BTW, DOWNLOAD part of TestSimulate C_ACDET_2506 dumps from Cloud Storage: <https://drive.google.com/open?id=1BY33ZusjLeNmKvBiOLpahEwxqaUI-X0P>

Our C_ACDET_2506 Learning Materials have all kinds of C_ACDET_2506 exam dumps for different exams. And our customers are from the different countries in the world. They give many feedbacks for the C_ACDET_2506 exam dumps, as well as express their thanks for helping them pass the exam successfully. You just need to try the free demo of us, you will know the advantage. We will help you to pass the exam and money back guarantee if you can't pass it.

SAP C_ACDET_2506 Exam Syllabus Topics:

| Topic | Details |
|---------|--|
| Topic 1 | <ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices. |
| Topic 2 | <ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation. |

| | |
|---------|---|
| Topic 3 | <ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction. |

Test C_ACDET_2506 Questions Pdf, C_ACDET_2506 Vce Test Simulator

Practice is one of the essential factors in passing the exam. To perform at their best on the real exam, candidates must use SAP C_ACDET_2506 practice test material. To this end, C_ACDET_2506 has developed three formats to help candidates prepare for their C_ACDET_2506 exam: desktop-based practice test software, web-based practice test, and a PDF format.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q36-Q41):

NEW QUESTION # 36

What is the recommended order of operations for creating a required Flex Master Data (FMD) type field in a project header?

- A. 1. Create the FMD template 2. Load the data 3. Create the FMD type field
- B. 1. Load the data 2. Create the FMD type field 3. Create the FMD template
- **C. 1. Create the FMD template 2. Create the FMD type field 3. Load the data**
- D. 1. Create the FMD type field 2. Create the FMD template 3. Load the data

Answer: C

Explanation:

The correct order is to first create the Flex Master Data (FMD) template, which defines the structure and attributes of the data. Then, create the FMD type custom field in the project header referencing that template. Finally, load the master data records into the template via CSV import. This sequence ensures the field has a valid template to reference, and data is available when users interact with the field.

NEW QUESTION # 37

When you create a custom field, how do you define where the field is added?

- A. The field is added to a project header, identified by the templateClass ID
- B. Each field can be linked to multiple screens, identified via UI GroupClass ID
- **C. The field is added to a class, identified by a class name**
- D. The field is added to a class, identified by the record ID

Answer: C

Explanation:

In SAP Ariba, custom fields are associated with a specific class identified by its class name, such as ContractWorkspace or ProcureLineItem. This class-level association determines where the field is available within the application. When added to a parent class, the field inherits to all its subclasses, affecting all relevant data objects. The field is not linked via UI group IDs, project templates, or record IDs, which relate to different configuration aspects. This class-based design supports consistent data models and inheritance in SAP Ariba's architecture.

NEW QUESTION # 38

Users are able to publish a contract workspace without populating the Supplier field. What action can be performed on the Supplier field to force population before publishing?

- A. Enable Required
- **B. Enable Require value before publish**

- C. Configure a visibility condition
- D. Configure a validity condition

Answer: B

NEW QUESTION # 39

When you have created a new custom field and marked it as reportable, saved and published your changes, but the field does not show up in reports. How can you resolve the issue?

- A. You did not assign the custom field to the appropriate report category.
- B. Custom fields must be created in the same module where reports are generated.
- **C. Run the "Retrieve flexible fields metadata for reporting" task under Reporting Manager.**
- D. Wait 2 hours for the schema to refresh automatically.

Answer: C

Explanation:

After publishing a custom reportable field, the "Retrieve flexible fields metadata for reporting" task must be run to update the reporting schema with the new field metadata. Without this manual step, the reports do not recognize the new field despite it being published. The system does not perform automatic timed refreshes of the schema. Module location or report category assignment is not a prerequisite for report visibility in SAP Ariba's analytics.

NEW QUESTION # 40

While migrating form templates, you successfully exported all templates from the Test site. However, when trying to import them into Production, you cannot find the correct folder. What should you do to proceed without errors?

- **A. Manually create the required folder in the Production site before importing**
- B. Upload the templates to any existing folder regardless of its purpose.
- C. Modify the form template files locally to bypass folder restrictions.
- D. Skip the import and inform the team the templates cannot be migrated.

Answer: A

NEW QUESTION # 41

.....

You can choose the number of SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) questions and time frame of the C_ACDET_2506 Desktop practice exam software as per your learning needs. Performance reports of SAP C_ACDET_2506 Practice Test will be useful for tracking your progress and identifying areas for further study.
