## SAP C\_S4CPB\_2502関連資格知識、C\_S4CPB\_2502難易度受験料

今の社会では、高い効率の仕方を慣れんでいます。あなたはSAPのC\_S4CPB\_2502資格認定のために、他人より多くの時間がかかるんですか？ JapancertのC\_S4CPB\_2502問題集を紹介させていただきます。C\_S4CPB\_2502は専門家たちが長年の経験で研究分析した勉強資料です。受験生のあなたを助けて時間とお金を節約したり、C\_S4CPB\_2502試験に速く合格すると保証します。

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition 認定 C\_S4CPB\_2502 試験問題 (Q13-Q18):

### 質問 # 13

What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. SAP Signavio Process Collaboration Hub
- **B. Digital Discovery Assessment**
- C. Business Driven Configuration Questionnaire
- D. SAP Signavio Journey Modeler

正解: B

### 質問 # 14

Where do you find industry cloud solutions to address a customer's unique requirement?

- A. SAP Signavio Process Navigator
- **B. SAP Business Technology Platform**
- C. SAP Store
- D. SAP Discovery Center

正解: B

### 質問 # 15

What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- **A. SAP Signavio Process Collaboration Hub**
- B. Business Driven Configuration Questionnaire
- C. Digital Discovery Assessment
- D. SAP Signavio Journey Modeler

正解: A

解説:

A partner line of business configuration expert plays a crucial role in preparing for Fit-to-Standard workshops, which are pivotal in aligning SAP S/4HANA Cloud Public Edition's capabilities with the customer's business requirements. To identify and select relevant business processes for discussion in these workshops, the expert would reference:

\* SAP Signavio Process Collaboration Hub: This tool serves as a comprehensive repository and collaboration platform for business process documentation and best practices. It provides detailed insights into various business processes, including their steps, variations, and best practices, as established in the SAP ecosystem. By referencing the SAP Signavio Process Collaboration Hub, a line of business configuration expert can identify relevant standard business processes that SAP S/4HANA Cloud supports, which should be covered during the Fit-to-Standard workshops. This ensures that the workshops focus on processes critical to the customer's operations and that any gaps or customization needs are identified early in the implementation phase.

### 質問 # 16

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, where do you look next?

- **A. SAP Business Accelerator Hub**
- B. SAP Business Technology Platform

- C. SAP Cloud ALM
- D. SAP Discovery Center

正解: A

解説:

If you cannot find a prepackaged solution process that addresses integration requirements in SAP Signavio Process Navigator, you should look next at the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content that can help you to connect SAP S/4HANA Cloud Public Edition with other SAP and non-SAP applications. You can browse, search, and filter the available integration packages, scenarios, and APIs, and access the relevant documentation and configuration guides<sup>1</sup>. The SAP Business Accelerator Hub also provides links to the SAP Integration Suite tools, such as SAP Cloud Integration, SAP API Management, and SAP Cloud Integration Automation Service, that you can use to implement and manage the integrations<sup>2</sup>.

The other options are not the correct places to look for integration requirements. SAP Discovery Center is a portal that helps you to discover, try, and buy SAP solutions and services<sup>3</sup>. SAP Business Technology Platform is a platform that enables you to extend, integrate, and build applications in the cloud<sup>4</sup>. SAP Cloud ALM is a cloud-based application lifecycle management tool that supports you in implementing, operating, and enhancing your cloud solutions<sup>5</sup>. References = SAP Business Accelerator Hub, SAP S/4HANA Cloud Public Edition - Integration, SAP Discovery Center, SAP Business Technology Platform, SAP Cloud ALM.

#### 質問 # 17

Which of the following systems are used to implement SAP S/4HANA Cloud Public Edition for a customer?

Note: There are 3 correct answers to this question.

- A. Trial system
- B. Test system
- C. Starter system
- D. Development system
- E. Sandbox system

正解: B、C、E

解説:

\* Sandbox system: This is an optional system that can be used to explore the SAP S/4HANA Cloud Public Edition capabilities and features before the implementation project starts. It is not connected to the starter system or the test system and does not have any data migration or configuration tools. It can be refreshed on demand by the customer<sup>1</sup>.

\* Starter system: This is the first system that is provisioned for the customer after the contract is signed.

It is used to perform the fit-to-standard workshops, where the customer validates the standard processes and identifies the gaps and requirements. It also serves as the configuration system, where the customer configures the business processes using the SAP Central Business Configuration tool. The starter system is connected to the test system and can transfer the configuration and master data to it<sup>2</sup>.

\* Test system: This is the second system that is provisioned for the customer after the starter system is configured. It is used to perform the integration testing, user acceptance testing, data migration, and cutover activities. It also serves as the production system, where the customer runs the live business processes after the go-live. The test system is connected to the starter system and can receive the configuration and master data from it<sup>3</sup>.

The systems that are not used to implement SAP S/4HANA Cloud Public Edition for a customer are:

\* Trial system: This is a system that can be used to experience the SAP S/4HANA Cloud Public Edition solution for a limited time. It is not connected to any other system and does not have any data migration or configuration tools. It is not part of the implementation project and does not require a contract<sup>4</sup>.

\* Development system: This is a system that can be used to develop custom applications or extensions using the SAP Business Technology Platform. It is not part of the SAP S/4HANA Cloud Public Edition landscape and does not have any data migration or configuration tools. It requires a separate contract and license.
