Sharing-and-Visibility-Architect Mock Test | Sharing-and-Visibility-Architect Cheap Dumps

Sharing-and-Visibility-Architect exam certification is very useful in your daily work in IT industry. When you decide to attend the Sharing-and-Visibility-Architect exam test, it is not an easy thing at begin. First, you should have a detail study plan and have a basic knowledge of the Sharing-and-Visibility-Architect actual test. Here, Salesforce Sharing-and-Visibility-Architect test pdf dumps are recommended to you for preparation. Sharing-and-Visibility-Architect Pdf Torrent will tell you the basic question types in the actual test and give the explanations where is available. With the help of the Sharing-and-Visibility-Architect vce dumps, you will be confident to attend the Sharing-and-Visibility-Architect actual test and get your certification with ease.

Salesforce Sharing-and-Visibility-Architect Certification is considered one of the most challenging and prestigious certifications in the Salesforce ecosystem. It requires a deep understanding of the Salesforce platform, as well as the ability to design and implement complex sharing and visibility scenarios. Salesforce Certified Sharing and Visibility Architect certification is highly valued by organizations that use Salesforce and is often a requirement for senior-level roles in Salesforce administration or development.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q47-Q52):

NEW QUESTION # 47

Universal Containers uses 75,000 distributors that have close to 1 million total users. Distributors need to use the community to see closing opportunities assigned to their distributor for delivery.

Which license recommendation will meet distributor needs?

- A. Customer Community
- **B. Partner Community**
- C. Customer Community Plus

Answer: B

Explanation:

The Partner Community license is designed for use cases requiring access to Opportunities, Campaigns, Leads, and other sales-related records. In this scenario:

- * Distributors need to use the community to see closing Opportunities.
- * The Partner Community license is optimized for external users involved in a sales process, like distributors, and offers full access to the Opportunity object.
- * Option A: Customer Community Plus provides limited access to objects and is not suitable for collaboration on sales records like Opportunities.
- * Option C: Customer Community licenses are insufficient because they don't support access to Opportunities.

Community Licenses Overview

NEW QUESTION # 48

At Universal Containers, there's a team of auditors distributed throughout the organization that all need access to high-value opportunities.

With a Private sharing model, which option should an architect recommend when designing a solution for this requirement?

- A. Add the auditors to the default Opportunity Team.
- **B. Create a criteria-based sharing rule to grant a public group access to high-value opportunities.**
- C. Put the auditors at the highest level of the Role Hierarchy.

Answer: B

NEW QUESTION # 49

Universal Containers created a public group with certain sales engineers to help on complex deals, as well as a sharing rule to grant access to these opportunities. The Opportunity organization-wide default is Private, What is the impact of these sharing settings?

- A. Sales engineers and their managers in the Role Hierarchy will also have access to these records.
- **B. Subordinates of managers who have sales engineers in the public group will also have access to these records.**
- C. Other sales engineers who are in the same Role Hierarchy as the sales engineers of the public group will also have access to these records.

Answer: B

NEW QUESTION # 50

Dreamforce presenters need to be able to edit their presentation details (summary, presenter biographies, etc) on a private custom object in Salesforce (Presentation). All presenters for a presentation are captured on a Presenters junction object between Presenter and User.

How can this be accomplished?

- **A. Trigger on Presenter junction object that uses Apex Managed sharing to add or remove access to the related Presentation record.**
- B. Trigger on Presenter junction object that adds the user to the Sales Team for the Presentation record.
- C. Give Edit rights to the Presentation record via a Permission set that is given to the Presenters for a record.

Answer: A

NEW QUESTION # 51

Universal Containers has expanded to sell virtual containers for data storage. Virtual container work orders are provisioned immediately by the system and therefore cannot be changed by a sales rep.

What is an optimal approach to implement these requirements?

- A. Change the Record Type/Page Layout assignment for Work Orders to Read Only.
- **B. Remove the Work Order Edit permission from the Sales Representative profile.**
- C. Implement a sharing rule that changes access for all Work Orders to Read.

Answer: B

Explanation:

To ensure that sales representatives cannot modify virtual container work orders, the most effective approach is to adjust their profile permissions by removing the 'Edit' access for the Work Order object.

Profiles in Salesforce control object-level permissions, determining whether a user can create, read, edit, or delete records of a particular object. By configuring these permissions appropriately, administrators can enforce data security and integrity.

In this scenario, since virtual container work orders are provisioned immediately and should remain unaltered by sales reps, removing the 'Edit' permission ensures that these users have read-only access to the Work Order records. This setup prevents unauthorized modifications while allowing sales reps to view necessary information.

Implementing a sharing rule to change access for all Work Orders to 'Read' (Option A) is not suitable, as sharing rules are designed to open up record access beyond the default sharing settings; they cannot restrict permissions beyond what is defined in profiles or permission sets. Modifying the Record Type/Page Layout assignment (Option B) to make fields read-only affects only the layout and user interface, not the underlying object permissions, and can be bypassed by users with 'Edit' rights.

Therefore, the optimal solution is to adjust the sales representatives' profile by removing their 'Edit' permission on the Work Order object, aligning with best practices for managing object-level security in Salesforce.

For more detailed information on configuring object-level security and profiles, refer to the Salesforce documentation:
