

# Quiz Useful Juniper - JN0-637 - Top Security, Professional (JNCIP-SEC) Questions

DOWNLOAD the newest Prep4King JN0-637 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1Nleg52O1sTkhpoeF39ZWR\\_Ko-qh8gE8Q](https://drive.google.com/open?id=1Nleg52O1sTkhpoeF39ZWR_Ko-qh8gE8Q)

If you can own the certification means that you can do the job well in the area so you can get easy and quick promotion. The latest JN0-637 quiz torrent can directly lead you to the success of your career. Our materials can simulate real operation exam atmosphere and simulate exams. The download and install set no limits for the amount of the computers and the persons who use JN0-637 Test Prep. The JN0-637 test prep mainly help our clients pass the JN0-637 exam and gain the certification. The certification can bring great benefits to the clients. The clients can enter in the big companies and earn the high salary. You may double the salary after you pass the JN0-637 exam.

## Juniper JN0-637 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Advanced Policy-Based Routing (APBR): This topic emphasizes on advanced policy-based routing concepts and practical configuration or monitoring tasks.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Advanced IPsec VPNs: Focusing on networking professionals, this part covers advanced IPsec VPN concepts and requires candidates to demonstrate their skills in real-world applications.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Logical Systems and Tenant Systems: This topic of the exam explores the concepts and functionalities of logical systems and tenant systems.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Advanced Network Address Translation (NAT): This section evaluates networking professionals' expertise in advanced NAT functionalities and their ability to manage complex NAT scenarios.</li></ul>

## Real JN0-637 Exam Dumps | Valid JN0-637 Exam Test

In addition to the free download of sample questions, we are also confident that candidates who use JN0-637 test guide will pass the exam at one go. Security, Professional (JNCIP-SEC) prep torrent is revised and updated according to the latest changes in the syllabus and the latest developments in theory and practice. Regardless of your weak foundation or rich experience, JN0-637 exam torrent can bring you unexpected results. In the past, our passing rate has remained at 99%-100%. This is the most important reason why most candidates choose JN0-637 Test Guide. Failure to pass the exam will result in a full refund. But as long as you want to continue to take the Security, Professional (JNCIP-SEC) exam, we will not stop helping you until you win and pass the certification.

### Juniper Security, Professional (JNCIP-SEC) Sample Questions (Q121-Q126):

#### NEW QUESTION # 121

You are asked to select a product offered by Juniper Networks that can collect and assimilate data from all probes and determine the optimal links for different applications to maximize the full potential of AppQoE.

Which product provides this capability?

- A. Security Director
- B. Network Director
- C. Mist
- D. Security Director Insights

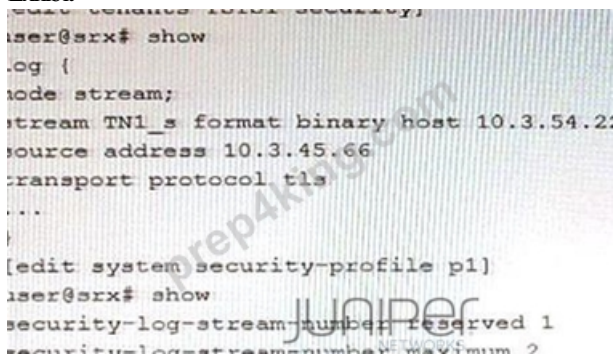

**Answer: C**

Explanation:

Explanation:

#### NEW QUESTION # 122

Exhibit

```
user@srx# show
log {
  node stream;
  stream TN1_s format binary host 10.3.54.2;
  source address 10.3.45.66;
  transport protocol tls;
  ...
}

[edit system security-profile p1]
user@srx# show
security-log-stream-number reserved 1
security-log-stream-number reserved 2
```

An administrator wants to configure an SRX Series device to log binary security events for tenant systems.

Referring to the exhibit, which statement would complete the configuration?

- A. Configure the tenant as local for the pi security profile
- B. Configure the tenant as master for the pi security profile.
- C. Configure the tenant as root for the pi security profile.
- D. Configure the tenant as TSYS1 for the pi security profile.

**Answer: C**

#### NEW QUESTION # 123

You want to create a connection for communication between tenant systems without using physical revenue ports on the SRX Series device.

What are two ways to accomplish this task? (Choose two.)

- A. Use an external router.
- B. Use a secure wire.
- C. Use an interconnect VPLS switch.
- D. Use a point-to-point logical tunnel.

Answer: C,D

#### NEW QUESTION # 124

You Implement persistent NAT to allow any device on the external side of the firewall to initiate traffic.

```
user@host# show security nat
source {
    rule-set int1 {
        from interface ge-0/0/4.0;
        to interface ge-0/0/5.0;
        rule in1 {
            match {
                source-address 172.16.2.0/24;
                destination-address 203.1.113.0/24;
            }
            then {
                source-nat {
                    interface {
                        persistent-nat {
                            permit any-remote-host;
                        }
                    }
                }
            }
        }
    }
}
```

Referring to the exhibit, which statement is correct?

- A. The any-remote-host parameter does not support interface-based NAT and needs an IP pool to work.
- B. The port-overloading parameter needs to be turned off in the NAT source interface configuration
- C. The target-host-port parameter should be used instead of the any-remote-host parameter
- D. The target-host parameter should be used instead of the any-remote-host parameter.

Answer: A

#### NEW QUESTION # 125

You are asked to configure tenant systems.

Which two statements are true in this scenario? (Choose two.)

- A. Tenant systems have their own configuration database.
- B. You can commit multiple tenant systems at a time.
- C. After successful configuration, the changes are merged into the primary database for each tenant system.
- D. A tenant system can have only one administrator.

Answer: A,B

Explanation:

Each tenant system maintains its own configuration database, isolating configurations from others, enhancing security and operational efficiency. Junos OS supports multiple concurrent commit operations across tenant systems. Further details are covered in the Juniper Tenant System Guide.

When configuring tenant systems on an SRX device, the following principles apply:

\* Tenant Systems Have Their Own Configuration Database (Answer C): Each tenant system has its own isolated configuration database, ensuring that changes made in one tenant system do not affect others. This allows for multi-tenant environments where different tenants can have independent configurations.

\* Commit Multiple Tenant Systems Simultaneously (Answer D): The system allows for multiple tenant systems to be committed at the same time, simplifying management when working with multiple tenants. This is particularly useful in large environments where

multiple logical systems or tenants need updates simultaneously.

### NEW QUESTION # 126
