## New C\_BCBAI\_2509 Exam Duration | Valid C\_BCBAI\_2509 Exam Testking

Life is short for each of us, and time is precious to us. Therefore, modern society is more and more pursuing efficient life, and our C\_BCBAI\_2509 exam materials are the product of this era, which conforms to the development trend of the whole era. It seems that we have been in a state of study and examination since we can remember, and we have experienced countless tests, including the qualification examinations we now face. In the process of job hunting, we are always asked what are the achievements and what certificates have we obtained? Therefore, we get the test SAP certification and obtain the qualification certificate to become a quantitative standard, and our C\_BCBAI\_2509 learning guide can help you to prove yourself the fastest in a very short period of time.

## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q55-Q60):

NEW QUESTION # 55

Match the outcomes in the dropdown lists to the capabilities of Joule

**Answer:**

Explanation:

### NEW QUESTION # 56

In Custom AI Adoption (CAIA) with SAP, what is the correct order of steps?

**Answer:**

Explanation:

### NEW QUESTION # 57

What are some value propositions of the generative AI hub? Note: There are 2 correct answers to this question.

- A. Scalability and compliance of business documents
- **B. Secure and compliant frameworks**
- C. Preconfigured content
- **D. Enterprise-grade orchestration of models**

**Answer: B,D**

Explanation:

The Generative AI hub offers key value propositions, including secure and compliant frameworks and enterprise-grade orchestration of models, as highlighted in SAP Business AI documentation. Secure and compliant frameworks ensure that generative AI models operate within strict data protection and regulatory standards, such as GDPR, safeguarding sensitive information. Enterprise-grade orchestration of models enables businesses to manage and deploy multiple AI models efficiently, ensuring scalability and performance across diverse use cases. Preconfigured content is not a primary feature of the Generative AI hub, and scalability and compliance of business documents are more aligned with SAP Document AI. These capabilities make the Generative AI hub a robust solution for enterprise AI needs.

### NEW QUESTION # 58

(How is extension building simplified in SAP S/4HANA? Note: There are 2 correct answers to this question.)

- A. By explaining legacy code
- B. By using Joule
- **C. By using a guided wizard**
- **D. By using business context**

**Answer: C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Extension building in SAP S/4HANA is simplified by using a guided wizard in tools like SAP Build Code for step-by-step development, and by leveraging business context to ground extensions in relevant data and processes, ensuring clean core principles and seamless integration.

Exact extracts supporting this:

Guided wizard: "SAP Build has been designed as the optimal way to extend SAP S/4HANA Cloud... with guided processes."news.sap.com "Creating an SAP S/4HANA extension app in 60 minutes with guided wizards."community.sap.com

Business context: "Extend SAP S/4HANA in the cloud and on premise with ABAP-based extensions using business context."community.sap.com "This guide provides a simplified introduction to extending SAP's Enterprise Resource Planning (ERP) offerings using business context."help.sap.com Other options are incorrect because:

Option A: Joule assists in code generation and explanation but is not the primary method for simplifying extension building; wizards and context are emphasized.

Option D: Explaining legacy code is a Joule feature but applies more to migration than direct extension simplification in S/4HANA. Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Community blog "SAP S/4HANA Extensibility - Simplified Guide for Beginners" and SAP Help Portal "Getting Started with

Extensibility." These position guided wizards and business context as key simplifiers for extensions in S/4HANA, aligned with C\_BCBAI\_2502 certification.

### NEW QUESTION # 59

(What are some essential value propositions of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Use of extensive business data extracted from areas including Finance, Supply Chain, Procurement, and Human Resources.
- B. Training of large multi-modal foundation models based on customer-specific business data.
- C. Use of the best technology on the market and strategic partnerships with industry leaders.
- D. Deployment of Joule, an advanced AI copilot, to help interpret business data and provide intelligent responses to business inquiries
- E. Replacement of human workers with AI agents to reduce cost and human error.

**Answer: A,C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The essential value propositions of SAP Business AI emphasize its relevance through grounding in extensive business data across key areas like Finance, Supply Chain, Procurement, and Human Resources, reliability via utilization of leading technology and strategic collaborations with industry leaders, and transformative capabilities with tools like Joule, the advanced AI copilot that interprets business data and delivers intelligent responses to inquiries. These propositions position SAP Business AI as a solution that drives efficiency, innovation, and productivity without aiming to replace human workers but rather to augment them, while avoiding training foundation models directly on customer-specific data to uphold privacy and ethics.

Exact extracts supporting this:

Use of extensive business data: "AI is grounded in business data and embedded into every business function, driving impact..

Industry-specific benefits: Drives value across functions like supply chain (agile, resilient, customer-centric), procurement (optimize spend, reduce risk), finance (manage risk, ensure compliance), HR (employee engagement, faster hiring)...".sap.com "With SAP Business AI, we are building the system of intelligence with three core principles: relevant, reliable, and responsible. Relevant SAP's AI..."news.sap.com "SAP Business AI provides reliable, accurate, and secure generative AI that is grounded in customers' business data..."learning.sap.com Deployment of Joule: "AI-powered scenarios: Access to over 230 AI-powered scenarios, expanding to 400 by the end of 2025, with Joule enabling navigational and transactional tasks up to 90% faster.".sap.com "Process procurement data searches 95% faster with Joule... Speed up HR tasks 90% faster with Joule in SAP SuccessFactors... Complete sales tasks 80% faster with Joule in SAP Sales Cloud.".sap.com Use of best technology and partnerships: "SAP Business AI provides reliable, accurate, and secure... we established an AI foundation..."learning.sap.com "Reliable: built on best technology and partnerships..."news.sap.com Other options are incorrect because:

Option B: SAP does not train large multi-modal foundation models on customer-specific data; instead, it grounds AI in business data using techniques like retrieval-augmented generation (RAG) to ensure privacy, as "Customer data is not shared with third-party large language model (LLM) providers for training their models." (from related ethics, but aligned with value props focusing on secure grounding rather than training).

Option E: SAP's propositions focus on augmentation and collaboration, not replacement, as "Solve complex challenges with AI agents that securely collaborate across your entire business... Helps teams get more done faster and more efficiently with AI that understands business processes and data.".sap.com Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the official SAP Business AI product page and SAP Learning course "Discovering SAP Business AI," specifically units on articulating the value of SAP Business AI, which highlight relevance (data grounding), reliability (tech and partnerships), and tools like Joule as core propositions for integrating AI into the SAP Business Suite. Additional support from SAP News blogs on unlocking potential with SAP Business AI, aligned with C\_BCBAI\_2502 certification materials.

### NEW QUESTION # 60

.....

For candidates who are going to attend the exam, the pass rate is quite important. C\_BCBAI\_2509 training materials of us are pass guaranteed, and if you can't pass the exam one time, we are money back guaranteed. Besides C\_BCBAI\_2509 training materials are verified by skilled experts, therefore the quality and accuracy can be guaranteed, and you can use the C\_BCBAI\_2509 Exam Dumps at ease. We also have online and offline chat service stuff, if any other questions, please contact us, we will give a reply to you as quickly as possible.
