Cost Management documentation clarifies that shop floor movement requests handle inventory and material flow, and expenditure information is derived later in the process, not directly tied to these requests.

Incorrect Statements:

Statement A : The expenditure type, date, and organization are derived when interfacing with Costing, which ensures that project-related costs are tracked accurately.

Statement B : The expenditure type for the item is derived based on the default expenditure type in Inventory Management, which is true for how items are picked for a work order.

Statement C : Expenditure type and organization from the work order are referenced in costing, but not directly on movement requests.

## NEW QUESTION # 22

Your customer has multiple distribution centers and a few manufacturing plants. The plants manufacture different items with some overlap between them. The distribution centers stock parts from all plants.

A Corporate Engineering team is responsible for centrally defining items and catalogs. This team defines the items and sets the attributes for most parameters. The respective distribution centers and manufacturing plants must be allowed to change some attributes locally.

What is the best way to achieve this?

- A. Set up plants, distribution centers, and the Corporate Engineering organization as inventory organizations.
- B. Set up plants as inventory organizations, and distribution centers and the corporate Engineering organization as item organizations.
- C. Set up plants and the Corporate Engineering organization as item organizations, and distribution centers as inventory organizations.
- **D. Set up plants and distribution centers as inventory organizations, and the Corporate Engineering organization as an Item organization.**
- E. Set up plants and the Corporate Engineering organization as Inventory organizations, and distribution centers as item organizations.

**Answer: D**

Explanation:

In Oracle Cloud, managing items and their attributes across multiple organizations requires careful structuring of inventory and item organizations. The best way to configure this setup given the customer's requirements is as follows:

\* Plants and Distribution Centers as Inventory Organizations : Inventory organizations are required to manage on-hand quantities, perform transactions, and handle the physical movement of materials.

Plants need to be inventory organizations to manage production, and distribution centers need to be inventory organizations to manage stocking and distribution.

\* Corporate Engineering Organization as an Item Organization : An item organization is responsible for centrally defining item attributes. By setting the Corporate Engineering team as an item organization, you ensure that item definitions are controlled centrally. The team can define standard attributes while allowing inventory organizations (plants and distribution centers) to modify certain attributes at their level based on local needs.

This structure allows for centralized item management with localized flexibility for plants and distribution centers.

Oracle SCM Cloud guides for "Item and Inventory Organizations" explain how item organizations allow centralized management of

item definitions while inventory organizations handle the physical inventory and can override certain attributes locally.

Incorrect Options:

A : Defining all entities as inventory organizations would not allow centralized control of item attributes.

C , D , E : These setups would either limit the ability to control item attributes centrally or misassign organizations that need to handle physical inventory as item-only organizations.

### NEW QUESTION # 23

Which is NOT a required setup task for Manufacturing master data?

- A. Manage Work Centers
- **B. Manage Plant Profiles**
- C. Manage Production Resources
- D. Manage Plant Parameters
- E. Manage Work Areas

**Answer: B**

Explanation:

In Oracle Manufacturing Cloud, setting up the Manufacturing master data involves a series of required tasks to enable production operations. The following are the key setups:

\* Manage Production Resources : This setup task is essential for defining resources such as labor, equipment, and tools that are used in the manufacturing process. Resources are vital to the production planning and scheduling functions.

\* Manage Plant Parameters : This task is required to define how the plant will operate in terms of material handling, scheduling, costing, and other key operational metrics. These parameters control important aspects of how manufacturing will function at the plant level.

\* Manage Work Centers : Work centers represent the physical or logical locations where manufacturing operations occur. They must be set up for scheduling and executing production activities.

\* Manage Work Areas : Work areas are required to group related work centers and define operational zones within a plant. This is important for organizing production and ensuring efficient material flow.

\* Manage Plant Profiles : This task is not required for setting up manufacturing master data. Plant profiles are typically used for broader plant-level settings but are not directly tied to the manufacturing execution setup.

Oracle Manufacturing Cloud Implementation documentation outlines the mandatory steps needed to set up the manufacturing process, including work centers, work areas, resources, and plant parameters. Plant profiles are part of more administrative configuration and are not directly tied to production execution.

### NEW QUESTION # 24

.....

We have confidence and ability to make you get large returns but just need input small investment. our 1z0-1075-25 study materials provide a platform which help you gain knowledge in order to let you outstanding in the labor market and get satisfying job that you like. The content of our 1z0-1075-25question torrent is easy to master and simplify the important information. It conveys more important information for 1z0-1075-25 Exam with less answers and questions, thus the learning is easy and efficient. We believe our latest 1z0-1075-25 exam torrent will be the best choice for you.
