CISM Valid Test Pass4sure | CISM Exam Preparation

Desktop Certified Information Security Manager (CISM) practice test software is the first format available at Free4Torrent. This format can be easily used on Windows PCs and laptops. The Certified Information Security Manager (CISM) practice exam software works without an internet connection, with the exception of license verification. One of the excellent features of this Certified Information Security Manager (CISM) desktop-based practice test software is that it includes multiple mock tests that have ISACA CISM practice questions identical to the actual exam, providing users with a chance to get Certified Information Security Manager (CISM) real exam experience before even attempting it.

The CISM exam covers four domains: Information Security Governance, Information Risk Management and Compliance, Information Security Program Development and Management, and Information Security Incident Management. These domains provide a comprehensive and practical framework for managing and implementing effective information security programs. CISM Exam is designed to test the candidate's knowledge, skills, and abilities in these domains, and passing it requires a deep understanding of the concepts and practical application of information security management.

ISACA Certified Information Security Manager Sample Questions (Q654-Q659):

NEW QUESTION # 654

When mitigation is the chosen risk treatment, which of the following roles is responsible for effective implementation of the chosen treatment?

- A. Control owner
- B. Application owner
- C. Risk owner
- D. Business system owner

Answer: A

Explanation:

The control owner is the individual accountable for implementing and managing specific controls that mitigate risks. While the risk owner is responsible for the overall risk and decision-making, it is the control owner who ensures the selected mitigation is effectively implemented and maintained.

"The control owner is responsible for ensuring that the control is properly designed, implemented, and operating effectively."

- CISM Review Manual 15th Edition, Chapter 2: Risk Management, Section: Risk Treatment ISACA practice questions stress this distinction: the control owner is tasked with the execution of mitigation strategies.
