## Three Formats for Scaled Agile SAFe-SPC Practice Tests

The Scaled Agile Practice Test engine included with SAFe-SPC exam questions simulates the actual SAFe-SPC examinations. This is excellent for familiarizing yourself with the SAFe Practice Consultant SPC (6.0) and learning what to expect on test day. You may also use the Scaled Agile SAFe-SPC online practice test engine to track your progress and examine your answers to determine where you need to improve on the SAFe-SPC exam.

## Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q168-Q173):

#### NEW QUESTION # 168

(select 3) What does relentless improvement, as defined in SAFe, include?

- A. Reflect at key Milestones.
- B. Apply Lean problem-solving tools and techniques.
- C. Optimize the whole.
- D. Hold employee reviews to provide fast feedback.
- E. Hold people accountable.

**Answer: A,B,C**

#### NEW QUESTION # 169

(Select 4) What are legitimate examples of management as an enabling function, rather than as top-down control?

- A. Working with other departments to establish better communication among teams.
- B. Creating an environment of mutual influence.
- C. Developing skills and career paths for team members.
- D. Assigning backlog items to team members.
- E. Creating work breakdown structures.
- F. Assigning team members to handle external dependencies.
- G. Communicating the Solution Vision with the teams.

**Answer: A,B,C,G**

Explanation:

SAFe emphasizes enabling leadership over command-and-control. Legitimate enabling functions include:

B: Communicating vision helps teams align without dictating execution.

C: Facilitating cross-team communication removes barriers, enabling team success.

F: Developing skills and career paths grows team capability and autonomy.

G: Creating mutual influence supports empowerment and innovation.

Options A, D, and E are examples of directive, top-down control-antithetical to Lean-Agile leadership.

SPC 6.0 Guide: "Lean-Agile leaders enable, coach, and develop teams instead of directing their work."

#### NEW QUESTION # 170

What is one way Design Thinking measures success?

- A. Reliable
- B. Desirable
- C. Marketable
- D. Scalable

**Answer: B**

Explanation:

One of the key measures of success in Design Thinking, as highlighted in SAFe, is whether the solution is

"desirable"-that is, if it meets real customer needs. Desirability is one of the three core aspects evaluated (desirable, feasible, viable) in Design Thinking.

#### NEW QUESTION # 171

(Select 2) What factors foster team "Ba"?

- A. Decentralized decision-making.
- B. Built-in instability.

- C. Dunbar's number
- D. Use of Feature Teams.

**Answer: A,B**

Explanation:

"Ba" is a Japanese concept, incorporated into SAFe, referring to a shared context in which knowledge is created. SAFe recognizes two main factors that foster Ba:

Decentralized decision-making (A): Empowers teams to act autonomously, facilitating shared learning and creativity.

Built-in instability (B): Encourages teams to push boundaries and innovate, fueling knowledge creation.

Feature teams and Dunbar's number (team size limits) are important concepts in SAFe, but they do not specifically foster Ba.

"Team 'Ba' is fostered by decentralizing decision-making and by intentionally creating a degree of built-in instability to promote knowledge creation and innovation." (Source: SAFe 6.0 Framework: The Power of 'Ba'; SPC 6.0 Guide, "Becoming a Lean-Agile Leader")

#### NEW QUESTION # 172

(Select 3) Which of the following have acceptance criteria?

- A. Program Epics
- B. Enabler Features
- C. Portfolio Enabler Epics
- D. Spikes
- E. Strategic Themes
- F. Business Capabilities

**Answer: A,B,F**

Explanation:

A). Business Capabilities: In SAFe, Capabilities (including Business Capabilities) are large solution behaviors that have acceptance criteria to ensure they are fully defined and testable.

D). Enabler Features: All Features, including Enabler Features, require acceptance criteria to clarify when the Feature is done.

F). Program Epics: Epics require acceptance criteria to define the conditions for completion and evaluation.

Portfolio Enabler Epics (B) have a higher-level definition and are not typically assigned granular acceptance criteria. Strategic Themes (C) and Spikes (E) do not have acceptance criteria; Spikes are research items.
