

# Microsoft DP-300 Free Sample & Test DP-300 Registration

P.S. Free & New DP-300 dumps are available on Google Drive shared by BraindumpStudy: <https://drive.google.com/open?id=11-IFJPobWSu07DN2fr4Gg52XmGCCKp-T>

In order to make every customer to get the most suitable method to review DP-300 exam, we provide three versions of the DP-300 exam materials: PDF, online version, and test software. We believe that there is always a kind of method to best help your exam preparation. Each version has a free demo for you to try, and each version has the latest and most comprehensive DP-300 Exam Materials.

Microsoft DP-300 exam is intended for database administrators, database developers, and IT professionals who have experience in administering and managing databases on Microsoft Azure. DP-300 exam covers a range of topics, including implementing and managing security, monitoring and optimizing database performance, implementing high availability and disaster recovery solutions, and managing and maintaining databases. The DP-300 certification is a valuable asset for professionals who want to advance their careers in the field of database administration and gain recognition for their skills in managing relational databases on Microsoft Azure.

Microsoft DP-300 Exam is a part of the Azure certification path, which includes other certification exams such as AZ-900 (Azure Fundamentals), AZ-104 (Microsoft Azure Administrator), and AZ-204 (Developing Solutions for Microsoft Azure). Earning the DP-300 certification demonstrates that the candidate has the necessary skills to administer and manage relational databases on Microsoft Azure, making them a valuable asset to any organization that uses cloud-based database solutions.

## Take Your Exam Preparation to the Next Level with DP-300 Web-Based Practice Test

If you choose our DP-300 exam review questions, you can share fast download. As we sell electronic files, there is no need to ship. After payment you can receive DP-300 exam review questions you purchase soon so that you can study before. If you are urgent to pass exam our exam materials will be suitable for you. Mostly you just need to remember the questions and answers of our Microsoft DP-300 Exam Review questions and you will clear exams. If you master all key knowledge points, you get a wonderful score.

## Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q255-Q260):

### NEW QUESTION # 255

You have an Azure Data Factory instance named ADF1 and two Azure Synapse Analytics workspaces named WS1 and WS2. ADF1 contains the following pipelines:

P1:Uses a copy activity to copy data from a nonpartitioned table in a dedicated SQL pool of WS1 to an Azure Data Lake Storage Gen2 account P2:Uses a copy activity to copy data from text-delimited files in an Azure Data Lake Storage Gen2 account to a nonpartitioned table in a dedicated SQL pool of WS2 You need to configure P1 and P2 to maximize parallelism and performance.

Which dataset settings should you configure for the copy activity of each pipeline? To answer, select the appropriate options in the answer area.

**Answer:**

Explanation:

Explanation

Graphical user interface, text, chat or text message Description automatically generated

P1: Set the Partition option to Dynamic Range.

The SQL Server connector in copy activity provides built-in data partitioning to copy data in parallel.

P2: Set the Copy method to PolyBase

Polybase is the most efficient way to move data into Azure Synapse Analytics. Use the staging blob feature to achieve high load speeds from all types of data stores, including Azure Blob storage and Data Lake Store.

(Polybase supports Azure Blob storage and Azure Data Lake Store by default.) Reference:

<https://docs.microsoft.com/en-us/azure/data-factory/connector-azure-sql-data-warehouse>

<https://docs.microsoft.com/en-us/azure/data-factory/load-azure-sql-data-warehouse>

### NEW QUESTION # 256

You have an Azure SQL Database managed instance named SQLMI1. A Microsoft SQL Server Agent job runs on SQLMI1.

You need to ensure that an automatic email notification is sent once the job completes.

What should you include in the solution?

- **A. From SQL Server Management Studio (SSMS), create a Database Mail profile**
- B. From the Azure portal, create an Azure Monitor action group that has an Email/SMS/Push/Voice action
- C. From SQL Server Configuration Manager (SSMS), enable SQL Server Agent
- D. From SQL Server Management Studio (SSMS), run `sp_set_sqlagent_properties`

**Answer: A**

Explanation:

Explanation

To send a notification in response to an alert, you must first configure SQL Server Agent to send mail.

Using SQL Server Management Studio; to configure SQL Server Agent to use Database Mail:

\* In Object Explorer, expand a SQL Server instance.

\* Right-click SQL Server Agent, and then click Properties.

\* Click Alert System.

\* Select Enable Mail Profile.

\* In the Mail system list, select Database Mail.

\* In the Mail profile list, select a mail profile for Database Mail.

\* Restart SQL Server Agent.

Note: Prerequisites include:

\* Enable Database Mail.

\* Create a Database Mail account for the SQL Server Agent service account to use.

\* Create a Database Mail profile for the SQL Server Agent service account to use and add the user to the `DatabaseMailUserRole` in the `msdb` database.

\* Set the profile as the default profile for the `msdb` database.

<https://docs.microsoft.com/en-us/sql/relational-databases/database-mail/configure-sql-server-agent-mail-to-use-d>

### NEW QUESTION # 257

You have an Azure subscription.

You need to deploy an Azure SQL resource that will support cross database queries by using an Azure Resource Manager (ARM) template.

How should you complete the ARM template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/managed-instance/create-template-quickstart?tabs=azure-power>

### NEW QUESTION # 258

You have an Azure SQL database.

You are reviewing a slow performing query as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/sql/relational-databases/performance/live-query-statistics?view=sql-server-ver15>

### NEW QUESTION # 259

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure SQL database named Sales.

You need to implement disaster recovery for Sales to meet the following requirements:

\* During normal operations, provide at least two readable copies of Sales.

\* Ensure that Sales remains available if a datacenter fails.

Solution: You deploy an Azure SQL database that uses the General Purpose service tier and geo-replication.

Does this meet the goal?

- A. No
- B. Yes

#### Answer: A

Explanation:

Instead deploy an Azure SQL database that uses the Business Critical service tier and Availability Zones.

Note: Premium and Business Critical service tiers leverage the Premium availability model, which integrates compute resources (sqlservr.exe process) and storage (locally attached SSD) on a single node. High availability is achieved by replicating both compute and storage to additional nodes creating a three to four-node cluster.

By default, the cluster of nodes for the premium availability model is created in the same datacenter. With the introduction of Azure Availability Zones, SQL Database can place different replicas of the Business Critical database to different availability zones in the same region. To eliminate a single point of failure, the control ring is also duplicated across multiple zones as three gateway rings (GW).
