Latest Microsoft GH-900 Dumps - Eliminate Your Risk of Failing [2026]

You have to upgrade your skills and knowledge then you will be in a position to compete in the modern world. The Microsoft GH-900 certification offers a great way to learn new in-demand skills and upgrade your knowledge level. To do this you just need to enroll in the GH-900 Exam and put in your efforts to pass this career booster GH-900 certification exam.

Microsoft GH-900 Exam Syllabus Topics:

Topic	Details
Topic 1	• Benefits of the GitHub Community: This section targets Community Managers and Open Source Contributors, focusing on engaging with the GitHub community. Candidates learn to participate in open source projects, utilize GitHub Discussions for collaboration and support, and contribute meaningfully to community-driven projects.
Topic 2	• Introduction to Git and GitHub: This section of the exam measures skills of Junior Developers and Platform Support Specialists and covers the basic understanding of Git and GitHub. It explains what Git is and why it is used, the fundamental Git workflow, and concepts related to repositories including their local and remote distinctions. Candidates learn essential Git commands such as initializing and cloning repositories, adding and committing changes, pushing and pulling updates, and branching and merging. It also covers navigating GitHub by creating accounts, managing repositories, understanding its interface, and working with issues and pull requests.
Topic 3	• Project Management: This section is designed for Project Coordinators and Product Managers and focuses on using GitHub Projects for project management. Candidates learn to create and manage GitHub Projects, utilize project boards for organizing tasks, and integrate project workflows with issues and pull requests to maintain project visibility and progress.
Topic 4	• Working with GitHub Repositories: This domain targets Repository Administrators and Content Managers, focusing on managing repository settings and permissions. Candidates learn to configure repositories, use templates, and effectively manage files by adding, editing, and deleting. The domain also addresses versioning of files and the use of GitHub Desktop for streamlined file management tasks within repositories.
Topic 5	• Modern Development: This domain assesses abilities of DevOps Engineers and Continuous Integration Specialists in implementing modern development practices. It emphasizes understanding DevOps principles and leveraging GitHub Actions for automation and CI • CD pipeline implementation. Candidates also learn GitHub's tools and best practices for conducting and managing code reviews.

Microsoft GitHub Foundations Sample Questions (Q131-Q136):

NEW QUESTION # 131

Which of the following default workflows are available as part of GitHub projects? (Choose three.)

- A. "Item closed"
- **B. "Pull request merged"**
- C. "Pull request opened"
- **D. "Label added to issue"**
- **E. "Auto-archive items"**

Answer: B,D,E

Explanation:

[D] When your project initializes, two workflows are enabled by default: When issues or pull requests in your project are closed, their status is set to Done, and when pull requests in your project are merged, their status is set to Done.

You can also configure workflows to automatically archive items [A] when they meet set criteria and to automatically add items from a repository [B - see below] when they match a filter.

[B] GitHub marks an issue or pull request as updated when it is:

Created

Reopened

Edited

Commented

*-> Labeled

Assignees are updated

Milestones are updated

Transferred to another repository

NEW QUESTION # 132

What are some scenarios that can automatically subscribe you to conversations on GitHub?

(Each answer presents a complete solution. Choose three.)

- A. Opening a pull request or issue
- B. Being assigned to an issue or pull request
- C. Being added as a repo admin
- D. Commenting on a thread
- E. Pushing a commit to the default branch

Answer: A,B,D

Explanation:

On GitHub, certain actions automatically subscribe you to conversations so that you receive notifications about further activity in that thread.

Opening a Pull Request or Issue:

Option C is correct because when you open a pull request or issue, you are automatically subscribed to the conversation and will receive notifications for any updates.

Commenting on a Thread:

Option D is correct because commenting on an issue or pull request automatically subscribes you to that thread, ensuring you are notified of further comments or changes.

Being Assigned to an Issue or Pull Request:

Option E is correct because when you are assigned to an issue or pull request, you are automatically subscribed to notifications related to it.

Incorrect Options:

Option A is incorrect because pushing a commit to the default branch does not automatically subscribe you to conversations.

Option B is incorrect because being added as a repo admin does not automatically subscribe you to specific conversations unless you engage with them.

NEW QUESTION # 133

GitHub Copilot leverages an AI model trained using:

- A. public and internal repositories in your GitHub organization.
- B. public GitHub repositories.
- C. code samples from online forums.
- D. public, internal, and private repositories in your GitHub organization.

Answer: B

NEW QUESTION # 134

GitHub Actions workflows can be directly triggered by which of the following events? (Choose three.)

- A. Pushing to a GitHub repository
- B. Creating a new repository
- C. Disabling a GitHub runner
- D. Committing a change to a local git repository
- E. Creating an Issue
- F. Adding a comment to a discussion post

Answer: A,E,F

Explanation:

GitHub Actions are automated workflows that can be triggered by various events on GitHub.

Some common events that trigger workflows include pushes to a repository, creation of issues, and comments on discussion posts.

Triggering GitHub Actions:

Option D (Pushing to a GitHub repository) is correct because this is one of the most common triggers for CI/CD workflows.

Option F (Creating an Issue) is correct because issues are commonly used as triggers for workflows, such as automatically assigning a label or notifying a team.

Option A (Adding a comment to a discussion post) is correct because actions can be triggered by activity on discussion posts, including comments.

NEW QUESTION # 135

Which of the following statements most accurately describes secret gists?

- A. Anyone can see the gist from the gist Discover page.
- B. Secret gists require GitHub Enterprise.
- C. Users with assigned access can view the gist.
- **D. Anyone with the URL for the gist can view the gist.**

Answer: D

Explanation:

Secret gists on GitHub are "unlisted" gists, meaning they are not publicly discoverable but can be viewed by anyone who has the URL.

Visibility of Secret Gists:

Option A is correct because secret gists can be viewed by anyone who has the direct URL, making them accessible yet unlisted.

Incorrect Options:

Option B is incorrect because secret gists do not require GitHub Enterprise; they are available on all GitHub accounts.

Option C is incorrect because secret gists do not appear on the gist Discover page.

Option D is incorrect because secret gists do not have an "assigned access" feature; access is determined by sharing the URL.
