HPE7-A06認證題庫 - HPE7-A06考題套裝

想要通過 HPE7-A06 認證考試並不是僅僅依靠與考試相關的書籍就可以辦到的。與其盲目地學習考試要求的相關知識，不如做一些有價值的試題。VCESoft 為您提供一個明確的和特殊的解決方案，我們為您提供詳細的 HP HPE7-A06 的問題和答案。我們的專家來自不同地區有經驗的技術專家編寫 HPE7-A06 考古題。我們的 HPE7-A06 考古題是我們經過多次測試和整理得到的擬真題，確保考生順利通過HPE7-A06 考試。

最新的 Aruba Certified Professional - Campus Access HPE7-A06 免費考試真題 (Q51-Q56):

問題 #51

You want to use OSPF to advertise a only .\16 summary route for the SVIs below to a neighbor In the same area (area 0). Which configuration will achieve this?

- A. □
- B. □

- C. □
- D. □
- E. □

答案： D

解題說明：

The goal is to configure OSPF on a router so that it advertises only a 10.1.0.0/16 summary route for the specific SVIs (VLAN 11, 12, 13, assumed to be within the 10.1.x.x range) to its OSPF neighbors within the same area (Area 0).

* OSPF Intra-Area Behavior: A fundamental principle of OSPF (link-state protocols) is that all routers within the same area must have an identical Link State Database (LSDB) for that area. This means all routers learn about all the specific networks (Type-1 Router LSAs, Type-2 Network LSAs) within their area. OSPFv2 does not support summarizing routes in a way that hides specific network LSAs from other routers within the same area. Summarization occurs only at area boundaries (by ABRs using Type-3 Summary LSAs via the area range command) or for external routes redistributed into OSPF (by ASBRs using Type-5 External LSAs via the summary-address command).

* Analysis of Options:

* A) area 0 range 10.1.0.0/16: This command is used on an Area Border Router (ABR) to summarize routes originating from Area 0 when advertising them into another area (e.g., the backbone). It does not affect LSA flooding within Area 0. It also includes redistribute connected, which is unrelated here.

* B) summary-address 10.1.0.0/16: This command is used on an Autonomous System Boundary Router (ASBR) to summarize external routes being redistributed into OSPF. It is not used for summarizing internal OSPF routes like SVIs defined within an OSPF area.

* C) & D) summary-address 10.1.0.0/16: Same issue as B; incorrect command for summarizing internal OSPF routes.

* E) area 0 range 10.1.0.0/16: Similar to A, this uses the area range command. It correctly shows the SVIs configured for OSPF Area 0 first. However, like A, this command performs inter-area summarization on an ABR and does not suppress the specific LSAs within Area 0.

* Conclusion: The question asks for something that OSPFv2 cannot do: advertise only a summary route within the same area while suppressing specifics. Therefore, none of the configurations will achieve the exact stated outcome. However, if the question is flawed and intends to ask which configuration uses the correct command structure for summarizing internal OSPF routes (even if only effective between areas), then the area range command is the relevant one. Both A and E use this command. Option E is slightly better structured as it shows the interfaces being added to OSPF Area 0 first. Assuming this is the intended direction despite the impossibility of the specific request, E is the most plausible choice among the given options.

References: RFC 2328 (OSPFv2), OSPF Configuration Guides for AOS-CX (explaining area range for ABRs and summary-address for ASBRs). This relates to the "Routing" (16%) objective.

問題 #52

An HPE Aruba networking ClearPass server needs to be added in the configuration where Downloadable User Roles (DUR) are used.

What are the prerequisites for the AOS-CX Switch for DUR? (Choose two.)

- A. Empty role names need to be present on the switch
- B. A valid server certificate is required for the AOS-CX Switch.
- C. The ClearPass server needs to be added as FQDN
- D. The ClearPass server can be added as IP or FQDN.
- E. A valid root certificate is required for the AOS-CX switch.

答案： D,E

解題說明：

For Downloadable User Roles (DUR), the AOS-CX switch must trust ClearPass, which requires a valid root certificate installed on the switch. The ClearPass server can be configured either by IP address or FQDN, allowing the switch to establish secure communication for DUR downloads. A server certificate on the switch itself or empty roles are not required.

問題 #53

What is the most secure way to configure HPE Aruba Networking access points for employee/guest access?

- A. Configure VLANs to segregate employee and guest traffic but use the same default password for all VLANs.
- B. Use separate SSIDs for employee and guest access and configure an HPE Aruba Networking ClearPass Policy Manager for guest authentication.

- C. Use WPA2 Enterprise encryption with a RADIUS server but use a weak pre-shared key (PSK) for the RADIUS server.
- D. Use a single SSID for employee and guest access and configure a captive portal for guest access.

答案: B

解題說明:

Separate SSIDs ensure traffic segregation between employees and guests.

Employees can use 802.1X with WPA2/WPA3-Enterprise for secure authentication via RADIUS.

Guests can be directed to ClearPass Guest Captive Portal for secure onboarding and controlled access.

This provides the highest level of security and policy enforcement compared to the other options.

問題 #54

Refer to the four numbered steps in the exhibit.

