

Microsoft AI-900 Exam Questions - Pass With Confidence!

DOWNLOAD the newest Itcertking AI-900 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=17oCsJglHBUSoMOT2325dW6z75nQKnDvk>

Are you still satisfied with your present job? Do you still have the ability to deal with your job well? Do you think whether you have the competitive advantage when you are compared with people working in the same field? If your answer is no, you are a right place now. Because our AI-900 Exam Torrent will be your good partner and you will have the chance to change your work which you are not satisfied with, and can enhance your ability by our AI-900 guide questions, you will pass the exam and achieve your target.

Describe the Basic Principles of ML on Microsoft Azure (30-35%)

As for this area, it includes the following:

- Identify the major tasks in crafting an ML solution – This subject area measures the students' competence in explaining some concepts, such as basic features of data preparation and ingestion, model management and deployment, model training & evaluation, and feature selection and engineering.
- Identify the basic ML types – This section equips the learners with the ability to identify various concepts, such as regression, clustering, and classification ML scenarios.
- Describe the ML core concepts – You should be able to identify the labels and features within a dataset for ML and describe the usage of validation datasets and training in ML. The applicants also need the ability to explain the usage of ML algorithms in model training, as well as interpret and choose the model evaluation yardsticks for regression and classification.
- Explain the abilities of the No-code ML with Azure ML Learning Studio – This domain equips the individuals with the knowledge of the Azure ML designer and automated ML UI.

Microsoft AI-900 Exam is an excellent certification for individuals who want to demonstrate their knowledge and skills in the field of artificial intelligence and machine learning. It provides a great starting point for individuals who want to pursue a career in this field and is also helpful for professionals who want to stay up-to-date with the latest technological advancements.

Test AI-900 Cram Pdf & AI-900 Intereactive Testing Engine

In the process of using the Microsoft Azure AI Fundamentals study training dumps, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our AI-900 latest questions already have many different kinds of learning materials, users may be confused about the choice, what is the most suitable AI-900 Test Guide? Believe that users will get the most satisfactory answer after consultation. Our online service staff is professionally trained, and users' needs about AI-900 test guide can be clearly understood by them. The most complete online service of our company will be answered by you, whether it is before the product purchase or the product installation process, or after using the AI-900 latest questions, no matter what problem the user has encountered.

Exam AI-900: Microsoft Azure AI Fundamentals

Candidates for this exam should have foundational knowledge of machine learning (ML) and artificial intelligence (AI) concepts and related Microsoft Azure services.

This exam is an opportunity to demonstrate knowledge of common ML and AI workloads and how to implement them on Azure.

This exam is intended for candidates with both technical and non-technical backgrounds. Data science and software engineering experience are not required; however, some general programming knowledge or experience would be beneficial.

Azure AI Fundamentals can be used to prepare for other Azure role-based certifications like Azure Data Scientist Associate or Azure AI Engineer Associate, but it's not a prerequisite for any of them.

Part of the requirements for: Microsoft Certified: Azure AI Fundamentals

Microsoft Azure AI Fundamentals Sample Questions (Q29-Q34):

NEW QUESTION # 29

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Monitoring online service reviews for profanities is an example of natural language processing.	<input type="radio"/>	<input type="radio"/>
Identifying brand logos in an image is an example of natural languages processing.	<input type="radio"/>	<input type="radio"/>
Monitoring public news sites for negative mentions of a product is an example of natural language processing.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Monitoring online service reviews for profanities is an example of natural language processing.	<input checked="" type="radio"/>	<input type="radio"/>
Identifying brand logos in an image is an example of natural languages processing.	<input type="radio"/>	<input checked="" type="radio"/>
Monitoring public news sites for negative mentions of a product is an example of natural language processing.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 30

Match the principles of responsible AI to appropriate requirements.

To answer, drag the appropriate principles from the column on the left to its requirement on the right. Each principle may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

<p>Principles</p> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Fairness</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Privacy and security</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Reliability and safety</div> <div style="border: 1px solid black; padding: 2px;">Transparency</div>	<p>Answer Area</p> <div style="border: 1px dashed black; padding: 2px; margin-bottom: 2px;">The system must not discriminate based on gender, race</div> <div style="border: 1px dashed black; padding: 2px; margin-bottom: 2px;">Personal data must be visible only to approve</div> <div style="border: 1px dashed black; padding: 2px;">Automated decision-making processes must be recorded so that approved users can identify why a decision was made</div>
--	--

Answer:

Explanation:

<p>Principles</p> <div style="border: 1px dashed black; padding: 2px; margin-bottom: 2px;">Fairness</div> <div style="border: 1px dashed black; padding: 2px; margin-bottom: 2px;">Privacy and security</div> <div style="border: 1px dashed black; padding: 2px; margin-bottom: 2px;">Reliability and safety</div> <div style="border: 1px dashed black; padding: 2px;">Transparency</div>	<p>Answer Area</p> <div style="border: 1px dashed red; padding: 2px; margin-bottom: 2px;">Fairness</div> <div style="border: 1px dashed red; padding: 2px; margin-bottom: 2px;">Privacy and security</div> <div style="border: 1px dashed red; padding: 2px;">Transparency</div>	<p>The system must not discriminate based on gender, race</p> <p>Personal data must be visible only to approve</p> <p>Automated decision-making processes must be recorded so that approved users can identify why a decision was made</p>
--	---	---

Explanation

Graphical user interface, text, application, email Description automatically generated

<div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Fairness</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Privacy and security</div> <div style="border: 1px solid black; padding: 2px;">Transparency</div>	<p>The system must not discriminate based on gender, race</p> <p>Personal data must be visible only to approve</p> <p>Automated decision-making processes must be recorded so that approved users can identify why a decision was made</p>

NEW QUESTION # 31

You use Azure Machine Learning designer to build a model pipeline. What should you create before you can run the pipeline?

