## Chrome-Enterprise-Administrator Latest Exam Pattern - Chrome-Enterprise-Administrator Reliable Test Simulator

Our Chrome-Enterprise-Administrator exam questions have a very high hit rate, of course, will have a very high pass rate. Before you select a product, you must have made a comparison of your own pass rates. Our Chrome-Enterprise-Administrator study materials must appear at the top of your list. And our Chrome-Enterprise-Administrator learning quiz has a 99% pass rate. This is the result of our efforts and the best gift to the user. Our Chrome-Enterprise-Administrator Study Materials can have such a high pass rate, and it is the result of step by step that all members uphold the concept of customer first. If you use a trial version of Chrome-Enterprise-Administrator training prep, you will want to buy it!

## Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Analyze Chrome Data:</b> This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Chrome Extensions:</b> This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Chrome Enterprise Management Fundamentals:</b> This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Chrome Updates:</b> This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Manage Chrome Enterprise in the Cloud:</b> This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.</li> </ul>

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q42-Q47):

### NEW QUESTION # 42

The security team has a request to approve two extensions with similar functionality. They only want to approve one extension for use in the environment to avoid redundancy. What is an objective measurement that the security team can use to help determine which extension may be safer to use?

- A. Chrome Manifest Version
- B. Chrome Web Store Ratings
- C. Permission Count
- **D. 3rd Party Risk Score**

**Answer: D**

Explanation:

A "3rd Party Risk Score" provides an objective assessment of the extension's security and privacy risks, often based on automated analysis of its code, requested permissions, developer reputation, and other factors. This is a more data-driven approach to evaluating safety compared to simply counting permissions (which doesn't account for the sensitivity of each permission), the Manifest version (which indicates features but not necessarily safety), or Chrome Web Store ratings (which are subjective and can be manipulated).

### NEW QUESTION # 43

In Chrome's Safe Browsing settings, which option provides the most robust protection against online threats and is suitable for a highly secure environment?

- A. Advanced Threat Protection
- B. Proactive Defense
- C. Secure Browsing Mode
- **D. Enhanced Protection**

**Answer: D**

Explanation:

Among the Safe Browsing options, **Enhanced Protection** offers the most robust security. It proactively checks URLs, downloads, and extensions against Google's Safe Browsing database in real time, and it can also share more data with Google to improve detection and provide personalized warnings. This level of protection is best suited for environments with high security requirements. The other options might represent different levels of Safe Browsing with varying degrees of protection.

#### NEW QUESTION # 44

How often do extensions update'?"

- A. Extensions update immediately whenever the developer publishes a new version to the Chrome Web Store, regardless of whether Chrome is running
- B. When Chrome is not running, the update occurs within the first few minutes of OS loading and then again every few hours when a new version is available in the Chrome Web Store, even when Chrome is not running
- C. Extensions only update when the user manually initiates the update process from the Chrome Web Store's extension management page
- **D. When Chrome is running, the update occurs within the first few minutes of launching Chrome and then again every few hours Updates occur when users sign into the Chrome Web Store**

**Answer: D**

Explanation:

Chrome checks for extension updates periodically when the browser is running. This check typically happens within the first few minutes of launching Chrome and then again every few hours. While updates are triggered by developers publishing to the Chrome Web Store, the actual update on the user's browser happens when Chrome is active and performs these periodic checks. Option A is incorrect as extensions generally don't update when Chrome is not running. Option C describes a manual update process, which is not the default behavior. Option D is incorrect because the update on the user's end is dependent on Chrome being active and checking for updates.

#### NEW QUESTION # 45

An administrator wants users to have the ability to install extensions of their choosing. However, due to company security policies, the administrator cannot allow any extension to be installed that has the ability to read documents on the local drive. Which policy combination best meets the administrator's need?

- A. Chrome Webstore: Block all apps, admin manages allowlist; Block extensions by permission: Sync File System
- B. Chrome Webstore: Allow all apps, admin manages blocklist; Runtime Blocked Hosts: file:///\*
- **C. Chrome Webstore: Allow all apps, admin manages blocklist; Block extensions by permission: File System**
- D. Chrome Webstore: Allow all apps, admin manages blocklist; Runtime Blocked Hosts: C:\\*

**Answer: C**

Explanation:

To allow users to install extensions while blocking those with specific risky permissions, the administrator should "Allow all apps" from the Chrome Web Store and then use the "Block extensions by permission" policy to block extensions that request the "File System" permission. This prevents extensions from accessing local files. Option A is too restrictive by blocking all apps by default. Options B and D use "Runtime Blocked Hosts," which is for controlling access to specific websites, not for blocking extension permissions.

#### NEW QUESTION # 46

A company is managing browsers in the Google Admin console. Security has scanned extensions in the organization and has determined that there are several extensions installed with ability to set proxy. This violates company policy. How would an administrator block these extensions'?"

- A. Send an email to the users notifying them that they must uninstall the detected extensions
- B. Set policy in the Google Admin console to block all extensions from being installed on the browser
- **C. Set permission policy in the Google Admin console to block such extensions**
- D. Remotely connect to each device and delete the extension from the browser

**Answer: C**

Explanation:

The Google Admin console allows administrators to control extension permissions. By configuring the "Permissions and URL access" policy, the administrator can block extensions that request specific permissions, such as the ability to set a proxy. This is a centralized and effective way to enforce the security policy. Remotely connecting to each device (option B) is not scalable. Blocking all extensions (option C) might be too restrictive. Relying on users to uninstall (option D) is not enforceable.

## NEW QUESTION # 47

.....

In order to prevent your life from regret and remorse, you should seize every opportunity which can change lives possibly. Did you do it? Test4Cram's Google Chrome-Enterprise-Administrator exam training materials can help you to achieve your success. We can help you pass the Google Chrome-Enterprise-Administrator Exam smoothly.
