Oracle Cloud EPM Data Integration 2024 Implementation Professional Sample Questions (Q177-Q182):

NEW QUESTION # 177

Which of the following is a primary benefit of drill-through for financial analysts using Oracle Cloud EPM?

- A. It generates real-time financial reports
- B. It automates the data load process
- C. It manages user roles and permissions for financial data
- D. It allows them to access detailed transaction data for deeper analysis

Answer: D

Explanation:

Drill-through allows financial analysts to access detailed transaction data from a source system, providing deeper insights into the summary-level financial data available in Oracle Cloud EPM.

NEW QUESTION # 178

What is the primary purpose of defining source mappings when configuring a connection to an external system?

- A. To align source data fields with target application fields
- B. To monitor the progress of data integration jobs
- C. To generate real-time data visualizations
- D. To schedule regular data loads

Answer: A

Explanation:

Source mappings are defined to align data fields from the external source with the appropriate fields in the Oracle Cloud EPM target application.

NEW QUESTION # 179

Which of the following options is required to register a target application for EPM Planning in Oracle Cloud EPM?

- A. Provide the application name, type, and connection settings
- B. Define user permissions
- C. Specify the data transformation rules
- D. Assign a custom reporting template

Answer: A

Explanation:

When registering a target application, you need to provide the application name, type, and connection settings to ensure Oracle Cloud EPM can communicate with the target application.

NEW QUESTION # 180

Which of the following is a key factor in improving the performance of a data integration job that involves multiple transformation steps?

- A. Automating the creation of financial reports
- B. Simplifying the transformation logic where possible
- C. Running the job multiple times during the day
- D. Increasing the number of periods in the mapping

Answer: B

Explanation:

Simplifying the transformation logic reduces the complexity and the processing time required for each step, improving the overall performance of the integration job.

NEW QUESTION # 181

Which of the following actions can be performed to improve the performance of the EPM Integration Agent when processing large datasets?

- A. Automate financial report generation
- B. Use parallel processing to extract data
- C. Increase the number of user roles for each job
- D. Disable error logs during data extraction

Answer: B

Explanation:

Parallel processing allows the EPM Integration Agent to process large datasets more efficiently by handling multiple data extraction tasks simultaneously.