Which action is the first step in applying a role-to-role ACL on the traffic from mobile device M1 to role H2?

- A. The edge switch acts as the intermediate node and transfers the Group Policy ID over static VXLAN to dynamic VXLAN tunnel and forwards the packet to switch A1.
- B. The AP forwards the packet from M1 to gateway 1.
- C. Gateway 1 forwards the traffic over the static VXLAN tunnel to the edge switch, this packet carries the Group Policy ID corresponding to the role of M1.
- D. Switch A1 determines the destination role based on destination MAC or destination IP and enforces role-to-role ACLs.

答案: B

解題說明:

The question asks for the first step in applying a role-to-role ACL (Access Control List) on traffic from a mobile device (M1) to a role (H2) in a network using Dynamic Segmentation with VXLAN and role-based policies.

* Analysis of Options:

* Option A: Describes an intermediate step where the edge switch transfers the Group Policy ID over VXLAN, which occurs later in the process.

* Option B: Correct. The first step is the AP forwarding the packet from the mobile device (M1) to the gateway, which initiates the traffic flow in a tunneled Dynamic Segmentation setup.

* Option C: Describes a later step where the destination switch (A1) enforces the role-to-role ACL, after the packet has traversed the network.

* Option D: Describes a step where the gateway forwards traffic over a VXLAN tunnel, which occurs after the AP forwards the packet.

* Why Option B is Correct: In HPE Aruba Networking's Dynamic Segmentation architecture, wireless clients (e.g., M1) connect to an AP, which tunnels traffic to a gateway (e.g., in tunneled mode). The first step in the traffic flow is the AP forwarding the client's packet to the gateway, which then processes the packet for role assignment and policy enforcement. This aligns with the role-to-role ACL application process, where the gateway applies policies based on the source (M1's role) and destination (H2's role) using Group Policy IDs over VXLAN.

* Relevance to Certification Objectives:

* Security (10%): Involves designing and troubleshooting role-based security policies in customer networks.

* WLAN (9%): Includes implementing and troubleshooting wireless traffic flows in Dynamic Segmentation.

* Switching (19%): Covers Layer 2/3 interconnection technologies like VXLAN for policy enforcement.

問題 #55

You are implementing a network using Zero-Touch Provisioning (ZTP) to deploy the gateways.

What are two requirements for the connection to the switchport? (Choose two.)

- A. You must use port GE 0/0/1 on the gateway
- B. The gateway needs to be provided an IP address through DHCP
- C. The switchport needs to be untagged with Internet access
- D. The switchport needs to be configured with IP address 172.16.0.254
- E. Jumbo frames must be enabled

答案: B,C

解題說明:

For Zero-Touch Provisioning (ZTP), the gateway must connect to a switchport with untagged Internet access so it can reach Aruba Central or the provisioning server. Additionally, the gateway requires an IP address via DHCP, which provides the necessary network configuration (IP, DNS, default gateway, and optionally ZTP server URL). No specific physical port, static IP, or jumbo frame configuration is required.

問題 #56

.....

VCESoft是一個學習HP技術的人們都知道的網站。它受到了參加HPE7-A06認定考試的人的一致好評。這是一個可以真正幫助到大家的網站。為什麼VCESoft能得到大家的信任呢？那是因為VCESoft有一個HP業界的精英團體，他們一直致力於為大家提供最優秀的考試資料。因此，VCESoft可以給大家提供更多的優秀的HPE7-A06參考書，以滿足大家的需要。

HPE7-A06認證題庫: <https://www.vcesoft.com/HPE7-A06-pdf.html>

HP HPE7-A06最新考古題 有了這個保證，你完全沒有必要再猶豫到底要不要買這個考古題了，想早點實現通過HP HPE7-A06認證考試的目標嗎，在VCESoft你可以很容易通過HP HPE7-A06考試，我們的培訓才料可以保證你100%的通過HP HPE7-A06認證考試，如果沒有通過我們將全額退款並且會迅速的更新考試練習題和答案，但這幾乎是不可能發生的，HP HPE7-A06最新考古題 要認證就必須要選擇一個認證題庫，那樣會節省你很多精力和時間，更確保你能通過考試，你可能從相關的網站或書籍上也看到部分相關培訓材料，但是我們VCESoft的HP HPE7-A06認證考試的相關資料是擁最全面的，可以給你最好的保障。

他們已經著手為學生設立黑客馬拉松，魁首聚會是什麼，有了這個保證，你完全沒有必要再猶豫到底要不要買這個考古題了，想早點實現通過HP HPE7-A06認證考試的目標嗎，在VCESoft你可以很容易通過HP HPE7-A06考試。

快速下載的HPE7-A06最新考古題 |第一次嘗試輕鬆學習並通過考試並且有效的HPE7-A06: HPE Campus Access Switching Expert Written Exam

我們的培訓才料可以保證你100%的通過HP HPE7-A06認證考試，如果沒有通過我們將全額退款並且會迅速的更新考試練習題和答案，但這幾乎是不可能發生的，要認證就必須要選擇一個認證題庫，那樣會節省你很多精力和時間，更確保你能通過考試。
