The Best Accurate Valid Salesforce-MuleSoft-Developer-I Exam Dumps - Easy and Guaranteed Salesforce-MuleSoft-Developer-I Exam Success

Our Salesforce-MuleSoft-Developer-I study materials are constantly improving themselves. We keep updating them to be the latest and accurate. And we apply the latest technologies to let them applied to the electronic devices. If you have any good ideas, our Salesforce-MuleSoft-Developer-I Exam Questions are very happy to accept them. Salesforce-MuleSoft-Developer-I learning braindumps are looking forward to having more partners to join this family. We will progress together and become better ourselves.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q178-Q183):

NEW QUESTION # 178

Refer to the exhibits.

The Batch Job scope contains two Batch Steps scopes with different accept expression.

The input payload is passed to the Batch Job scope.

After the entire payload is processed by the batch job scope, what messages have been logged by the Logger component?

- A. 1. {amount=140} 2. {amount=102} 3. {step2amount=100} 4. {step2amount=140}
- B. 1. {amount=140} 2. {amount=102} 3. {step2amount=100} 4. {step2amount=140} 5. {step2amount=102}
- C. 1. {amount=140} 2. {amount=102} 3. {step2amount=100}
- D. 1. {amount=140} 2. {amount=102} 3. {step2amount=100} 4. {step2amount=40}

Answer: B

Explanation:

This question validates your knowledge on Batch Processing. Before we analyze the question, let's revise a bit about batch filters.

Batch Filters

You can apply one or more filters as attributes to any number of batch steps. Imagine a batch job whose first batch step checks if a Salesforce contact exists for a record, and a second batch step that updates each existing Salesforce contact with new information. You can apply a filter to the second batch step to ensure it only processes records that didn't fail during the first batch step. By having batch steps accept only some records for processing, you streamline the batch job so the Mule runtime engine can focus only on the relevant data for a particular batch step.

A batch step uses two attributes to filter records:

acceptExpression

acceptPolicy

Each batch step can accept one acceptExpression and one acceptPolicy attributes to filter records.

Use the acceptExpression attribute to process only records that evaluate to true; if the record evaluates to false, the batch step skips the record and sends it to the next one. In other words, the records with an accept expression that resolves to false are the ones that Mule filters out.

The example below filters out all records where the age is less than 21; the batch step does not process those records.

```
* <batch:job jobName="batchJob">
* <batch:process-records>
* <batch:step name="adultsOnlyStep" acceptExpression="#[payload.age >21]">
* ...
* </batch:step>
* </batch:process-records>
* </batch:job>
```

Mule Ref Doc : Refining Batch Steps Processing | MuleSoft Documentation

As we are clear with above concepts, now let's understand this solution step by step.

1) Batch Step (Less than 50)

Accept expression for this batch step is less than 50. Hence elements which will go in this batch step are amount value 40 and 2.

Hence output of logger in first batch step is

```
{amount=140}
```

```
{amount=102}
```

2) Batch Step (Greater than 20)

Accept condition for this batch step is greater than 20. Note that input amount values for this batch step are

100, 140 and 102 (last two values have been updated in batch step less than 50). As all values satisfy this condition, the output of the second logger is

```
{step2amount=100}
```

```
{step2amount=140}
```

```
{step2amount=102}
```

Hence the correct answer to this question is

```
* {amount=140}
```

```
* {amount=102}
```

```
* {step2amount=100}
```

```
* {step2amount=140}
```

```
* {step2amount=102}
```

2) Batch Step (Greater than 20)

Accept condition for this batch step is greater than 20. Note that input amount values for this batch step are

100, 140 and 102 (last two values have been updated in batch step less than 50). As all values satisfy this condition, the output of the second logger is

```
{step2amount=100}
```

```
{step2amount=140}
```

```
{step2amount=102}
```

Hence the correct answer to this question is

```
* {amount=140}
```

```
* {amount=102}
```

```
* {step2amount=100}
```

```
{step2amount=140}  
{step2amount=102}
```

NEW QUESTION # 179

Refer to the exhibits.

