## SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q26-Q31):

### NEW QUESTION # 26

In a shipper-to-logistics service provider (LSP) B2B scenario, both parties are using SAP Transportation Management. The LSP will plan and execute transportation for the shipper. Which documents are involved?

Note: There are 2 correct answers to this question.

- A. LSP's service order
- B. Shipper's freight unit
- C. LSP's forwarding quotation
- D. Shipper's freight order

**Answer: B,C**

Explanation:

In a shipper-to-LSP B2B scenario where both parties use SAP Transportation Management, the LSP plans and executes transportation for the shipper. According to the SAP documentation, the key documents involved are:

\* LSP's forwarding quotation (A): The LSP creates a forwarding quotation to provide a price estimate to the shipper, which forms the basis for the transportation agreement.

\* Shipper's freight unit (D): The shipper creates freight units based on their transportation requirements (e.g., from sales orders), which are transferred to the LSP for planning and execution.

The other options are incorrect:

\* LSP's service order (B) is used for internal services, not for shipper-LSP interactions.

\* Shipper's freight order (C) is created by the shipper for direct carrier execution, not in a scenario where the LSP handles planning and execution.

- \* Stability (B): Ensuring data stability prevents inconsistencies and errors, supporting a reliable and maintainable system core.
- \* Efficiency (D): Efficient data processes reduce redundancy and improve performance, aligning with clean core principles of streamlined operations.
