Free PDF Quiz NSE8_812 - Perfect Fortinet NSE 8 - Written Exam (NSE8_812) Latest Dumps Files

We provide 3 versions of our Fortinet NSE 8 - Written Exam (NSE8_812) exam torrent and they include PDF version, PC version, APP online version. Each version's functions and using method are different and you can choose the most convenient version which is suitable for your practical situation. For example, the PDF version is convenient for you to download and print our NSE8_812 test torrent and is suitable for browsing learning. If you use the PDF version you can print our NSE8_812 Guide Torrent on the papers and it is convenient for you to take notes. You learn our NSE8_812 test torrent at any time and place. The PC version can stimulate the real exam's environment, is stalled on the Windows operating system and runs on the Java environment. You can use it at any time to test your own exam stimulation tests scores and whether you have mastered our NSE8_812 guide torrent or not.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q47-Q52):

NEW QUESTION # 47

A remote worker requests access to an SSH server inside the network. You deployed a ZTNA Rule to their FortiClient. You need to follow the security requirements to inspect this traffic.

Which two statements are true regarding the requirements? (Choose two.)

- A. FortiGate can perform SSH access proxy host-key validation.
- B. SSH traffic is tunneled between the client and the access proxy over HTTPS
- C. You need to configure a FortiClient SSL-VPN tunnel to inspect the SSH traffic.
- D. Traffic is discarded as ZTNA does not support SSH connection rules

Answer: A,B

Explanation:

ZTNA supports SSH connection rules that allow remote workers to access SSH servers inside the network through an HTTPS tunnel between the client and the access proxy (FortiGate). The access proxy acts as an SSH client to connect to the real SSH server on behalf of the user, and performs host-key validation to verify the identity of the server. The user can use any SSH client that supports HTTPS proxy settings, such as PuTTY or OpenSSH.

NEW QUESTION # 48

A customer would like to improve the performance of a FortiGate VM running in an Azure D4s_v3 instance, but they already purchased a BYOL VM04 license.

Which two actions will improve performance the most without making a FortiGate license change? (Choose two.)

- A. Migrate the FortiGate to an Azure F4s_v2.
- B. Migrate the FortiGate to an Azure D8s_v3.
- C. Enable SR-IOV on the FortiGate.
- D. Enable "Accelerated networking" on the Azure network interfaces.

Answer: A,D

NEW QUESTION # 49

Refer to the exhibit.

You are deploying a FortiGate 6000F. The device should be directly connected to a switch. In the future, a new hardware module providing higher speed will be installed in the switch, and the connection to the FortiGate must be moved to this higher-speed port. You must ensure that the initial FortiGate interface connected to the switch does not affect any other port when the new module is installed and the new port speed is defined.

How should the initial connection be made?

- A. Connect the switch on any interface between ports 1 to 4
- B. Connect the switch on any interface between ports 21 to 24
- C. Connect the switch on any interface between ports 5 to 8.
- D. Connect the switch on any interface between ports 25 to 28

Answer: D

NEW QUESTION # 50

Refer to the exhibit, which shows the high availability configuration for the FortiAuthenticator (FAC1).

Based on this information, which statement is true about the next FortiAuthenticator (FAC2) member that will join an HA cluster with this FortiAuthenticator (FAC1)?

- A. FAC2 can only process requests when FAC1 fails.
- B. FSSO sessions from FAC1 will be synchronized to FAC2.
- C. The FortiToken license will need to be installed on the FAC2.
- D. FAC2 can have its HA interface on a different network than FAC1.

Answer: B

Explanation:

When FortiAuthenticator operates in cluster mode, it provides active-passive failover and synchronization of all configuration and data, including FSSO sessions, between the cluster members. Therefore, if FAC1 is the active unit and FAC2 is the standby unit, any FSSO sessions from FAC1 will be synchronized to FAC2. If FAC1 fails, FAC2 will take over the active role and continue to process the FSSO sessions. References: <https://docs.fortinet.com/document/fortiauthenticator/6.1.2/administration-guide/122076/high-availability>

NEW QUESTION # 51

Refer to the exhibit.

A customer wants FortiClient EMS configured to deploy to 1500 endpoints. The deployment will be integrated with FortiOS and there is an Active Directory server.

Given the configuration shown in the exhibit, which two statements about the installation are correct? (Choose two.)

- A. You can only deploy initial installations to Windows clients.
- B. You must use Standard or Enterprise SQL Server rather than the included SQL Server Express
- C. A client can be eligible for multiple enabled configurations on the EMS server, and one will be chosen based on first priority
- D. The Windows clients only require "File and Printer Sharing" allowed and the rest is handled by Active Directory group policy
- E. If no client update time is specified on EMS, the user will be able to choose the time of installation if they wish to delay.

Answer: A,C

Explanation:

B is correct because a client can be eligible for multiple enabled configurations on the EMS server, and one will be chosen based on first priority. This is explained in the FortiClient EMS Administration Guide under Deployment & Installers > Manage Deployment > Managing deployment configuration priority levels. C is correct because you can only deploy initial installations to Windows clients using FortiClient EMS. This is also explained in the FortiClient EMS Administration Guide under Deployment & Installers > Deploying FortiClient software to endpoints. Reference: <https://docs.fortinet.com/document/forticlient/7.0.7/ems-administration-guide/278884/deployment-installers> <https://docs.fortinet.com/document/forticlient/7.0.7/ems-administration-guide/374506/deploying-forticlient-software-to-endpoints>

NEW QUESTION # 52

.....

We are never satisfied with the present situation and expand and update the NSE8_812 exam practice guide by all means. We focus on the innovation and organize our expert team to compile new knowledge points and update the test bank. We treat our clients as our god and treat their supports to our NSE8_812 Study Materials as our driving forces to march forward. So the clients can enjoy the results of the latest innovation on NSE8_812 exam questions and achieve more learning resources. The credits belong to our diligent and dedicated professional innovation team and our experts.
