NEW QUESTION # 129
You have a computer that runs Windows 10 and contains two local users named User! and User2. You need to ensure that the users can perform the following anions:
* User 1 must be able to adjust the date and time.
* User2 must be able to clear Windows logs.
The solution must use the principle of least privilege.
To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 130
You have a Microsoft 365 E5 subscription and 100 unmanaged iPad devices.
You need to deploy a specific iOS update to the devices. Users must be prevented from manually installing a more recent version of iOS.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Create a compliance policy.
- B. Enroll the devices in Microsoft Intune by using the Intune Company Portal.
- C. Create an iOS app provisioning profile.
- D. Enroll the devices in Microsoft Intune by using Apple Business Manager.
- E. Create a device configuration profile.

Answer: D,E

Explanation:
To deploy a specific iOS update to the unmanaged iPad devices, you need to perform the following actions:
Enroll the devices in Microsoft Intune by using Apple Business Manager. Apple Business Manager is a service that allows you to enroll and manage iOS/iPadOS devices in bulk. You can use Apple Business Manager to assign devices to Microsoft Intune and enroll them as supervised devices. Supervised devices are devices that have more management features and restrictions than unsupervised devices. You can also use Apple Business Manager to create device groups and assign roles and permissions12.
Create a device configuration profile. A device configuration profile is a policy that you can create and assign in Microsoft Intune to

configure settings on your devices. You can use a device configuration profile to manage software updates for iOS/iPadOS supervised devices. You can choose to deploy the latest update or an older update, specify a schedule for the update installation, and delay the visibility of software updates on the devices34.

The other options are not correct for this scenario because:

Enrolling the devices in Microsoft Intune by using the Intune Company Portal is not suitable for unmanaged devices. The Intune Company Portal is an app that users can download and install on their personal or corporate-owned devices to enroll them in Microsoft Intune. However, this method requires user interaction and consent, and does not enroll the devices as supervised devices5.

Creating a compliance policy is not necessary for this scenario. A compliance policy is a policy that you can create and assign in Microsoft Intune to evaluate and enforce compliance settings on your devices. You can use a compliance policy to check if the devices meet certain requirements, such as minimum OS version, encryption, or password settings. However, a compliance policy does not deploy or manage software updates on the devices6.

Creating an iOS app provisioning profile is not relevant for this scenario. An iOS app provisioning profile is a file that contains information about the app and its distribution method. You can use an iOS app provisioning profile to deploy custom or line-of-business apps to your iOS/iPadOS devices by using Microsoft Intune. However, an iOS app provisioning profile does not affect the software updates on the devices7.

NEW QUESTION # 131

Hotspot Question

You have a Microsoft 365 subscription that contains a user named User1. The subscription contains devices enrolled in Microsoft Intune as shown in the following table.

Microsoft Edge is available on all the devices.

Intune has the device compliance policies shown in the following table.

The Compliance policy settings are configured as shown in the exhibit. (Click the Exhibit tab.)

You create the following Conditional Access policy:

- Name: Policy1
- Assignments
o Users and groups: User1
o Cloud apps or actions: Office 365 SharePoint Online
- Access controls
o Grant: Require device to be marked as compliant
- Enable policy: On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.
