If you are not satisfied with the function of PDF version which just only provide you the questions and answers, the APP version of HPE7-A03 exam cram materials can offer you more. APP version can not only simulate the real test scene but also point out your mistakes and notice you to practice many times. This version of HP HPE7-A03 Exam Cram materials is rather powerful. If you are willing, you can mark your performance every day and adjust your studying and preparation relatively. HPE7-A03 exam cram materials will try our best to satisfy your demand.

Our HP experts also guarantee that anyone who studies well enough from the prep material will pass the HP Exams on the first try. We have kept the price of our Aruba Certified Campus Access Architect Exam (HPE7-A03) exam prep material very reasonable compared to other platforms so as not to stretch your tight budget further. And we also offer up to 1 year of free updates. A demo version of the preparation material is available on the website so that you can verify the validity of the product before obtaining them.

Highly-demanded HPE7-A03 Exam Materials Supply You Unparalleled Practice Prep - 2Pass4sure

Computers are changing our life day by day. We can do many things on computers. Technology changes the world. If you have dream to be a different people, obtaining a HP certification will be the first step. HPE7-A03 learning materials will be useful for you. As you can see the Forbes World's Billionaires List shows people starting bare-handed are mostly engaging in IT field. HPE7-A03 Learning Materials may be the first step to help you a different road to success.

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Topic 2	<ul style="list-style-type: none"> Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.
Topic 3	<ul style="list-style-type: none"> Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.
Topic 4	<ul style="list-style-type: none"> Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q66-Q71):

NEW QUESTION # 66

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada. They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location.

The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 st m) and the Canadian warehouse is 130K sq ft (12100 sq ml). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60.000 sq ft (5575 sqm) and smaller stores are planned at 25.000 sq ft '2320 sq mi. The locations need to expand the abilities to vendors that need to add setup displays or interactive kiosks in the stores. The current infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store.

Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDFs located on floors one and two. The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

What are two primary concerns of the Stakeholder? (Select two.)

- A. cost of solution
- B. ease of access
- C. expansion
- D. future proof

Answer: A,D

Explanation:

For the stakeholders at ACME Retail, the primary concerns include the cost of the solution and ensuring that the solution is future-proof. Given the company's budget concerns, it is crucial that the chosen network infrastructure offers a good return on investment and aligns with their financial constraints. At the same time, considering the company's growth plans and the rapid evolution of technology, the solution must be scalable and adaptable to future needs. This involves selecting networking equipment and technologies that can support emerging trends, such as increased wireless device usage, cloud computing, and advanced security requirements, without necessitating frequent, costly upgrades. Balancing these concerns will help ACME Retail achieve its operational goals while positioning itself for sustainable growth and innovation.

NEW QUESTION # 67

What are the advantages of using VSX-pair instead of two discrete switches to connect servers, storage, firewalls, and other workloads?

- A. Both members in a VSX-pair can be upgraded without any downtime for the workload.
- B. VMWare-Most can be connected with or without using LACP, regardless of their license.
- C. You can save half the number of licenses needed for AFC.
- D. The setup is much easier since both switches are sharing the same configuration.

Answer: A

Explanation:

One of the key advantages of using a Virtual Switching Extension (VSX) pair instead of two discrete switches for connecting servers, storage, firewalls, and other workloads is that both members in a VSX pair can be upgraded without any downtime for the workload (Option C). VSX technology provides advanced high availability features that allow for non-disruptive software upgrades, meaning that one switch in the VSX pair can be upgraded while the other continues to handle network traffic, thereby maintaining continuous operation of the connected workloads.

This seamless failover capability ensures that there is no interruption to the critical services running on the network, making VSX an ideal solution for environments where uptime is paramount.

NEW QUESTION # 68

What should be included in an Executive Summary? (Place the correct items into the list at the right Order is not important Not all options will be used)

Answer:

Explanation:

Explanation:

For an Executive Summary, typically the following items should be included:

- * Brief Summary
- * Contact Information
- * High-Level Design
- * Purpose of the Document
- * Recommendations
- * Scope
- * Target Audience

NEW QUESTION # 69

Why is it important to assess the current security posture during the discovery phase?

- A. To decide on the color scheme of network cables
- B. To identify vulnerabilities that need to be addressed in the new design
- C. To determine the physical location of network devices
- D. To evaluate the aesthetic design of the network layout

Answer: B

NEW QUESTION # 70

A global furniture retail company called 'No-Stair Inc.' requests you design their new WLAN infrastructure for a global footprint. Each location of 'No-Stair Inc.' has a similar layout: three small manager offices, a warehouse, and a 'retail' area. The 'retail' area and the warehouse together amount to 95% of the location. The IT department of the company is minimally engaged in their LAN refresh so the CTO of the company has shared the information below.

Current WLAN Infrastructure is based on the 802.11n "WIFI4Less" access-points series (both model 2013-INT (2.4 only internal antenna) and model 2019-EXT (dual-band external antenna only). These AP models are standalone without any centralized management. Last year 'No-Stair Inc.' ran a project called 'secure-it' ensuring that all needed network security was implemented to be fully compliant with their security standards. During this project, they also upgraded the AAA.

Infrastructure to handle the increased AAA requests. No additional Wi-Fi or security requirements are listed for this WLAN refresh, which means that 'No-Stair Inc.' will continue to use bridged SSIDs, with local breakout into different VLANs.

The CTO of 'No-Stair Inc.' understands the need for you to ask additional questions to deliver the design. The questions may be sent in written form and will be answered within two weeks.

What additional question needs to be answered in order to collect needed information for the WLAN design?

- A. What type or fiber connection is used between the core and access layer switches?
- B. Who is the campus switch vendor?
- C. Is there enough cooling in the MDF?
- D. Does the existing wired network support enough drops for an upgraded Wi-Fi Network?

Answer: D

Explanation:

When upgrading a WLAN infrastructure, it's important to ensure that the existing wired network can support the new wireless access points (APs) in terms of connectivity and power (if using Power over Ethernet, PoE). For 'No-Stair Inc.', which is planning a WLAN refresh without specific changes to the Wi-Fi or security requirements but potentially with new AP models and configurations, verifying the capacity of the wired network is crucial. The question about whether the existing wired network has enough drops (ethernet connections) for the upgraded Wi-Fi network addresses this concern. It's essential to ensure that there are sufficient ethernet ports available in the right locations to connect the new APs, and that these ports can provide the necessary power and data rates required by modern APs. This information will help in planning the deployment of the new APs, avoiding potential bottlenecks and ensuring that the upgraded WLAN can deliver the desired performance and coverage.

NEW QUESTION # 71

Our brand has marched into the international market and many overseas clients purchase our HPE7-A03 study materials online. As the saying goes, Rome is not built in a day. The achievements we get hinge on the constant improvement on the quality of our HPE7-A03 study materials and the belief we hold that we should provide the best service for the clients. The great efforts we devote to the HPE7-A03 Study Materials and the experiences we accumulate for decades are incalculable. All of these lead to our success of HPE7-A03 study materials and high prestige.
