Updated NSK300 CBT | NSK300 Exam Price

Our NSK300 study prep is classified as three versions up to now. All these versions of our NSK300 exam braindumps are popular and priced cheap with high quality and accuracy rate. They achieved academic maturity so that their quality far beyond other practice materials in the market with high effectiveness and more than 98 percent of former candidates who chose our NSK300 Practice Engine win the exam with their dream certificate.

Netskope NSK300 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Netskope Platform Implementation: This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.
Topic 2	<ul style="list-style-type: none">Netskope Platform Monitoring: This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.
Topic 3	<ul style="list-style-type: none">Netskope Platform Management: This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.

Topic 4	<ul style="list-style-type: none"> • Cloud Security Solutions: This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.
Topic 5	<ul style="list-style-type: none"> • Netskope Platform Troubleshooting: This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.

Netskope Certified Cloud Security Architect Sample Questions (Q10-Q15):

NEW QUESTION # 10

Review the exhibit.

A user has attempted to upload a file to Microsoft OneDrive that contains source code with PII and PCI data.

Referring to the exhibit, which statement is correct?

- **A. The user will be blocked and a separate incident will be generated for each of the matching DLP profiles.**
- B. The user will be blocked and a single Incident will be generated referencing the DLP-PCI profile.
- C. The user will be alerted and a single incident will be generated referencing the DLP-PII profile.
- D. The user will be blocked and a single Incident will be generated referencing all of the matching DLP profiles

Answer: A

Explanation:

In the given scenario, a user is attempting to upload a file containing sensitive PII and PCI data to Microsoft OneDrive. The Netskope Security Cloud provides real-time data and threat protection when accessing cloud services, websites, and private apps from anywhere, on any device. Based on the exhibit provided, different DLP (Data Loss Prevention) profiles are triggered - DLP-SourceCode, DLP-PCI, and DLP-PII. Each of these profiles has specific actions associated with them; for instance, an alert is generated for Source Code while blocking actions are initiated for PCI and PII data. Since multiple DLP profiles are triggered due to the sensitive nature of the content in the file being uploaded, separate incidents will be generated for each matching profile ensuring comprehensive security coverage and incident reporting.

NEW QUESTION # 11

You are designing a Netskope deployment for a company with a mixture of endpoints, devices, and services.

In this scenario, what would be two considerations for using IPsec as part of the design? (Choose two.)

- A. corporate-managed Mac computers
- B. remote unmanaged Windows PCs
- **C. guest Wi-Fi network users**
- **D. Internet-connected IoT devices**

Answer: C,D

NEW QUESTION # 12

You successfully configured Advanced Analytics to identify policy violation trends. Upon further investigation, you notice that the activity is NULL. Why is this happening in this scenario?

- A. The REST API v1 token has expired.

- B. A policy violation was identified using API Protection.
- C. The SSPM policy was not configured during setup.
- D. A user accessed a static Web page.

Answer: D

Explanation:

The reason for the activity being NULL in this scenario is likely because a user accessed a static Web page. In Netskope's Advanced Analytics, when the activity is reported as NULL, it often indicates that there was no dynamic interaction or transaction to record, which is typical when a static web page is accessed¹. Static web pages do not generate the kind of events or activities that are tracked by policies, hence they appear as NULL in the activity field.

This explanation is supported by the Netskope Knowledge Portal, which mentions that applications fields with null values indicate incidents generated from web traffic, such as accessing static web pages². Further information on interpreting NULL values in Advanced Analytics reports can be found in the Netskope documentation¹.

NEW QUESTION # 13

What is a Fast Scan component of Netskope Threat Detection?

- A. Heuristic Analysis
- B. Machine Learning
- C. Dynamic Analysis
- D. Static Analysis

Answer: B

Explanation:

The Fast Scan component of Netskope Threat Detection utilizes Machine Learning to quickly detect and block malware in real-time. This is part of Netskope's multi-layered security approach, which includes various engines to defend against a wide range of threats. The Fast Scan capability specifically leverages machine learning-based detection for rapid analysis and response to potential threats¹.

NEW QUESTION # 14

You are currently designing a policy for AWS S3 bucket scans with a custom DLP profile. Which policy action(s) are available for this policy?

- A. Alert, Quarantine, Block, User Notification
- B. Alert, Quarantine
- C. Alert, User Notification
- D. Alert only

Answer: B

Explanation:

When designing a policy for AWS S3 bucket scans with a custom DLP profile in Netskope, the available policy actions are Alert and Quarantine. These actions allow you to be notified when a policy violation occurs and to quarantine sensitive data to prevent potential data loss or exposure. The Alert action will notify the designated personnel or system when a match to the DLP profile is found during the scan. The Quarantine action will move the offending file to a secure location where it can be reviewed and dealt with appropriately¹.

The information about policy actions for AWS S3 bucket scans is available in the Netskope documentation, which provides guidance on creating API Data Protection policies for scanning S3 buckets and the actions that can be taken when a policy is triggered¹.

NEW QUESTION # 15

.....

Netskope PDF Questions can be used anywhere or at any time. You can download NSK300 dumps pdf files on your laptop, tablet, smartphone, or any other device. Practicing with Web-based and desktop NSK300 practice test software, you will get a strong grip on every Netskope NSK300 exam topic. You can take multiple Netskope NSK300 Practice Exam attempts and

identify and overcome your mistakes. Furthermore, through Netskope NSK300 practice test software you will improve your time-management skills. You will easily manage your time while attempting the actual NSK300 test.
