Our Cybersecurity-Architecture-and-Engineering study materials are designed carefully. We have taken all your worries into consideration. Also, we adopt the useful suggestions about our Cybersecurity-Architecture-and-Engineering study materials from our customers. Now, our study materials are out of supply. Thousands of people will crowd into our website to choose the Cybersecurity-Architecture-and-Engineering study materials. So people are different from the past. Learning has become popular among different age groups. Our Cybersecurity-Architecture-and-Engineering Study Materials truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our Cybersecurity-Architecture-and-Engineering study materials a chance? Our products will live up to your expectations.

By contrasting with other products in the industry, our Cybersecurity-Architecture-and-Engineering test guide really has a higher pass rate, which has been verified by many users. As long as you use our Cybersecurity-Architecture-and-Engineering exam training I believe you can pass the exam. If you fail to pass the exam, we will give a full refund. Cybersecurity-Architecture-and-Engineering learning guide hopes to progress together with you and work together for their own future. The high passing rate of Cybersecurity-Architecture-and-Engineering exam training also requires your efforts. If you choose Cybersecurity-Architecture-and-Engineering test guide, I believe we can together contribute to this high pass rate.

Updated WGU Questions Ensure Thorough Cybersecurity-Architecture-and-Engineering Exam Preparation

Fortunately, there's no need to worry anymore. Now you can access and analyze your Cybersecurity-Architecture-and-Engineering exam dumps by using the resourceful and well-researched WGU Cybersecurity Architecture and Engineering (KFO1/D488) exam questions that is available only on BraindumpsIT. This easy-to-use Cybersecurity-Architecture-and-Engineering practice material encompasses the whole syllabus and its users find it very competitive as its Real Cybersecurity-Architecture-and-Engineering Questions are specially BraindumpsIT in this field. Each candidate has a different style of learning and preparation. They find it beneficial to pursue their desired study pattern for improved results.

WGU Cybersecurity Architecture and Engineering (KFO1/D488) Sample Questions (Q85-Q90):

NEW QUESTION # 85
Which IT department goal would support business goals?

- A. Overseeing funds flowing through the organization
- B. Interviewing applicants for marketing positions
- C. Promoting the company's products and services
- D. Developing an online shopping cart for company products

Answer: D

Explanation:
The goal of an IT department that directly supports business goals is to develop technological solutions that enable and enhance the company's business operations. Developing an online shopping cart for company products directly supports the business goal of facilitating online sales. This involves:
* E-commerce functionality: Enabling customers to browse, select, and purchase products online.
* User experience: Creating a seamless and user-friendly shopping experience to drive sales.
* Integration: Ensuring the shopping cart integrates with backend systems like inventory and order management.
This development aligns with business goals by enabling revenue generation through online sales.

* Efraim Turban, Judy Whiteside, David King, and Jon Outland, "Introduction to Electronic Commerce and Social Commerce," Springer.
* Laudon, K.C. and Traver, C.G., "E-commerce 2020-2021: Business, Technology, Society," Pearson.

NEW QUESTION # 86
An organization wants to ensure that its website is free of certain vulnerabilities before the final handoff to the client. What testing method should the organization use to inspect traffic and detect potential issues?

- A. Port scanner
- B. HTTP interceptor
- C. Bastion scanner

Answer: C

Explanation:
A bastion scanner is a tool or hardened system that inspects network traffic and identifies security vulnerabilities, particularly those visible from an external (internet-facing) viewpoint. It plays a key role in post-development assessment.
OWASP Testing Guide v4.2:
"Use bastion hosts or hardened scanners to perform vulnerability assessments from an attacker's perspective." This option is preferable for final validation before system release, especially when looking for exposure from the public internet.
#WGU Course Alignment:
Domain: System Security Engineering
Topic: Evaluate hardened systems and scanning tools during release validation

NEW QUESTION # 87

Which two benefits do computer networks provide for businesses?
Choose 2 answers

- A. Improved information security
- B. Lower IT operations costs
- C. Increased business efficiency
- D. Organization cost savings
- E. Increased Internet communications speed

Answer: B

NEW QUESTION # 88

A company is concerned about advanced persistent threats and wants to implement a security solution that can detect any unusual actions. The company wants to analyze the actions and trends of users and entities to identify any potential security risks.
Which security technology meets the needs of the company?

- A. Antivirus tools
- B. User and entity behavior analytics (UEBA)
- C. Two-factor authentication
- D. Hardware security module (HSM)

Answer: B

Explanation:
The correct answer is A - User and entity behavior analytics (UEBA).
WGU Cybersecurity Architecture and Engineering (KFO1 / D488) explains that UEBA tools analyze patterns of user and entity behavior to detect anomalies that could indicate insider threats, compromised accounts, or advanced persistent threats (APTs). UEBA focuses on deviations from normal activity patterns to identify risks that traditional signature-based systems might miss.
HSMs (B) protect cryptographic keys but do not monitor behavior. Antivirus tools (C) detect known malware but do not perform behavioral analytics. Two-factor authentication (D) secures access but does not detect unusual behavior patterns.
Reference Extract from Study Guide:
"User and entity behavior analytics (UEBA) identifies potential security threats by analyzing deviations from typical user and system activity patterns."
- WGU Cybersecurity Architecture and Engineering (KFO1 / D488), Threat Detection Technologies

NEW QUESTION # 89

An IT organization recently implemented a hybrid cloud deployment. The security team must be able to correlate event data combined from different sources in a central location.
What is the best solution?

- A. File integrity monitoring (FIM)
- B. Data loss prevention (DLP)
- C. Intrusion detection system (IDS)
- D. Security information and event management (SIEM)

Answer: D

Explanation:
The correct answer is D - Security information and event management (SIEM).
According to WGU Cybersecurity Architecture and Engineering (KFO1 / D488), a SIEM collects and correlates event data from multiple sources (such as cloud and on-premises environments) in real-time. It provides centralized visibility, analysis, and alerting, which is critical in hybrid cloud deployments.
File integrity monitoring (A) watches for unauthorized file changes, not event correlation. DLP (B) protects sensitive data but does not correlate events. IDS (C) detects network intrusions but does not combine event data centrally.
Reference Extract from Study Guide:
"Security information and event management (SIEM) systems collect, normalize, correlate, andanalyze security event data from

multiple sources, providing centralized monitoring and alerting."
- WGU Cybersecurity Architecture and Engineering (KFO1 / D488), Security Monitoring and Event Management

NEW QUESTION # 90

......

We are so proud to tell you that according to the statistics from the feedback of all of our customers, the pass rate among our customers who prepared for the exam under the guidance of our WGU Cybersecurity Architecture and Engineering (KFO1/D488) test torrent has reached as high as 98% to 100%, which definitely marks the highest pass rate in the field. Therefore, the Cybersecurity-Architecture-and-Engineering guide torrent compiled by our company is definitely will be the most sensible choice for you. We can assure you that you can pass the exam as well as getting the related certification in a breeze with the guidance of our WGU Cybersecurity Architecture and Engineering (KFO1/D488) test torrent, now I would like to introduce some details about our Cybersecurity-Architecture-and-Engineering Guide Torrent for you.
