Our company has built the culture of integrity from our establishment. You just need to pay the relevant money for the 2V0-11.25 practice materials. Our system will never deduct extra money from your debit cards. Also, your payment information of the 2V0-11.25 Study Materials will be secret. No one will crack your passwords. Our payment system will automatically delete your payment information once you finish paying money for our 2V0-11.25 exam questions.

In order to serve you better, we have offline and online chat service stuff, and any questions about 2V0-11.25 training materials, you can consult us directly or you can send your questions to us by email. In addition, 2V0-11.25 exam dumps of us will offer you free demo, and you can have a try before purchasing. Free demo will help you to have a deeper understanding of what you are going to buy. If you have any question about the 2V0-11.25 Training Materials of us, you can just contact us.

## 2V0-11.25 Test Guide & 2V0-11.25 New Practice Questions

During these years, our PDF version of our VMware 2V0-11.25 study engine stays true to its original purpose to pursue a higher pass rate that has never been attained in the past. And you will be content about our considerate service on our VMware 2V0-11.25 training guide. If you have any question, you can just contact us!

## VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network</li> <li>storage design.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.</li> </ul>

## VMware Cloud Foundation 5.2 Administrator Sample Questions (Q141-Q146):

### NEW QUESTION # 141

A VMware Cloud Foundation administrator notices that the SDDC Manager dashboard shows an alert indicating that one of the ESXi hosts in their workload domain is in a Not Responding state.

What is the first troubleshooting step that should be performed to resolve this issue?

- A. Reboot the ESXi host from the SDDC Manager interface.
- B. Remove and re-add the ESXi host to the workload domain.
- C. Upgrade the ESXi host to the latest version.
- D. Check the network connectivity between the ESXi host and the SDDC Manager.**

### Answer: D

Explanation:

When an ESXi host is in a "Not Responding" state in VMware Cloud Foundation, the first step in troubleshooting is to check the network connectivity between the ESXi host and the SDDC Manager. Network issues (e.g., misconfigured VLANs, firewall settings, or network outages) are often the primary cause of communication problems between SDDC Manager and the ESXi host.

### NEW QUESTION # 142

An administrator needs to ensure that their VMware Cloud Foundation-based private cloud solution can support multi-tenancy for different departments within their organization.

What two configurations and components are necessary to achieve this? (Choose two.)

- A. Deploy Aria Automation to enable self-service provisioning for tenants.
- B. Configure vSAN storage policies for each department.
- C. Use vSphere Resource Pools to allocate resources to different departments.**
- D. Use NSX to create isolated network segments for each tenant.**

**Answer: C,D**

Explanation:

vSphere Resource Pools allow for the allocation of CPU, memory, and storage resources to different departments (tenants) within the VMware Cloud Foundation environment. This ensures that each department has its own dedicated resources, preventing resource contention between them.

NSX can be used to create isolated network segments (logical networks) for each tenant, ensuring network security and segmentation between departments. Each department can have its own isolated network environment.

**NEW QUESTION # 143**

What is the first step in downloading the vSphere CLI tools to a developer workstation?

- A. Register the developer workstation with the Active Directory.
- B. Install a compatible version of Java Runtime Environment
- C. Configure the workstation's network settings to connect to the vSphere environment.
- D. Visit the [VMware Downloads page](#) and locate the vSphere CLI tools.

**Answer: D**

Explanation:

The first step in downloading the vSphere CLI tools is to visit the VMware Downloads page, where the vSphere CLI tools are available. From there, you can select the appropriate version for your environment and begin the download process.

**NEW QUESTION # 144**

An administrator is preparing to deploy VMware Aria Suite Lifecycle using SDDC Manager.

Which three are prerequisites for deploying Aria Suite Lifecycle? (Choose three.)

- A. Ensure that the NTP and DNS settings specified in SDDC Manager are valid for all management components.
- B. Verify that the password for the admin(g>local user account meets the complexity requirements.
- C. Ensure that a custom SSL certificate specifying the FQDN of the appliance is available.
- D. Ensure the VMware Software Install Bundle for VMware Aria Suite Lifecycle is in the local bundle repository.
- E. Ensure that the Application Virtual Networks have been configured.

**Answer: A,C,D**

Explanation:

Ensure that a custom SSL certificate specifying the FQDN of the appliance is available: A custom SSL certificate for the FQDN of the Aria Suite Lifecycle appliance is required for secure communication between components.

Ensure that the NTP and DNS settings specified in SDDC Manager are valid for all management components:

Accurate NTP and DNS settings are crucial for time synchronization and proper domain resolution in the environment.

Ensure the VMware Software Install Bundle for VMware Aria Suite Lifecycle is in the local bundle repository: The required software bundle must be available in the local repository to ensure successful deployment.

**NEW QUESTION # 145**

An administrator has been tasked with adding a new VI workload Domain to an instance of VMware Cloud Foundation (VCF).

The administrator only has two prepared ESXi host servers showing in SDDC Manager.

The new VI Workload Domain must use vSphere Lifecycle Images.

Which three supported principal storage options are available to the administrator when configuring the new VI Workload Domain? (Choose three.)

- A. VSAN
- B. VMFS on local disk
- C. NFS v3
- D. vVols
- E. iSCSI
- F. VMFS on FC

**Answer: C,D,F**

## NEW QUESTION # 146

The latest 2V0-11.25 exam prep is created by our IT experts and certified trainers who are dedicated to VMware braindumps pdf for a long time. All questions of our 2V0-11.25 PDF VCE are written based on the real questions. Besides, we always check the updating of 2V0-11.25 exam questions to make sure exam preparation smoothly.