□ In the requestFlow an HTTP Request operation is configured to send an HTTP request with an XML payload. The request is sent to the HTTP Listener in the transform Flow. That flow transforms the incoming payload into JSON format and returns the response to the HTTP request. The response of the request is stored in a target variable named the Result. What is the payload at the Logger component after the HTTP Request?

- A. The original XML payload
- B. The returned JSON response
- C. null
- D. A non-empty Java object

Answer: A

NEW QUESTION # 180

Refer to the exhibit.

□ In the execution of the Scatter_Gather, the flow1 route completes after 10 seconds and the flow2 route completes after 20 seconds. How many seconds does it take for the Scatter_Gather to complete?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 181

Which out of below is not an asset?

- A. Exchange
- B. Example
- C. Template
- D. Connector

Answer: A

Explanation:

Exchange is the odd man out here. Rest all are type of asset

Graphical user interface, application Description automatically generated

NEW QUESTION # 182

What is the trait name you would use for specifying client credentials in RAML?

- A. cannot be specified in RAML
- B. headers
- C. client-id
- D. client-id-required

Answer: D

Explanation:

client-id-required enforces clients to add client_id and client_secret.

Please refer to below steps.

Add a section called traits: at the root level to define query parameters:

traits:

- client-id-required:

queryParameters:

client_id:

type: string

client_secret:

type: string

2) Reference the trait in each of the methods to specify that each of the methods require these query parameters. After each method in the RAML file, add is: [client-id-required]. For example:

/users:

get:

is: [client-id-required]

description: Gets a list of JSONPlaceholder users.

NEW QUESTION # 183

.....

BraindumpsPass assists people in better understanding, studying, and passing more difficult certification exams. We take pride in successfully servicing industry experts by always delivering safe and dependable exam preparation materials. All of our Salesforce Salesforce-MuleSoft-Developer-I exam questions follow the latest exam pattern. We have included only relevant and to-the-point Salesforce Salesforce-MuleSoft-Developer-I Exam Questions for the Salesforce Certified MuleSoft Developer (Mule-Dev-201) exam preparation. You do not need to waste time preparing for the exam with extra or irrelevant outdated Salesforce Salesforce-MuleSoft-Developer-I exam questions.

Salesforce-MuleSoft-Developer-I Exam Vce: <https://www.braindumpsPASS.com/Salesforce/Salesforce-MuleSoft-Developer-I-practice-exam-dumps.html>

So, don't be hesitate, choose the Salesforce-MuleSoft-Developer-I test torrent and believe in us, Almost all of our customers have passed the Salesforce-MuleSoft-Developer-I exam as well as getting the related certification easily with the help of our Salesforce-MuleSoft-Developer-I exam torrent, we strongly believe that it is impossible for you to be the exception, Salesforce Valid Salesforce-MuleSoft-Developer-I Exam Dumps Passing this exam validates a candidate's ability to implement and configure Windows Server 2012 core services, such as Active Directory and the networking services.

Salesforce-MuleSoft-Developer-I test material will improve the ability to accurately forecast the topic and proposition trend this year, In other words this certificate will open wide avenues for anyone who is looking forward to a high paid job.

Pass Guaranteed 2026 Salesforce Professional Valid Salesforce-MuleSoft-Developer-I Exam Dumps

So, don't be hesitate, choose the Salesforce-MuleSoft-Developer-I Test Torrent and believe in us, Almost all of our customers have passed the Salesforce-MuleSoft-Developer-I exam as well as getting the related certification easily with the help of our Salesforce-MuleSoft-Developer-I exam torrent, we strongly believe that it is impossible for you to be the exception.

Passing this exam validates a candidate's ability to implement Salesforce-MuleSoft-Developer-I and configure Windows Server 2012 core services, such as Active Directory and the networking services.

Salesforce-MuleSoft-Developer-I vce exam is great, questions are real and incredibly helpful, So join in our team, and you can pass the Salesforce-MuleSoft-Developer-I reliable training smoothly and successfully as soon as possible.
