NEW QUESTION # 55

A customer wants to be able to have insights into their data. They want a service that will automatically discover, map, classify their data, and identify access permissions.

Which NetApp cloud service meets these requirements?

- A. BlueXP digital advisor
- **B. BlueXP classification**
- C. ONTAP System Manager
- D. BlueXP observability

Answer: B

Explanation:

BlueXP classification is a service that enables you to scan and classify data across your organization's hybrid multicloud. Classification utilizes AI-driven natural language processing (NLP) for contextual data analysis and categorization, giving you actionable insights into your data to address compliance requirements, detect security vulnerabilities, optimize costs, and accelerate migration. BlueXP classification can discover, map, and classify both structured and unstructured data across various data sources, such as NetApp and third-party storage systems, databases, and cloud services. BlueXP classification can also identify access permissions and ownership of data, and apply tags and labels to further organize and protect your data.

NEW QUESTION # 57

Which NetApp BlueXP product enables a customer to provide read and write access to remote Windows servers from a centralized datastore?

- A. BlueXP copy and sync
- B. Cloud Volumes ONTAP
- C. BlueXP tiering
- D. BlueXP edge caching

Answer: D

Explanation:

BlueXP edge caching is a NetApp BlueXP product that enables a customer to provide read and write access to remote Windows servers from a centralized datastore. BlueXP edge caching allows you to cache data from a BlueXP volume or a Cloud Volume ONTAP system on a local Windows server, which improves the performance and availability of your applications. You can also sync the cached data back to the source volume, ensuring data consistency and protection.
