Lpi 101-500 Exam is Easy with Our Reliable New 101-500 Braindumps Files: LPIC-1 Exam 101, Part 1 of 2, version 5.0 Efficiently

Our 101-500 exam materials are the product of this era, which conforms to the development trend of the whole era. It seems that we have been in a state of study and examination since we can remember, and we have experienced countless tests. In the process of job hunting, we are always asked what are the achievements and what certificates have we obtained? Therefore, we get the test 101-500 Certification and obtain the qualification certificate to become a quantitative standard, and our 101-500 learning guide can help you to prove yourself the fastest in a very short period of time.

Lpi LPIC-1 Exam 101, Part 1 of 2, version 5.0 Sample Questions (Q111-Q116):

NEW QUESTION # 111

What is contained on the EFI System Partition?

- A. The first stage boot loader
- B. The Linux root file system
- C. The Linux default shell binaries
- D. The default swap space file
- E. The user home directories

Answer: A

NEW QUESTION # 112

The /etc/_____ file lists currently mounted devices.

Answer:

Explanation:

mtab

Explanation

The /etc/mtab file is a system-generated file that lists all the currently mounted devices and their mount options. It is updated automatically by the mount and umount commands. It can be used to check which devices are mounted and where, as well as their filesystem type and mount options. The /etc/mtab file has the same format as the /etc/fstab file, which is a user-edited file that lists the devices that should be mounted at boot time or on demand. References:

NEW QUESTION # 113

You are installing Linux on a workstation for a new employee. Which partition should be largest?

- A. /boot
- B. /usr
- C. /
- D. /lib

Answer: B

NEW QUESTION # 114

What is the default nice level when a process is started using the nice command?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

The default nice level when a process is started using the nice command is 10. This means that the process will have a lower priority than the normal processes, which have a nice level of 0. The nice command allows the user to adjust the priority of a process at the time of its execution. The syntax of the nice command is:

`nice [-n {nice value increment}] [command]`

The -n option specifies the nice value increment, which can be a positive or negative integer in the range of -20 to 19. The command is the name of the program or script to be executed. If the -n option is omitted, the default nice value increment is 10. For example, the following command will run the program ackermann with a nice value of 10:

`nice ./ackermann`

To verify the nice value of a running process, we can use the ps or top commands and look at the NI column.

For example, the following command will show the nice value of the ackermann process:

`ps -el | grep ackermann`

NEW QUESTION # 115

The USB device filesystem can be found under /proc/_____/usb/. (Please fill in the blank with the single word only)

Answer:

Explanation:

bus

Explanation:

The USB device filesystem can be found under /proc/bus/usb/1. This is a virtual filesystem that provides information about the USB devices and buses connected to the system¹². It contains files and directories that correspond to the USB host controllers, hubs, and devices¹². For example, the following output shows the contents of /proc/bus/usb/ on a system with one USB host controller and two USB devices:

```
$ ls -l /proc/bus/usb/
total 0
dr-xr-xr-x 2 root root 0 Jan  1 1970 001
dr-xr-xr-x 2 root root 0 Jan  1 1970 002
-r--r--r-- 1 root root 0 Jan  1 1970 devices
-r--r--r-- 1 root root 0 Jan  1 1970 drivers
```

The directories 001 and 002 represent the USB buses, and each contain files that represent the USB devices on that bus. The file devices contains a summary of all the USB devices and their configurations. The file drivers contains a list of the USB drivers and the devices they are bound to¹².

The `/proc/bus/usb/` filesystem is deprecated and should not be used anymore³. It has been replaced by the `/sys/bus/usb/` filesystem, which is a `sysfs` mount that provides more detailed and structured information about the USB devices and buses³.

1: USB in a NutShell - Chapter 5 - Linux USB 2: Linux USB FAQ 3: Alternative to /proc/bus/usb/devices - Super User : [What is the difference between /dev/usb, /proc/bus/usb and /sys/bus/usb? - Super User]

NEW QUESTION # 116

Before we decide to develop the 101-500 preparation questions, we have made a careful and thorough investigation of the customers. We have taken all your requirements into account. Firstly, the revision process is long if you prepare by yourself. If you collect the keypoints of the 101-500 exam one by one, it will be a long time to work on them. Secondly, the accuracy of the 101-500 Exam Questions And Answers is hard to master. Because the content of the exam is changing from time to time. But our 101-500 practice guide can help you solve all of these problems.