- A. a compute resource
- B. a registered model
- C. a Jupyter notebook

Answer: A

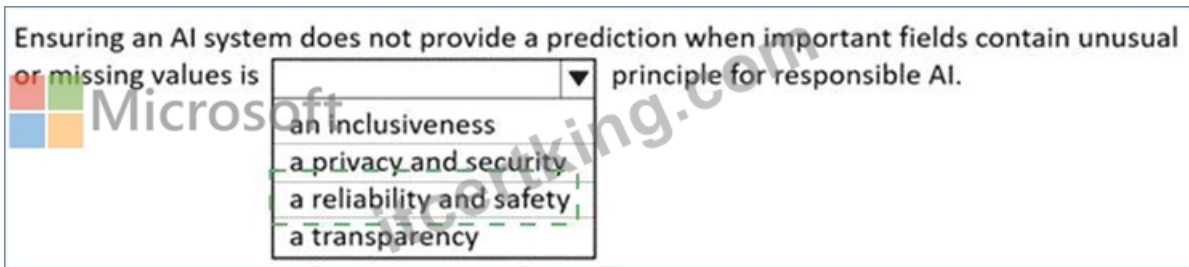

NEW QUESTION # 32

To complete the sentence, select the appropriate option in the answer area.

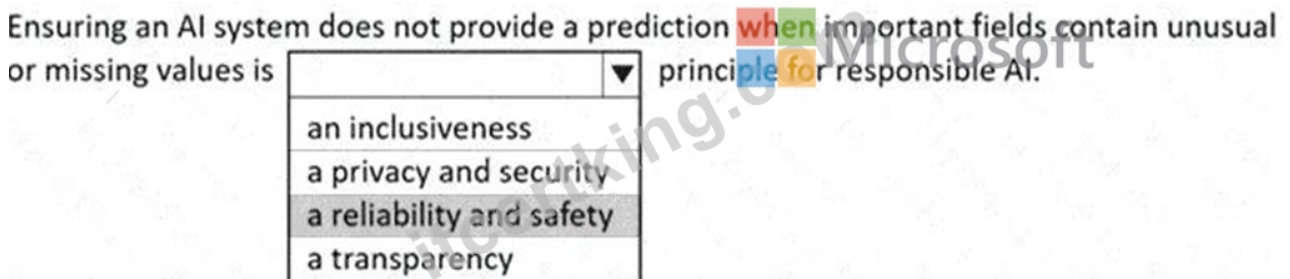

<p>Ensuring an AI system does not provide a prediction when important fields contain unusual or missing values is</p> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;"> <input type="text"/> </div> <div style="border: 1px solid black; padding: 2px;"> <input type="text"/> </div>	<p>principle for responsible AI.</p> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">an inclusiveness</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">a privacy and security</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">a reliability and safety</div> <div style="border: 1px solid black; padding: 2px;">a transparency</div>
---	--

Answer:

Explanation:

Explanation:

According to Microsoft's Responsible AI principles, one of the key guiding values is Reliability and Safety, which ensures that AI systems operate consistently, accurately, and safely under all intended conditions. The AI-900 study materials and Microsoft Learn modules explain that an AI system must be trustworthy and dependable, meaning it should not produce results when the input data is incomplete, corrupted, or significantly outside the expected range.

In the given scenario, the AI system avoids providing predictions when important fields contain unusual or missing values. This behavior demonstrates reliability and safety because it prevents the system from making unreliable or potentially harmful decisions based on bad or insufficient data. Microsoft emphasizes that AI systems must undergo extensive validation, testing, and monitoring to ensure stable performance and predictable outcomes, even when data conditions vary.

The other options do not fit this scenario:

- * Inclusiveness ensures that AI systems are accessible to and usable by all people, regardless of abilities or backgrounds.
- * Privacy and Security focuses on protecting user data and ensuring it is used responsibly.
- * Transparency involves making AI decisions explainable and understandable to humans.

Only Reliability and Safety directly address the concept of an AI system refusing to act or returning an error when it cannot make a trustworthy prediction. This principle helps prevent inaccurate or unsafe outputs, maintaining confidence in the system's integrity. Therefore, ensuring an AI system does not produce predictions when input data is incomplete or unusual aligns directly with Microsoft's Reliability and Safety principle for responsible AI.

NEW QUESTION # 33

What is an example of unsupervised machine learning?

- A. regression
- B. clustering
- C. classification

Answer: B

NEW QUESTION # 34
