Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q25-Q30):

NEW QUESTION # 25

What is found on an ART planning board?

- A. Features
- B. User stories
- C. Tasks
- D. Epics

Answer: A

Explanation:

According to the Scaled Agile Framework, the ART Planning Board is a visualization of the PI's feature delivery dates, feature dependencies among teams, and relevant milestones¹. Features are the primary elements that are planned and tracked on the ART Planning Board².

Epics, user stories, and tasks are not found on the ART Planning Board, but they are related to features in different ways. Epics are large initiatives that span multiple ARTs and PIs, and they are decomposed into features and enablers². User stories and tasks are smaller units of work that are used by teams to implement features within iterations².

NEW QUESTION # 26

What does the business value assigned to PI objective communicate?

- A. the monetary gain of achieving the objective
- B. the potential business impact of achieving the objective
- C. the cost of achieving the objective
- D. the customer satisfaction of achieving the objective

Answer: B

NEW QUESTION # 27

In the ART Kanban some steps have work in process (WIP) limits. Why is this necessary?

- A. To ensure large queues are not forming
- B. To enable Continuous Deployment
- C. To support multitasking
- D. To reduce handoffs and dependencies

Answer: A

Explanation:

= WIP limits are necessary in the ART Kanban to ensure large queues are not forming, which would slow down the flow of value and increase the lead time. WIP limits are a way of applying the Lean principle of reducing waste and optimizing the system for the whole. By limiting the amount of work that can be in progress at any stage of the Kanban system, the ART can balance the demand and capacity, avoid overloading the system, and focus on completing the work rather than starting new work. WIP limits also help to expose bottlenecks, dependencies, and impediments that need to be resolved to improve the flow efficiency and quality of the work. NEW QUESTION # 28

Which statement is true about Iteration goals?

- A. They are used to track scope changes over time
- B. They are used to measure business value achieved for each Iteration
- C. They verify that teams are working at their full capacity
- D. They align the team to a common Vision of work in the Iteration

Answer: D

Explanation:

Iteration goals are short, specific, and measurable statements that describe what the Agile team intends to accomplish in an Iteration. They are derived from the team backlog, the PI objectives, and the team vision.

Iteration goals help to align the team to a common vision of work in the Iteration, and provide clarity, focus, and motivation. Iteration goals also enable the team to communicate their progress and dependencies to other teams and stakeholders, and to demonstrate value delivery in the system demo. NEW QUESTION # 29

Which of the following is not a primary responsibility of the System Architect?

- A. Fostering built-in quality
- B. Defining subsystems and interfaces
- C. Fostering collaboration

- D. Supporting the implementation of Enablers

Answer: C
